A LINER LOST

A Serious Disaster on Upper Lakes.

SPORT FOR WAVES

LIFEBOAT CAPSIZES WHEN BRAVING STORM.

Flames Add to Terror—When Storm Rages Fire Breaks Out in Pilot House of Stranded Vessel—Blaze Subdued by the Waves.

Detroit, Mich., Oct. 15.—In the wreck of the steamer George Stone, of Cleveland, O., on Point Pelee, Ont., on Wednesday, Upper Lake Erie, added a gruesome chapter to the history of marine disasters on the great lakes.

Six lives were lost and twelve were saved and the tail end of the wreck vessel that was not injured and belonged to M. A. Bradley, of Cleveland.

The six victims lost their lives when Capt. Paul Howell and Peter Daley, Erie, Pa., who was a passenger and friend of the captain, and six members of the crew were captured in the surf attempting to go ashore for assistance.

Two of the crew clinging to the overturned boat four hours until they drifted ashore, six were drowned when the lifeboat capsized and the remaining ten members of the crew were taken off the wreck about noon by the steamer F. M. Osborne, of Cleveland, and brought to Detroit late today.

One of the ten brought to Detroit, John Diehrle, was knocked into the Detroit river by a crowd of strikers on the docks and narrowly escaped drowning.

The wooden steamer George Stone, 270 feet long and forty feet beam, built in 1893 and having a gross tonnage of 1,841, left Ashtabula, O., Monday, at 3:30 p.m., with a load of coal for Racine, Wis. She began to feel the effect of the south-west gale about 6:30 o'clock, Monday evening and at midnight she began a desperate battle for life.

All day, Tuesday, she fought valiantly but towards evening it became apparent that the pumps were unequal to the task of removing the water that poured into the hold through the seams opened by the buffeting of the waves. About 2:30 a.m., Wednesday, the Stone struck with terrific force upon the sand bar, known as Grubbs' Reef, nearly five miles off the western shore of Point Pelee.

Until daybreak the shipwrecked crew remained in the forward cabins and pilothouse. The one man was sent aloft with a bed sheet which he waved from the forward mast. But though three or four steamers came within sight none responded and it was decided that help must be summoned from the shore. The vessel was now beginning to break up forward.

Five added to the dangers of the situation. The pilothouse burned to the deck before the blaze was subdued by the waves and spray. It is thought that one of the many lamps that were kept lighted in the pilothouse during the night to warn the drenched and shivering men, was overturned by the pounding of the boat on the reef.

Toward nine o'clock, Wednesday, the danger of the vessel being broken to pieces became acute and Capt. Howell picked his crew for an attempt to reach shore in one of the small boats. The wooden boat was tried first, but when the attempt was being made to launch her the sea drove her against the steamer's side and broke a great hole in her side. Then was launched

the steel lifeboat having air compartments at each end. In this boat the captain and his seven companions pulled away from the wreck.

The steamer little craft fought her way toward shore, but when almost outside the zone of danger a mountain comber capsized her and left her eight passengers struggling in the icy breakers. Second Mate Hindle and Wheelman Conner were the only ones who managed to gain a hold on the lifeboat and they clung to it until driven ashore by the storm.

Capt. Grubb, of the Point Pelee lighthouse took Hindle and Conner to his home, where they quickly recovered from the effects of their four hours' exposure. The bodies of Peter Daley, Cook Lucas and Oiler Boyce were recovered from the breakers by Capt. Grubb.

Meanwhile the ten members of the crew who were left on board the wrecked vessel knew nothing of the fate of their companions. About eleven o'clock the upbound steamer F. M. Osborne, of Cleveland, responded to their signal of distress.

S.S. Athabasca Aground.

Owen Sound, Ont., Oct. 15.—This city was startled by the receipt of a message to the effect that the fine big Canadian Pacific steamer, Athabasca had run aground in a terrible sea. The vessel struck on Flower Pot Island, at the north end of the Bruce peninsula. In the vicinity there is about seventy-five fathoms of water. The boat grounded Wednesday night during a blinding snow storm and is reported to be in a serious condition.

