SHE IS DETERMINED

THE MARLBOROUGHS ARE PARTED FOREVER.

All Efforts to Bring About a Reconciliation Have Proved Absolutely Fruitless.

London, Sept. 12.—The Duchess of Marlborough, despite the oft-repeated rumors to the contrary, is as confirmed as ever in her determination to remain separated from the duke. It is true there have been frequent and numerous attempts on the part of friends of both to bring about a reconciliation, but now all further effort in this direction has been abandoned, owing to the obstinate attitude of both husband and wife.

The exact cause of the separation has never been disclosed, as neither has ever cared to ventilate their grievances in court. But this much is known, her grace has found the duke's company incompatible with her comfort, while the noble duke only recently and openly expressed to his distinguished relative, Winston Churchill, his increasing dislike, not only of his wife personally, but of her general conduct and behavior toward him.

There is no doubt that the duchess is feeling the absence of the masculine protection to which she was so long accustomed, but she is becoming more and more used to relying solely and entirely on her own judgment, both in her business and private matters. Indeed, the duchess is developing a willfulness and strong-mindedness absolutely amazing to those who knew her in the days when she thought it her duty to consult her husband in everything.

Outside her charitable work, the duchess has been caused much concern by the illness of her second son, the Hon. Ivor Spencer Churchill. The boy has been found to have weak lungs. In addition to being a victim of anemia. Immediately his mother was informed of the lung trouble she rushed him off to St. Moritz, Switzerland. After a course of open air treatment there the duchess had to return to London to attend several important social functions.

Now she has taken the boy down to the Kentish cliffs, and has rented for a month a little place, North Foreland Lodge, near Broadstairs, and close to the sea. The duchess does nothing by halves. To have more fresh air for her ailing son she had all the window sashes of the place removed, the boy sleeping practically in the open air. This course of treatment is proving effective, for already the boy is improving.

The duchess' devotion to her son has aroused much sympathy and admiration among her more intimate friends, who usually delegate the duties of sick nursing to professional folk, remaining meanwhile with his nurses. Her eldest son, Lord Blandford remains meanwhile with his father at Blenheim, and when the duchess wishes to see him it is always brought to her by the tutor. The duke has not been in Sunderland House since the separation.

When the duchess comes back to town she intends going to New York in the latter part of autumn, along with her mother, Mrs. O. H. Belmont, who is now in Paris.

Save The Children.

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather months. Stomach troubles, cholera infantum and diarrhoea every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets cure these troubles, or if given occasionally to the child will prevent the trouble coming on. And the mother has the guarantee of a government analyst that the Tablets contain no opiate or harmful drug. Mrs. George Mineault, Jr., Mont Louis, Que. says: "Before giving Baby's Own Tablets to my little one she suffered greatly from colic and stomach troubles, and cried a great deal. The Tablets, soon cured her and she is now a plump healthy child who does not look as though she ever had an hour's illness." You can get the Tablets from any dealer in medicine or by mail at 25c a box, from the Dr. Williams' Medicine company, Brockville, Ont.

The New Diseases.

Frank Honeywell, in Memphis News-Scimitar. It's funny how these doctor men discover new things to kill men off. Discovering no interesting diseases new to kill men off. Had lightning bolts we used to have. They call them now bronchitis. The old-time sore throat of your youth are changed to tonsilitis.

The leg aches that we used to have, by circe mesmerists. They've made us think a new disease—Sciatic rheumatism. If old-time stomach-aches arise, they're likely to drive us into a hospital to cut us for appendicitis.

But here's the latest that is out from medical profession: I fortunately have the remedy. Of truth—in my possession. I knew a man who possessed it. In error, and to cure him, He drank four quarts of more of milk. A neighbor did assure him.

That this would cure emetical And cure him of his stomach clean He said 'twould cure his stomach clean Of all the poison in his system. A thunder-storm was raging then; The sick man, I profess, Groaned louder than the thunder-storm And died in deep distress.

They called a neighboring doctor in. Who took his carving knife And cut the dead man open to Find out what took his life. Then to the mourning family gave This diagnosis come: He said the man's disease was caused By some case on the stomach.

Perhaps 'twas so, I cannot say—I am no science stunner. That doctor said the milk was turned By thunder into clabber. At once the gastric forces on That clabbered milk did seize And quickly it was worked into A mass of cottage cheese.

Ab, we, the great discoverers That medicine can make; We should be happy to get sick For new discoveries sake.

How to Stop Diarrhoea.

