Society. It is a city of 45,000 people, and is the seat of the government of province of the same name. The e are mostly Mohammedans, but ore is a considerable number of Armenians and a small Greek community

Anti-Christian rioting in Adana is in no way connected with the political upheaval in Constantinople of the past four days. It involves a recrudescence of the Armenian question, which is refigious and racial, and has nothing to do with the internal politics of Turey. The Armenians are Christians, and still have an undependent church in Constantinople.
