It Helps to Keep Them Well.

In a growing, active child the cells of which the body is composed are being worn out—and replaced — very rapidly. This dead tissue must be gotten rid of somehow, and the dan-ger is that the eliminating organs— the Bowels, Kidneys and Skin—may not do their work well enough. Then the blood becomes poisoned and the child does not thrive.

Nothing has such an invigorating effect on these organs as ripe fruit juices. Apple juice increases the action of the kidneys; other fruit juices stimulate the liver to secrete more oile, and bile produces easy and reguinr movements of the bowels; others etir up the glands of the skin to throw off more waste matter.

The difficulty is that to get these effects a great deal of fruit must be enten, and the excess of pulp and woody matter may upset the digestion. The better way is to give the children "Fruit-a-tives", which are tablets made of concentrated fruit juices with valu ble tonics added.

"I ruit-a-tives" have the combined effect of the different fruit juices, helping all the eliminating organs to tork properly, curing Constipation, toning up the system, and keeping the children plump and rosy. 25c. for a trul box. 50c, for regular size—6 1 -xe; for \$2.50. Fruit-a-tives Limited,

This year has seen the old order ving place to the new in many quarters. Turkey, by her revolution, has ntered upon an era of constitutionalism, and Germany's evolutions in the same direction have been sensationally fastened by the impulsiveness of the kaiser's rule. Now it is Austria's

It used to be a common theory that the death of Francis Joseph would see the disruption of the dual monarchy.