The Athabasca's bow is high on a flat rock, and the main part of the ship is about an inch or fifteen fathoms in the water. There is four feet of water in her hold.

The Athabasca is one of the "finest passenger and freight carrying vessels on the great lakes. She is 270 feet long and was built on the Clyde, Scotland, and brought to this country in 1888, together with steamers Alberta and Algoma, the latter of which was wrecked the following year with great loss of life. She is in command of Captain Alex. Brown, considered one of the most capable captains on the lakes.

SCORES THE WOMEN.

Where a Woman Stands Accused of Graft.

Chicago, Oct. 15.—In his church in Maywood Rev. Percival H. Baker said in the course of a sermon: "The woman who orders a garment on approval to wear at a fashionable function and then returns it as 'unsuitable' is as truly a grafter as the politician who accepts money from the underworld. How can we hope to maintain a sensitive conscience if our women share the taint of graft? Such a woman would cheat in a game of solitaire."

Mr. Barker has sent out letters to twenty Christian young men in the suburb requesting them to reply to the questions: "What are some of the essential elements in your ideal of true womanhood? What do you consider some of the most common faults in the young women you have met?"

Among the faults mentioned was that women pay too much attention to dresses, thus neglecting inner adornment. The preacher admitted every woman should be dressed neatly, modestly, every garment matching her purse, position, and that she should maintain a modesty in dress that was becoming.

"Too frequently do we find the \$10 hat on the 10c. head," he said.

Must Leave the Country.

Lockport, N.Y., Oct. 15.—Abram Shook, a Russian, indicted in connection with the white slave traffic in Buffalo, was sentenced by Judge Hazel in the United States court to be deported. Fannie Bernstein, a witness, who Shook was said to have brought to this country for immoral purposes, was also ordered deported.

TURNED BURGLAR

TO GAIN POSSESSION OF BLACK PEARL ROSARY.

Had Seen it in House Next Her Own—Climbed From Window of Her Room to Roof, Then to Window of Room Where Jewels Were—Accused of Larceny.

Trenton, N.J., Oct. 15.—Fourteen-year-old Elizabeth Seabright, who risked her life to gain possession of a black pearl rosary, was held in \$100 bail to answer to the charge of grand larceny before the Mercer county grand jury.

The exploit was carried out in the true burglar style. The girl desired the rosary, which she had seen in the house next to her own. No thought of the tenth commandment entered her mind. It was easy to step from the second-story window of her bedroom to the roof common to the additions of both houses.

Once on the roof, she stealthily crossed it and proed open the window of the neighbor. In that room was the coveted rosary. Its black pearls beckoned her. She went into the room occupied by an aged person and took the emblem of religion. The prayers which had been said over the beads did not stop her. She quietly made her way back to her own room, but was seen, and those eyes were the means of her undoing.

The matter was reported to the police, and the girl was arrested with the rosary under her pillow.

IS FRAME-UP

This is What is Considered in Pittsburg.

ARE AFTER BIG MONEY

THAT WILL COME IN THROUGH THE GATE.

The Way the Game Went on Thursday Afternoon—The Teams Are Now Even and the Final in Detroit on Saturday Will Be a Hummer.

Pittsburg, Pa., Oct. 15.—That the world's championship series in which the Pittsburg and Detroit clubs have the same standing, is being manipulated from a box office standpoint, rather than on the principle that the best club shall win, is a charge which has been very actively circulated here.

One of the best known sporting authorities in Pittsburg, a man whose judgment is highly valued because of his experience and conservative standing, placed the rumors in concrete form, saying:

"I am absolutely satisfied that the Pittsburg-Detroit games are being played for the box office instead of trying to honestly have determined which is the best club. Until last Saturday I have always discredited rumors of crookedness in connection with the National League. However, I have not met anyone who can explain why Camnitz was sent to the slab."

"That Camnitz was not physically fit for duty no one understood better than the officials of the Pittsburg Baseball Club. He had recently undergone an operation that resulted in greatly reducing his weight and vitality. Not only was he permitted to enter the box, but he was kept there after his work disclosed the fact that he could not make good. This piece of generalship gave each club a victory."

