Through the generosity of George W. Freekenridge, of San Antonio eight scholarships of \$200 a year ar open to women qualified to enter the medical school of the University Texas. Mr. Breckenridge built University Hall some ten years ago for the exclusive use of the women of the medical school. It is described as handsome brick building with all modern improvements. Rooms, including light, heat and attendance, may be had in this building for \$5 a month. During the last year boarding on the co-operative plan was at the rate of \$11 a month. These low prices are said to be the result of the excellent management of Mrs. Callie Chaw, the superintendent of University Hall. The University of Texas is coeducational. Dr. Charlotte Schaefer, one of its graduates in medicine, is professor of histology, biology and embryology.
