

## ENGINEERS AT WORK

LOOKING OUT FOR ELECTRIC TRANSMISSION LINE.

Windsor is likely to get a chance at Niagara power—A bridge of two weeks has taken her life.

Windsor, Ont., Sept. 4.—Engineers have been working in Essex county for some time making a survey in the vicinity of Leamington and Kingsville, and are at present working a few miles out of Windsor. Hon. J. O. Reaume is authority for the statement that they are government engineers sent down to survey for the transmission line. This is the first definite steps taken by the Hydro-Electric Commission since the first announcement that the board had received application for sufficient power to warrant in extending the line from London to the frontier. As a result Niagara power for Windsor becomes more than a remote possibility.

There is only one way to cure deafness, and that is by constitutional remedies.

Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed, the ear is running and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed for ever.