"Pittsburg won yesterday, so I believe was put in. He has been out of condition for weeks and could be depended upon to maintain the box office equity. To-day Jennings puts in Summers, who is in no shape to pitch."

"The general public here does not share this disgruntled gambler's view."

Detroit Won Yesterday.

Detroit, Oct. 15.—Detroit won the sixth game of the world's baseball championship series, here, yesterday afternoon, by the close score of 5 to 4, and now the two teams are again tied with the seventh deciding game to be played here on Saturday.

Yesterday's game was in doubt till the last, as Pittsburg almost evened the score in the last innings. Mullin pitched a perfect game for Detroit. He was hit in the first for four safeties, but allowed only two in the next seven innings. T. Jones, Detroit's first baseman, was injured in the ninth in a collision with Wilson. Cobb and Wagner each made one hit, and Cobb was fanned in the first innings. The summary:

Pittsburg	3 0 0 0 0 0 0 1 4 3
Detroit	1 0 0 2 1 1 0 0 3 1 0

VICTIM OF AN INTRIGUE.

Will Carry His Case to the President.

Washington, D.C., Oct. 15.—Charles R. Crane, minister designate to China, who has been invited to resign by the secretary of state for an alleged injudicious interview on Chinese matters, has put the matter before President Taft. He intimates that the state department neglected to give him instructions and that he acted on Taft's advice to "give it to them hot."

Artificially Colored and Sold in Chicago.

Chicago, Oct. 15.—The State Food Commission, yesterday, started a crusade against dealers deceiving the public with artificially colored and smoked fish, hams, bacon, sausages, etc.

The investigators had their attention attracted through the cheap prices at which smoked salmon was offered. They found that most of it was carp, given a bath of pink paint and then subjected to treatment in "liquid smoke." The ingredients of these are not classed as deadly poison, but are recognized as having "accumulative effect," that is, constant consumption will produce death.

"Manufactured" fish may be said if it bears tags showing it to be bogus, and there must be displayed signs on the walls saying that goods of that kind are handled.

A \$3.00 Fountain Pen Free.

To the person who can estimate the total retail value of the Waterman fountain pens in Best's window. No conditions are attached, every person has a chance to secure a good pen without any cost.

Mrs. Sarah E. McAllister, widow of Ward McAllister, famous in his day as a leader of New York society, died Thursday in her eightieth year.

THE NEW ZION.

Government Makes New Colonization Offer.

IS HALF DONE

The Panama Canal Being Hustled Ahead.

MEN IN GOOD HEALTH

EXERTION PUSHED TO LIMIT DURING SEPTEMBER.

Up to October 1st, 87,000,000 Cubic Yards of Earth Had Been Removed and 87,000,000 Yards Remain to Be Taken Out—Large Force of Employees.

Washington, Oct. 15.—Half of the task of digging the Panama canal is over.

Colonel Goethals and the men under him on the Isthmus put exertion to the limit during the month of September, according to reports received at the Isthmian Canal Commission, and succeeded in crossing the half-way line. When the excavation records were tallied, today, it was found that 87,000,000 cubic yards of earth had been removed from the canal prism, leaving 87,000,000 yards still to be excavated. These figures do not include the excavation by the French companies done before the United States took hold of the project.

In the half of the work yet to be done, the going will be less difficult as the force of men is experienced, the equipment is on hand and the organization is perfected. It will, however, be more complex. The canal building is no longer a mere matter of taking out hundreds of thousands of cubic yards of earth every day. While some of the men are cutting the gash in Culebra, others are building dams and still others have begun the preliminary work of building the big locks. The machinery for this latter phase of the work is installed before another month or so three branches of canal work will be at the zenith of activity.

The force now employed on the canal is the largest since the work began. The canal commission, railroad and commissary employ 33,901. Of these 26,519 are digging the canal or looking after those who are digging the canal.

Despite this increase in the force of workmen, the general death rate in the canal zone is now only 16.20 per thousand, compared with 51.05 per thousand in 1905. The death rate among employees was the lowest ever recorded, 10.28 per thousand. These figures compare well with those of the states. The typhoid fever rate is less than one-half that of Pennsylvania and probably less than it is for the entire United States.

