Here is a New Kind of Soap

You are now using some soap and naturally think it is good. But here is a kind that is different from any you know—one that has taken us 43 years to perfect.

Try one cake and compare it with what you now use. We welcome such a test as this for we know in advance the result. You will never go back to the other kind. Here is a soap made from vegetable oil pure enough to use on your table.

Cocoa nut oil from the isle of Ceylon is brought over 12,000 miles and mixed with the olive oil. Then both are boiled doubly long.

After this we mill them by our own special process. We have secured the best factories of England, France and Austria for almost half a century to perfect this process.

When milled, the soap falls like flakes of snow into enormous bins and is then crushed under a weight of 30 tons to press out the moisture.

After being dried eight times it is pressed into cakes and is simply perfect soap. It lathers into a rich creamy foam and wears as thin as a wafer.

The perfume is dainty and pure—it suggests only the delicate scent of the roses. Use one cake today and see what a wonderful difference there can be in soap.