It is sure to come with the summer. No prescription is so swift to relieve and so certain to cure as "Nerviline." In all bowel disorders, cramps, diarrhoea and acute indigestion, Polson's Nerviline is unsurpassed. Try a 25c. bottle.

ONE BAD MISTAKE

Is Frequently Made By the Wisest of Kingston People.

It's a serious mistake to neglect backache. Backache is the first symptom of kidney ills. Fatal complications may follow. Booth's Kidney Pills act quickly to overcome kidney ills, do not delay until too late, it may mean Diabetes, Bright's Disease.

Read what a Kingston resident says. Mrs. J. Stirling, of 283 Sydenham street, Kingston, Ont., says: "Some ten years ago Mr. Stirling suffered with a broken shoulder through a fall. The shoulder became weak again and his back was weak. The kidneys being badly affected and there were many symptoms of Bright's disease that rapidly developed. He became weakened and could not sleep. The desire to urinate was so frequent that he would leave his bed many times during each night. The urine was scant and scalding; and a heavy brick dust sediment was always noticeable. Nothing seemed to benefit his condition until he used Booth's Kidney Pills, obtained at Malwood's Drug Store, on advice of a friend. He soon found relief in them and it was a very short time until the urine had cleared and the secretions had been reduced to normal."

Sold by dealers. Price 50c. The R. T. Booth Company, limited, Fort Erie, Ont., sole Canadian agents.

There is no one article in the line of medicines that gives so large a return for the money as a good porous strengthening plaster, such as Carter's Snake Weed and Belladonna Backache Plaster.

It's a poor faith that values its creed by its virulent power to hurt the sheep of some other fold. Figures may not lie, but the man who makes them may.

If you trust yourself you will surely be true to others.

Dress For A Small Girl.

An attractive little dress for a little girl is illustrated in the accompanying cut. The model was of light blue linen, the skirt of the little frock being plaited in at the waist and finished simply with a deep hem. The bodice portion of the dress was trimmed with a reverse collar embroidered in large dots embroidered on the linen in a darker shade of blue, the little discs being heavily padded and worked in washable mercerized cotton.

J. E. RALPH, PUBLIC PRINTER. J. E. Ralph, the new head of the Department of Engraving and Printing in Washington, is a busy man trying to finish up the issue of \$20,000,000 of emergency currency which the last Congress authorized. The Treasury officials in order to give more elasticity to the currency system in view of the time in the United States. Mr. Ralph will make a report sometime in September as to the status of the new twenty-million bank, which is expected with great interest by the bankers and business men. Should there be an enormous demand indicated by the Treasury orders on Mr. Ralph to hurry up more emergency currency it will be necessary to work night and day to keep up with the demand.

When the average man gives a dollar to some charity he manages to get caught in the act. A check book is no proof of a bank account.

Anty Drudge's Vision.

Anty Drudge had finished her weekly wash before noon and she sat in her comfortable rocking chair and dozed.

And in a dream, she saw an unhappy woman bound with fetters, her right arm chained to a washboiler, her left arm to a washboard.

And the sun was setting and it was growing dark.

And she dreamed that she touched the shackles on each wrist of the woman with a bar of Fels-Naptha soap. And they fell off, and the woman arose glad and free—free from washday drudgery for evermore. And Anty Drudge, arousing from her slumber, knew that what she dreamed was true.

The greatest emancipation proclamation since Lincoln's is printed on the back of the red and green Fels-Naptha soap wrapper. It is the directions for using Fels-Naptha in washing clothes.

It is also a different way of washing. It has freed millions of women from washday 'drudgery for all time to come—from slavery to the old back-breaking, health wrecking methods which used to be thought necessary.

Are you still a slave to these old-fashioned methods, drudging away every washday, wasting your time and your work and wearing out clothes before their time? Then stop. Use Fels-Naptha. Wash your clothes in the new and easy way in cool or lukewarm water, summer or winter, without boiling or hard rubbing. Easy directions on the back of the Fels-Naptha wrapper.

Our Greatest Year

In spite of industrial glooms and financial depression, this Company has steadily marched forward.

Instead of losing ground, or even standing still, The Mutual Life of Canada wrote MORE business last year than in any other one year in the Company's history.

The total new insurance amounted to \$7,081,402—a gain of \$1,577,855 over 1906. And all but \$78,000 of this was written right here in Canada.

The Mutual Life of Canada is the people's Company—conducted in the interests of its policy-holders who get all the profits.
