ARE OPPOSED TO IT

COMPULSORY VACCINATION UNDER DISCUSSION.

W. E. French, of Brockville, Addressed a Meeting Held on Monday Night—Will Organize to Fight the Case.

On Monday evening, a meeting was called of those opposed to compulsory vaccination. The meeting was held in the old Union Hall, corner of Wellington and Brock streets, and was attended by about forty people. Included in the number were three women. Addresses were delivered by W. E. French, of Brockville, and local speakers who are opposed to compulsory vaccination, and at the close, steps were taken to oppose any such action being taken in Kingston. In opening, Dr. Evans explained the object of the meeting, stating that it had been deemed advisable to hold a meeting to form an organization which would oppose any action being taken by the city council, to make vaccination compulsory. He considered that the liberties of the people should be protected, and for the purpose of gaining this end, the meeting had been called for organization.

Dr. Ackroyd was then appointed chairman, and Charles White, secretary. Dr. Ackroyd read a letter to the meeting, which he prepared for the press, and which opposes very strongly, compulsory vaccination, and then Mr. French was introduced.

Mr. French made a strong protest against compulsory vaccination, and referred to the recent smallpox scare in Brockville, when some 2,000 people, men, women and children were vaccinated. He cited one case, that of a child, who had died from lockjaw, brought about, he claimed, by vaccination. Brockville had been canvassed, and ninety out of every hundred, had stated that they didn't want compulsory vaccination. The whole thing he classed as partly a piece of class legislation. Medical doctors were not a unit in the question. In Brockville, the citizens had organized, because they felt that the question was one that should be left to individual conscience. At Brockville, the statement had been given out that out of eighty cases, only six of them had been vaccinated. The speaker had personally interviewed fifty-two of the number, and found that twenty-four of them had been vaccinated. As a result of the vaccination, children became ill, and parents spent many anxious nights. One of the worst cases dealt with at Brockville, was that of a woman who had been attacked with cowpox.

The speaker argued that it was not right that people opposed to vaccination should be compelled to comply with it. He considered that it was a standing disgrace for the medical men to have such a law, and it was time that it should be wiped out.

Charles W. White said that he understood that when the last smallpox scare was on in Kingston, there had been three deaths from vaccination, and none from smallpox. According to pictures he had viewed of people who suffered from smallpox, he doubted very much, if the Kingston patients really had the disease. He held that there was more suffering from vaccination, than from smallpox.

Dr. Evans said that he was not prepared to say whether there was at present an epidemic of smallpox in the city, and characterized the system of isolation in Kingston, as a farce.

Dr. Evans made a strong appeal for the people to oppose very strongly, any action to have the city council make vaccination compulsory. The question was one that should be made an issue in the coming municipal elections.

Dr. Ackroyd referred to the order issued that all students at Queen's, must be vaccinated. He doubted very much, if such a thing could be made compulsory. On entering the college, the question of vaccination was not asked, and he held that it was not right that such a step be taken, which would deprive students of attending the classes.

Before the meeting adjourned, a hearty vote of thanks was tendered Mr. French, for his address, and it was resolved to continue an organization for the purpose of fighting compulsory vaccination. It is the intention to hold another meeting, to be addressed by outside speakers.

CITY COUNCIL TO MEET

To Consider Compulsory Vaccination Question.

Mayor Ross has called a special meeting of the city council for this evening at eight o'clock to consider whether or not compulsory vaccination shall be enforced. Representatives of the Board of Health and the medical profession will be present to urge upon the council the enforcement of the vaccination law.

Contagious disease can be prevented from spreading by care exercised by doctors and citizens generally. The law on this matter is as follows:— "Whenever any household knows that any person within his family or household has smallpox, chickenpox, scarlet fever, diphtheria or any other contagious disease, he shall within 24 hours give notice thereof to the local Board of Health, or Medical Health Officer and failing to do so, shall subject himself to a penalty not exceeding \$25."

