The cost of radium bromide is about £7 a milligramme, which would mean over £20,000 for an ounce avoirdupois.

Value Of Radium.

Dundee Advertiser. The value of a speck of radium is incredibly great and when the Hon. Sydney Holland, at Sir Frederick Travers' lecture at the London hospital last week, picked up the tube containing the famous surgeon's microscopic £200 worth of radium bromide Sir Frederick's concern for its safety may not have been altogether assumed.

While the late Prof. Currie was lecturing on the wonderful element one day in Paris he dropped the glass tube containing the few grains of radium with which he was demonstrating, and the glass breaking, the precious powder was scattered all over the floor. At once the room was cleared, every spec of dust collected with the greatest care, taken to the professor's laboratory, dissolved, recrystallized and the radium extracted from it, refuse again with the loss of only an infinitesimal fraction. The cost of radium bromide is about £7 a milligramme, which would mean over £20,000 for an ounce avoirdupois.

He Knew How To Pick Them.

Saturday Evening Post.

The orchestra was playing loudly in one of the restaurants in Beaver during the democratic national convention, and the diners were talking loudly so they might hear and be heard.

At one table sat a beautiful woman and her escort and at the next table a number of Tammany men.

Suddenly, the orchestra stopped, bing! and a Tammany man's voice rang out: "By George, that's a good-looking woman! I'd like to meet her."

The man at the next table, who was with the lady, came over, tapped the Tammany man on the shoulder, and said frigidly: "Sir, that lady is my wife."

"Shake," said the Tammany man;

"I am glad to meet you, you certainly are a good picker."

Any hostilities were averted.

Sincuries In England.

Pall Mall Gazette.

Arthur George Beckett, whose death has cast a gloom over Fleet street, served a few years in the war office, as also did, in the "days that were earlier," the late Clement Scott and Sir Norman Lockyer. Their experiences there would compare favorably with that of the war office clerk of to-day. Mr. Beckett used to say that he always read through the Times on getting to the office. One day, he asked for work, and his chief set him to index a map of circulars, advising him not to hurry, but to take a stroll in the park if he liked. When the index was finished, the chief rewarded him with the remark, "I only gave you the work because you bothered me now it's done, it's no good to us and never will be."

Effective Help.

English Paper.

A slater who was engaged upon the roof of a house in Glasgow, fell from the ladder and lay in an unconscious state upon the pavement.

One of the pedestrians, in the street who rushed to the aid of the poor man changed to have a flask of spirits in his pocket, and, to revive him, began to pour a little down his throat.

"Canny, mon, canny," said a man looking on, "or you'll choke him."

The "unconscious" slater opened his eyes and said quietly: "Pour awa' mon, pour awa', ye're doin' fine."
