Stromboli's Flames,

Stromboli rarely pours out streams of lava, for this Aeolian crater vomits flame persistently and cinders spasmodically. The 'lighthouse of the Mediterranean" has been known to stick to its function of torchbearer for the space of 2,000 years. Whenever the tiny, regular eruption takes place the stone drop back again into the crater. While the ancients regarded Stromboli variously as the smithy of Vulcan and the headquarters of Acolus, the men of the middle ages looked upon it as the main highway to purgatory.

The Gargoyle. The word "gargoyle" is closely akin to "gargle." for "gargoyle" is simply French "gargouille" (throat). It was a good name for the architectural monster through whose mouth the rain-water was carried off. > 17 Albani Were a Man. The famous prima donna, who is

announced to appear on the variety stage at a salary of \$2,500 a week unlike Mme. Melba-who has lately been expressing approval of the Suffragette movement-has a great opinion of the superiority of the sterner sex. "I am old-fashioned enough she confessed a short time ago. still revere 'man' as of the superior sex. But how odd they are too! suppose if I were a man I should be odd too; but how funny are some men, what real children, how lovable with all their big-heartedness, with all their experience of the world how trustful still, and-when a woman concerned-how often too easily taken in!" And after thus qualifying her statement as to the superiority of man, Mme. Albani further confesses that if she were a man she would strive to see the world, and profit by all the good there is in every other country, in order to help to improve her own. She is devoted to England and to the English, as well as to her own native Canadian land. And "i I were a boy," to again quote her own words, "I am sure I should long to do my own country."
