One Explanation is That It Meant the Spaniards "Nothing Here" When They Landed.

It is singular that no one can say with any certainty what is the origin of the word Canada. There is an old explanation, recently revived, which says the Spaniards, in speaking of then little known country, said 'Aca Nada," meaning thereby "nothing here." To this there seems to be two objections. One of them is that an ejaculation would hardly become the name of a country, unless someone wrote it on a map, and there is no reason to suppose that any one did, and the other is that Aca is not the Spanish for "here," but means "hither:" Another explanation is that it is a corruption of the Indian word "Kannatha," meaning a collection of houses, and was applied by the Indians to Quebec, not as a name but tor purposes of description. Indian names are usually, perhaps always, only descriptions, If Kannatha means a collection of houses, there were probably many kannathas, but it would be quite natural for the first explorers to connect it with the place to which they first heard it applied. Another explanation is now offered, namely that in old Spanish Canada (accented on the second syllable) means a gorge or valley, and hence that the expression "Tiera de la Canada," appearing on some Spanish maps, means "land of the valley. quite a national appellation to be given to the valley of the St. Lawrence, which is par emphasis, the great valley of the Atlantic coast. Let us take another familiar name, Victoria who pronounce this name as though it were a lorm of the word Eskimo, and Mr. Phillips-Wolley in his poem "The Sea Queen Wakes," gives it this value by robbing the second syllable of its accent. This sort of thing is allowable to poets. The master of them all. Shakespeare, in his play "Coriolanus," compels his readers to accent the name at one time on the first and at another on the second syllable, if they would ob-serve the metre. The earliest reference we have seen to Esquimalt, as we call it now, is in a paper by Sir James Douglas, and the name is there written Isthoymalt. Clearly Governor Douglas intended to write a word accented on the second syllable. The transition from "th" to "q" would be easy and natural, and possibly may be more nearly correct in sound than the governor's spelling. It must be remembered that we cannot exactly reproduce Indian sounds with English letters. If you want any proof on that score, get some one who speaks Tsimpsean to tell you the name of Kaien Island, and see how near you

can come to spelling it. Kaien is a shot at it, but it is a long way from

Taking Weaker Tea.

"Very weak, please," is becoming

familiar phrase to the pourer o

tea. Are Canadians developing into

a race of nervous wrecks, or are we so

much more sensible than our for-

bears? Men and women alike are for-

saking the "good cup of tea" and

taking to the wishy-washy. In fact

some people declare they dislike the

taste of strong tea. One remembers

that when the Chinese beverage was

still somewhat of a novelty and lux-

ury quite good housewives used to put

a handful or sooof tea leaves in the

pot, give it a thorough boil and then

dispense it. We certainly owe them

a grudge, dear simple souls, if that

awful concoction is responsible for the

nerves of the present day, and for

the request, unwelcome to the good

tea-maker's ear. "Very weak, please!"

Besides, Gellett Burgess would say

the remark was a bromidiom, and

CURE FOR CANCER.

Doctor In London Is Having Wonderful Success With Vaccine.

A new development of the vaccine treatment for cancer, originated by Dr. Doyen of Paris is now being employed daily in serious cases at St. Mary's Hospital, Paddington, London, Eng., with wonderful results ir. the alleviation of pain. Dr. Doyen isolated a bacillus from

patients which he regarded as the true organism of the disease. From this he prepared a vaccine in which he hoped lay the cure for cancer. Distinguished investigators in London placed the vaccine under slow and elaborate tests. They have come regretfully to the conclusion that the microbes are not the real thing, and that the cause and cure of cancer are still to seek. But they | the royal residence at Sandringham have evolved an improved vaccine can fail to be struck with the ken- Military College at Kingston, County of which promises a wide modification | nels used for the Queen's pets. It allays pain, much as morphia might, and it soothes the in- footed friends, who may or may no flamed tissue around the cancerous growth. It may in some cases pro- much-prized dainty.

there is no evidence on which this can be stated with certainty. "It is a palliative, not a specific." remarked one of the investigators who have been hard at work on the new treatment. "It performs a useful purpose, and its use will certainly be extended. But let nobody imagine, that a cure for cancer has been found. The disease is still, alas, the most baffling mystery of medical science."

A Case of Heredity.
