PURITY IN ELECTIONS.

The Reform League will probably ct at once and for the purpose of securing a clean dection in Kingston. The only hope is to secure the hearty concurrence of both parties in the city. It may now be too late to make any advances in that directions In the local election, last time, there was no desire, with one party, to renew the compact which made for the election of a liberal member of legislature under very remarkable circumstances. The cause that never prospered in this city, except on a boodle basis, had no use for a contract which made wealth of no account and the personal equation everything. The league has been dreamling too long to make itself felt in the present election, and without an agreement which covers all the active workers on either side nothing can be where, and the government, whose affected at this juncture. The proposal, that the polls be manned and the agents of the political candidates day, should be remembered gratefully. watched, is an important suggestion. The bribery and corruption are not done at the polls or in their immediate vicinity.

MORE LIGHT IS GIVEN. The Manitoba Free Press gives further light upon the land deal for Grand Trunk Pacific terminals outside of Winnipeg, and shows how sadly Mr. Roblin's friends were left in their speculations. In anticipation of the railway company's selections there was a remarkable purchase of lands in the vicinity of the city and Hon. Bob Rogers was among the investors. His crowd wanted \$2,000 an acre for 309 tronizing home manufacturers, is the acres, and had they succeeded in un- government that appeals to the peoloading on the government they would ple have cleared up \$420,000. But they bought five sections from two other gentlemen, about 800 acres in all, and their profit was \$122,800. The difference between the speculators was this, that those who sold to the commission made \$153.50 per acre, the transaction. The Hamilton Spectator, by the way, innocent thing, has been taken in by Mr. Roblin on this and other subjects, and has repeated the fabrications to the hurt of itself,

THE MAN FOR KINGSTON.

The Canadian Locomotive company has made a proper answer to the assertion of our contemporary, that it does not matter what government in power so far as Kingston's chief industry is concerned.

Apparently, it makes a great difference, and as history repeats itself, and the conservative rule of the past will be the conservative rule of the future, one knows what to expect should the present liberal government