PITH OF THE NEWS.

The Very Latest Culled From All Over the World.

Business is practically at a standstill in Rome, while the people protest against the execution of Ferrer. Lorenzo Prince, librarian of Montreal city library, has resigned and will become managing editor of La Presse. He was formerly a journalist.

Sir Frederick Borden took the stand in the Carruthers trial, at Kenilworth, N.S., on Thursday, and denied absolutely the allegations of Mrs. Allison. Robert Kinnawin got a verdict for \$5,500 against William Corbett for alienation of his wife's affections, and \$500 for assault at the Orangeville assizes.

The bill for the appointment of a high commissioner in London, passed both houses in Melbourne, on Thursday. The bill was read a second time in the House of Representatives. The C.P.R. steamer Empress of Ireland struck a submerged wreck between Cape Chatte and Matane, and had a hole punched in her bow. She proceeded to Quebec under her own steam.

The charge of jury against Robert H. Sheppard, arising out of the West Peterboro election trial, was dismissed, Thursday, at Peterboro. Mr. Sheppard threatens suit against a number of leading conservatives.

VALUE OF LONDON'S SITE.

Land is Worth Three Thousand Million Dollars.

London, Oct. 15.—The London county council has spent a decade in preparing a ground plan of London, showing the owners of the land. This is nearly completed. It shows that 31,600 landholders own land covering 113 square miles, these being mostly single house owners. Sixty square miles are owned by 187 persons, organizations and corporations. One third of this area belongs to the crown, the ecclesiastical commissioners, the county council and the city corporation. It is estimated that the present value of the land on which London is built is \$3,000,000,000, which will be increased to \$3,175,000,000 by 1930.

SLEEPS IN FRESH CEMENT.

Finds Himself Stuck Fast When He Wakes.

Cashton, Wis., Oct. 15.—After accumulating a great, large, sleepy "jag," Harvey Jones, of Westley, who visited this town last night, found that it was bigger than he could conveniently propel, so he flopped down on one of the newly laid cement walks and went to sleep. This morning he awoke but failed to get up. The town marshal tried to take him to the village lockup but failed. Finally his clothes were cut from him and he was able once more to stand. The last that was seen of him he was headed due south in a kerosene barrel.

"YOU'RE A HAWK"

"And I Am Going to Bring You Down."

Cuba, N.Y., Oct. 15.—While the two sons of A. J. Conneliman, of Clarksville, were playing in a barn, Irving, twelve years old, was accidentally shot by John, his younger brother, aged eleven.

The father had been shooting at a hawk and had left the shotgun loaded. While the older boy was climbing a rope, the younger shouted to him, "You're a hawk; I'm going to bring you down." The other replied: "Go ahead," and, not knowing the gun was loaded, the young lad aimed and pulled the trigger.

The charge entered the boy's arm and struck, tearing the muscles to shreds. Drs. Congdon and Leuder, of Cuba, were summoned. The boy died a few hours later.

FLOODED WITH ORDERS.

Tells the Time By Touch of Fingers.

Geneva, Oct. 15.—A Swiss watchmaker, of Neuchâtel, who recently invented a watch for the blind, is having a large place in the market before he was inundated with orders.

The watch has no glass and its face is of enamel. The hands are invisible, and are placed inside the case. The figures of the watch work automatically, appearing a little above the enamel face. A blind person can, with a touch of his fingers, tell the time in an instant. The watch costs from \$4 upward. Switzerland, France and Germany have so far been the chief customers.

To Oppose Oriental Labor.

Ottawa, Oct. 15.—Members of the St. George's and Sons of England societies of Kingston will be asked to co-operate with the committee in sending a strong resolution to the Dominion government objecting to oriental labor being employed in connection with the G.T.P. construction on the grounds that there are 50,000 people in England who would gladly work at this if they were given the opportunity. At a meeting of St. George's society, held here lately, this was discussed and on motion of Major C. F. Winter, seconded by Ex-Ald. S. Davis, a resolution was passed suggesting co-operation with other societies, including the Royal St. George's society, of London.
