Daily Whig.

SINGLE TAXERS AT WORK.

The single taxers want a change in the law, so that assessors may tax the land more for general purposes...

A PLEA FOR QUIETNESS.

The Sabbath is best kept which is as quiet as possible, and as free from secular occupations.

But the man who can divert himself at will during the week, who can find time for amusements, for diversion...

What's the harm, says one, in eating ice cream on Sunday, or Sunday excursions, even in some Sunday amusements?

It is this abuse of the day which is most to be feared, and the only safe course is to keep the day as it has been kept heretofore in Canada.

THE RESTING PLACES.

Whoever wanders these days he is confronted with the sign, "Keep off the grass." On school and church property this is particularly noticeable.

The school plots are very attractive in the summer months—and when the scholars are away from them.

The church, too, that puts up the sign "Keep off the grass," is advertising itself as unneighborly.

The Whig's ideas in this respect are shared by others. They are commended to the school trustees and church officials in the hope that their appropriateness may be acknowledged.

DESERVING OF SUPPORT.

Canadians generally will sympathize with the young aviators whose second adventure at Petawawa has ended so disastrously.

Then speed and flight have to be regulated by the power, and an engine that can produce the necessary motion to lift the machine and propel it must be somewhat heavy.

That they may surmount all difficulties is the sincere wish of many admirers. They are giving Canada an

object lesson in aerial navigation of inestimable value, and the regret is that they are doing this at their own expense since rumour has it that they are not given any financial aid or backing by the government.

EDITORIAL NOTES.

The school board of Winnipeg will want \$600,000 this year. This is spending a good deal in the interest of education.

The admiralty and Lord Berosford will do less squabbling in public. The imperial defence committee has censured both for their rank and indecent talk.

The Fort William strikes are a bad thing for business. A visitor to the city says that five large boats have been laid up, and their crews paid off.

The abandonment of the municipal management in street railways, by Detroit, is referred to by the Hamilton Times as the "dawning of reason." Some people will question that.

Some people are anticipating great trouble through tariff discriminations. Why worry until there is occasion for it? The United States cannot play this game alone. Canada has its remedy in a tariff.

Mr. Borden will not be forgiven by some people for acknowledging the superiority of the Ross rifle and declaring that so far as he is concerned the issue is out of politics.

Ottawa will follow Toronto's example and oil the streets in order to keep down the dust. Perhaps Kingston may later on try the oil and find in it that which will make the macadamized roadway much more acceptable.

The Temiskaming railway is a great money maker. Mr. Matheson is so tickled over the matter that one would fancy he was a projector of the enterprise instead of being one of its severest critics.

The indiscriminate use of fire arms can only be prevented by a law preventing the sale of them to any unlicensed persons. This would be hard on the manufacturers, but it would save many a life.

Evelyn Nesbit Thaw has now a receipt of \$450 a month from her husband, and because she missed last month's stipend, Harry having forgotten her in his fight for liberty, she is "in abject poverty." How very distressing!

Saturday Night is amused over the idea of calls to the ministry. Whom does the fun come in? The preachers of the day are not picking out the profession that offers the most money.

The labour department should investigate the Fort William labour troubles. The wage question is not the only one. Some foreign labour is said to have been treated by the contractors with great brutality.

TO DOT ST. LAWRENCE.

Project Before Business Men To Develop Rapids. Brockville, Ont., Aug. 14.—Messrs. J. W. Rickey, hydraulic engineer of the Long Sault Development company, and G. T. Stanley, electrical engineer of the St. Lawrence Power company, are in town meeting a number of prominent business men for the purpose of acquainting them with the possibilities of the project to utilize the Long Sault Rapids as a source of hydro-electric power for Eastern Ontario.

To find a market for this enormous power (100,000 horse power) the promoters of this undertaking have negotiations well under way towards inducing large manufacturing industries to locate along the river St. Lawrence between Cornwall and Kingston.

The Elect Estate.

Stratford Beacon. The statement is made by an exchange, on apparently good authority, that no newspaper proprietor, editor, publisher, manager or printer is now or ever has been a resident in Kingston penitentiary, or in the Central prison, Toronto. Not a bad record for the great Fourth Estate.

A Diplomatic Race.

Washington, Aug. 16.—A diplomatic race between Spain and the Argentine Republic is arousing considerable interest in official circles here. Both countries are anxious to raise their representatives here to the rank of ambassador and both have taken tentative steps looking to the consummation of this desire.

G. T. R. Traffic Earnings.

The Grand Trunk railway system's traffic earnings from August 1st to 7th were \$832,475, as compared to \$794,562 in the corresponding period of last year, an increase of \$37,913.

James Taylor, Rose Hill, died of heart failure, on Wednesday. He was 75 miles and about sixty years of age.

PRINCESS' LIFE ACCORDS WITH HER CHILDISH DREAMS

THE PRINCESS ROYAL (DUCHESS OF FIFE) AND THE PRINCESSES MAUD AND ALEXANDRA

Among royal mothers and daughters very special interest attaches to the Princess Royal of England, and her daughters. Her royal highness is one of the few ladies belonging by birth to the highest caste who have led a life in strict accordance with their childish dreams.

A BRAVE RESCUE

GIRL OF ELEVEN SAVES SISTER FROM DROWNING.

Daughter of Mr. Felton of the St. Lawrence News Gets Into Deep Hole Near Iroquois Point and is Pulled to Land With Difficulty.

Morrisburg, Ont., Aug. 16.—While some little girls were bathing in the St. Lawrence river, near Point Iroquois, one of the number, Heryl Pelton, daughter of the editor of the St. Lawrence News, of this place, stepped into a deep hole with a treacherous undercurrent. She was swept off her feet in a moment and was being carried out into the main current when her young sister, Norma, only eleven years of age, standing on the bank, saw her danger.

Had the younger sister hesitated a moment or lost her presence of mind the elder sister would have been drowned as the current is very swift at this point.

AT NATIONAL EXHIBITION.

It is the Biggest of Its Kind in World. School children's exhibits will be a feature of the Canadian National Exhibition, Toronto. For two years the schools of Toronto have had this department almost to themselves, but it is now extended to the other cities and towns in Ontario.

The Canadian National Exhibition, Toronto, is the biggest thing of its kind in the world. Its grounds extend for a mile and a half. Its biggest building covers two acres. Its grand stand can seat the population of a city of 16,000 people.

Eight hundred of the best bred dogs makes the bench show at the exhibition at Toronto. The education department is taking an active interest and the exhibition August 28th to September 13th promises to be the greatest in that class of work ever seen anywhere.

The submarine mine which flourishes in naval warfare will be part of the military display at the Toronto exhibition. These hidden guardians will be laid in the lake in front of the grounds and every day at five o'clock a ship will be blown up.

The department of agriculture is putting on a display of wholesome and diseased meats at the Toronto exhibition, and two lecturers will tell the people how to discern the good from the diseased.

Made A Good Strike.

Westport Mirror. J. M. Stoness, ex-warden of Frontenac, who has been up at Bob's Lake mines with a prospecting party, has struck rich in a new show. Over \$500 worth of fine amber mica is being taken over per day. One crystal weighed 2,300 pounds and another 1,100 pounds.

THE WHIG'S FASHION HINT.

The Season's Best Productions. POINTERS. We mean exactly what we say about our Clothes. They are the best examples of high class tailoring ever offered ready for your service.
