

Sales Doubling Every Six Months

Wonderful Demand for a Wonderful Remedy.

During the past few years, the sales of "Fruit-a-lives" have doubled every six months. For the six months from January to July of this year, the sales of this popular medicine were more than twice greater than for any similar period since "Fruit-a-lives" was introduced to the public.

The National Drug & Chemical Company of Canada Limited, the largest wholesale drug house in the world—Lyman Brothers of Montreal—arriving "Fruit-a-lives" in two gross lots, 100 gross mean 14,400 boxes, which retail for \$7,200.00. This gives some idea of the steady demand for these wonderful fruit liver tablets.

It is safe to say that "Fruit-a-lives" is on sale in every drug store and in departmental stores and general stores carrying medicines throughout the Dominion. Nor is the sale of "Fruit-a-lives" confined to Canada. In many parts of the United States, "Fruit-a-lives" is the standard family medicine and hardly a day passes that the "Fruit-a-lives" Company does not receive prepaid orders from our neighbors over the line.

The many testimonials, which have been published in the leading papers, are the most convincing evidence of the great value of "Fruit-a-lives."

The Aurophone

A WONDERFUL LITTLE ELECTRICAL INSTRUMENT IN AID OF THE DEAF

Except in cases where the Auditory nerve is paralyzed, all degrees of deafness, from the mildest to the most severe, have been successfully met by the "AUROPHONE," and hearing restored. Tone and articulation are true and clear; the voice of the speaker sounds perfectly natural; the sweet strains of music may be heard in a natural manner and enjoyed to the fullest extent.

The "AUROPHONE" consists of:

1st. A Sound Transmitter (or artificial ear), which can be worn pinned to the front of coat or dress, or covered by the coat, so as to be carried completely out of sight. It is a flat disk 2 1/2 ins. in diameter.

2nd. A Receiver (or ear piece) which can be held firmly to the ear by means of a light headband, or a telescopic handle, or may be concealed in the hollow of the hand.

3rd. A Small Battery, which may be carried in one's pocket without bulk or weight. The three are electrically connected by an adjustable cord, so that the sound waves, striking the transmitter, are conducted in a magnified form to the ear-piece.

If you are hard of hearing give the "AUROPHONE" a trial; it's your privilege. See it when in Toronto, a special demonstration will be given you by an expert, free of charge. Further—take the instrument on a month's trial; if not fully satisfied, the money returned your money.

The new model is now ready. (Optical Parlors) Second Floor, Yonge Street.

Among the girls Sarah Meeker proved the best speller, Laura Young the clearest reader and Jessie Brown the lightest of foot. Of the boys, Gerald Young spelled best, while Charles Spencer won the prize for reading and running.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. It is now known that many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by E. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful, it acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials.

Address: E. J. CHENEY & CO., 2635 E. Ohio St., Toledo, Ohio. Sold by druggists. Take Hall's Family Pills for constipation.

PROGRESS ON THE RHINE.

Gas Power For Navigation is Coming Thing. In view of the possibility that large ships may some day be propelled by gas power, an experiment now in progress on the Rhine is worthy of note.

A boat which is employed to tow bigger vessels up and down that river has been provided with two internal combustion engines, each of 200 horse power. They are operated by means of gas manufactured from brown coal, or lignite, and that material is supplied in the form of briquettes, made by adding some glutinous substance like tar to the pulverized coal and moulding it in blocks of a convenient size.

According to a correspondent of the London Times, the briquettes are delivered on the boat for nine English shillings (about \$2.25) a ton. It is estimated that the cost of briquettes enough to drive a boat of 300 horse-power would be slightly more than fifty cents an hour.

Lignite is inferior in heating qualities to bituminous coal and anthracite, and does not command a ready sale in those parts of the world where it is abundant. The use of it on the Rhine, however, seems to point to a new sphere of usefulness, for, apparently, no difficulty has been experienced in purifying the gas made from it so that the cylinders of the engine will not clog.

In this respect it is superior to bituminous coal, which still presents embarrassments to those who would like to use it for the manufacture of "producer" gas.

Obviously, if it is serviceable in the development of power on the water, it is equally well suited to the work on land. Hence the trial now being given to it on the Rhine deserves watching.

One of the most important advantages which would attend the use of gas power in navigation is that it would leave the air uncontaminated by smoke. The towboat which has begun running on the Rhine is provided with a device to carry off the water gases from the engine, but not a particle of smoke is emitted.

They Rely On Wade's Ointment.

Wade's Ointment is depended upon in hundreds of homes for the cure of all injuries to the skin, as well as of the various skin diseases. There is not a family that would not find this ointment invaluable. Cures eczema, salt rheum, scaly or itching eruptions of the skin, pimples, blotches, dandruff, etc. in big boxes, 25c. at J. B. McLeod's Drug Store, corner King and Brock streets (Wade's old stand), and corner Princess and Montreal streets.

Gist Of The Appeal.

The question between an appeal and the other in the old land, as far as the people are concerned, amounts somewhat to whether they are more likely to listen to: "A poor earl who can only afford fifty servants or so, and only three, or four palaces" or to "Pray let everybody tax the bread he eats and everything he wears and uses, so that we struggling merchant princes and captains of industry and manipulators of capital may escape a little income tax." How will such appeals as these be likely to affect the tolling and moaning population?

Strikes Deadening Effects.

Springhill is reported to have become a dead town since the strike. This can be understood. The average family's weekly revenue has been cut down from some \$18 or \$20 earned, to between \$3 and \$6 doled out by the C.M.W. organization. The business men and citizens, as well as the miners, will pay a high price for whatever it is the big strike makers think is in issue in the struggle.

Great Clearing Sale.

Prevost, Brock street, has made a great reduction in prices in the order and ready-made clothing department. Also in the gent's furnishings to make room for his fall and winter importations.

The Thrifty Chinese.

Never figure a Chinaman for being asleep or think that his eyes do not dart toward the main chance. The French in Canton China poured oil on the waters to heat the mosquitoes, and the natives skinned it off to burn.

A woman who is weak, nervous and sleepless, and who has cold hands and feet, cannot feel and act like a well person. Carter's Little Liver Pills equalize the circulation, remove nervousness, and give strength and rest. King Edward has returned from Marienbad greatly benefited by the cure, which he has followed since with strict attention.