Medical Health Officer Bell has devoted all his time since last Thursday to rounding up cases reported to him and overseeing quarantine and fumigation. He cannot see that the disease can be stamped out by any other means than vaccination.

Last evening, the Separate School Board had a special meeting to consider the situation, in view of the closing of St. Mary's school. This school will be kept closed for ten days at least. The board did not decide on compulsory vaccination of the separate school pupils, but desired to await the action of the city council this evening on the matter. If the council decides not to compel people to get vaccinated, the separate school board will likely refuse to admit pupils to its schools unless they can show certificates of successful vaccination.

Don't for a moment entertain the idea that the world owes you a debt of gratitude for the advantage you deal out.

Fight for principle, but before entering the war be quite sure that it is a principle worth the battle. The man who is too shiftless to register ought not even to be allowed to participate in a "straw vote."

LENNOX AND ADDINGTON.

The Vote Cast in That Constituency.

Table with columns for candidates and votes. Includes names like Adolphustown, Wilson, Warton, etc.

Wilson's majority 154. There were 21 rejected ballots all over the riding.

Prince Edward County.

Table with columns for candidates and votes. Includes names like Currie, Alcorn, Hallowell, etc.

Majority for Currie, 137. The vote polled was a heavy one in comparison with recent elections. In the Wilson-Norman election the total vote was 4,110, with the Alcorn-Rose election, 4,360. Dr. Currie polled 77 more votes than he received when opposed by R. A. Norman.

ABUSED HIS WIFE

Because She Asked Him to Clean Stove Pipes.

Because she asked him to clean some stove pipes, a resident of Clergy street west, last night abused his wife, and a call was sent in to the police. Constables Arniel and Davies responded to the call, but when they arrived at the home the officers had made good his escape. It is not likely that the wife will take any action against the husband, and it is probable that the calling of the police last night, will be "he means of keeping hubby in his place. It is likely that the next time he is asked to clean stove pipes, he will not create such a fuss.

A lot of times it is policy, and the best plan, too, to let the woman of the house have her own way about some things.

Most of us try to get our morality points prominent for public approval.

His Nerves Weak

Poor Memory, Lacked Vigor, Lost Employment.

Another case proving you quickly get bracing health from Ferrozone.

There's a real reason why Ferrozone cures.

It's a true nerve tonic—not a stimulant—it feeds the nerves with nourishment—gives them vital actual activity. No other tonic in the world like Ferrozone, nothing else is so quick and lasting in its effects on a run-down, nervous system. "I used enough medicine to appreciate an honest one," writes J. B. Beattie, from his home in Newcastle: "From babyhood I was not overly strong, and was always nervous. I smoked a good deal, but on the whole my habits were good. My trouble first began with a shortening of the hours of sleep. I would awaken too early, my appetite was poor, and to whip it up I used highly spiced and sweet foods. First thing I knew I had palpitation on doing a little extra work, and then an awful tiredness came upon me and a strange feeling of dread—almost of fear—wade me think I was losing grip of myself. My power of memory weakened and I lost my position. Then I read about Ferrozone. Say, it's awfully good to get a medicine that helps you right off. I don't mind telling you I was badly scared, and every dose was almost like sunshine. At once I began to feel better, and permanently better I really was, for less than a dozen boxes made me a well man. Now I can do my work with any man and I am grateful to Ferrozone."

Ferrozone corrects all enfeebled conditions of the system, builds up and gives the body great resistive power against disease. To use Ferrozone assures lasting, robust health. 50c. per box or six boxes for \$2.50, at all dealers. Try Ferrozone, do it to-day.

The Value of Economy

Many people fail to save, because they do not realize the importance of small economies. The practice, once begun, of laying aside a portion of your income, no matter how small, every week or month, will soon become a fixed habit. The result in a few years will probably surprise, and certainly gratify you. Start a Savings Account to-day with
