Boys' Department Y.M.C.A.

The annual report for Canada of the boys' department, has just been issued from the international headquarters of the Y.M.C.A. Toronto Central, with its exceptional advantages, ranks first. Hamilton is second, closely followed by West End, Toronto. Ottawa is fourth and Montreal fifth. These associations all have large staffs to undertake the work. Kingston is sixth, boasting out such places as Peterborough, London, St. Catharines, Brantford, Woodstock and a number of other cities where conditions are thought to be more advantageous for boys' work. The local association is proud of its record. Last year it was seventh, and it may be that next year it will do better. Kingston now ranks amongst the leaders in its entire work.

SEEKS POSTPONEMENT OF THE SECOND TRIAL OF WALTER BLYTHE.

Mrs. Mary Eaton's Attempt to Suicide Successful—Man Killed at Elk Lake By a Mining Blast.

Toronto, Oct. 16.—An order for an application for postponement of the trial of Walter Blythe, awaiting a second trial for the murder of his wife, was served upon Hon. J. J. Fox, the attorney-general, by T. C. Robinette, K.C., counsel for the prisoner, this morning. The document notified the minister that the application will be made at the forthcoming session of the high court.

Mrs. Mary Eaton died at the general hospital at five o'clock, this morning, from the effects of the dose of arsenic acid she swallowed, Thursday night. The despatch states that the fatality occurred through the premature explosion of blasting powder, but no further details are given.

HARRY HERMSEJER.

NEGRESS BECOMES WHITE.

Strange Metamorphosis Rouses Interest.
Anaconda, Mont., Oct. 16.—A curious case diagnosed as vitiligo came to light in this city which has caused a great sensation here, particularly among the colored colony. Mrs. David Strader, colored, of Martinsdale, Mont., came here on a visit to friends, and she has changed from a woman of a rich chocolate brown to one of pure white, excepting only rings about her eyes and a small patch on her chin, which still retain the original color.

Mrs. Strader is thirty-seven years of age and the change first manifested itself in a small white spot on her hand, which has spread until now she says that almost her entire body is pure white and the blue blood shows through the cuticle. She has suffered no pain or inconvenience from it, except from a slight itching around the edges of the spots when the change is taking place.

A VERY SMALL LEAKAGE.

Shown By the Second Test of the Gas Tank.

A second twenty-four-hour test of the gas tank was made by City Engineer Craig, beginning Friday morning, and the result was again decidedly satisfactory. The tank leaked only at the rate of ten gallons an hour, which includes evaporation. The contract specifications permit of a leakage of fifteen gallons an hour, so that Constables Merrill and Allen again give proof that the work they did in repairing the leaky tank is successful.

When they took over the tank for repairs, it leaked from eight to twelve inches a day. Now the leakage is only one-eighth of an inch in a day.

Further tests have to be made during the next six months, to prove the tightness of the tank before the contractors get all their money, which is paid to them in portions after each test. So far only \$700 has been paid out of the contract figure of \$4,300. The contractors will be out of pocket on the job, but will have a big advertisement for good work.

The Boston expert figured that it would cost the city \$6,400 to repair the tank, whereas Messrs. Merrill and Allen have done the work for \$4,300; a pretty low and risky figure, but the two young men wished to experiment and show what they could do.
