is applied. With patient treatment it is only a matter of time until the sores are healed and new, smooth, natural skin formed. Success in the cure of this worst form of itching, skin disease has made Dr. A. W. Chase's Ointment known and recognized throughout the world as the standard ointment. It is wonderfully soothing and healing and you can depend on it absolutely to bring relief quickly from itching and irritation and to thoroughly heal the skin. Dr. A. W. Chase's Ointment, 60 cts. a box, at all dealers or Edmundson, Bates & Co., Toronto. Write for free copy of Dr. Chase's Recipe.

## Tips For The Farmers

BY UNCLE JOSH.

It is of importance to recognize the fact that colts of to-day are possessed of their family characteristics. A colt is a colt, but must be regarded as something more with it and the secret of success is in knowing something of these individual traits that are the peculiar heritage of certain families. It is obvious that the high-bred colt which represents the crossing and inter-crossing of a dozen strains of standard breeding blood and built a dozen times has "bite," "bite" undergoes the maddening influence incident to having taken a late record, must somehow need a different sort of treatment than does the colt which is but one or two removes from the cold blood of an untraced pedigree.

Colts display their marked individuality in many ways, by the virulence of their reaction and the relative quickness of their perceptions. Some horses are horn fighters and will battle with out ceasing. It is almost impossible to conquer them by any demonstration of force. The "braccio" which backed the first time the saddle which cinched on him will be apt to balk when you mount him to-morrow morning. Some horses are never conquered except in the most passive sense. Some colts are very stupid and slow to learn. The impressions carry to their brain by a labored and circuitous route. But once taught, they never forget. Horses acquire these first lessons are the most important of all, for a colt is going to be determined as to all of his future career by the things he learns in the first essays of contact with man.

Possibly one word contains the whole key to handling a patient. That word is "patience." Patience includes many other virtues, such as kindness and gentleness and balance and equanimity. The man who loses his temper, the man whose vexation of spirit voices itself in loud and violent language, the man whose outbursts of anger take the medium of expressions and rebuffs, these have no right to come into contact with colts at any time. Instead thereof it is the man of placid and equable temperament who will have the great success with the equine babies. Those who remain unruffled amid all surroundings, who never lose their presence of mind no matter what the occasion may be, who combine with an inflexible firmness the utmost gentleness of manner and mildness of voice and deliberation of action—these are the men who will inspire confidence in the colt, and who can gain their cooperation and their best efforts willingly and without a struggle. The battle for supremacy between colt and trainer is unnecessary and full of untoward possibilities.

Nearly two hundred girls in the high schools of Kansas City have never seen a live hog, says Youth's Companion. This interesting fact was disclosed as the result of a recent canvass of the schools, following the discovery that a girl who saw a hog for the first time this summer was astonished to find that it had hair. One may smile at this condition of ignorance, but it should not last long, for it calls attention to a serious evil of the time. The cities are growing rapidly and their interests are so absorbing that the town dwellers are in danger of losing all knowledge of the country, and the

The two principal peaks of Mount Gurugu were occupied by the Spanish troops on September 29th. Not even the capture of Zetuan, the enemy's capital, evoked a tithe of the enthusiasm aroused by this news. With the hoisting of the Spanish flag on Gurugu, Mellilla has been finally delivered from the menace of four centuries, and the principal object of the campaign has been attained. The slings used against the Rifins by Spanish troops at Mellilla were described, when they were first mentioned in the press, recently, as new weapons of destruction. Obviously, they are merely a modern form of one of the most primitive of arms, though explosive grenades have taken the place of the stones of David and those who went before him. Forty men of the Chichena Battalion were chosen to wield the slings, and owed their novel position to the fact that they came either from the Ronda mountain region or from among the hill dwellers of Toledo and Estremadura—that is to say, from districts whose people are accustomed to the use of the slings. Speaking of ginger beer and curaçao bottles into bombs, and it is also significant of their wily tactics that they are in the habit of dressing dogs in Moorish costume. These crawl along the open in front of the Spanish lines, and, being mistaken for Moors, draw the fire of the Spaniards and thus waste useful ammunition.

manner of life of its people, with consequent loss of sympathy with them. Some wise city parents have experimented in exchanging children for a short time with friends in the country. The country boys and girls learn something of town ways, and the town children have an experience of the rural life of the country, with advantage to all concerned.

It is always the best soil that is carried off by water on exposed hill-sides. The cream is lost while the milk is left. Terracing, deep plowing and other such means help to prevent washing, but the most efficient means is a growing crop on the land all the time. In winter, when washing is greatest, a growing crop should completely cover the ground. Some lands lose more plant food by washing than is taken off by the crops.

A correspondent of Rural New York says he has fed shredded corn fodder for ten years and considers it equal to about sixty per cent. of the value of good hay. The minister of agriculture for Alberta, says one-tenth of the fall wheat raised in that province this year will be required for seed next fall.

A man of Newbury township, Pa., recently lost two ewes, and a month later saw two just like them in a pen at the home of another farmer, some distance away. The next day he was surprised to see the two ewes back in his yard and allowed them to run with his flock. He was later arrested and charged with theft but the magistrate thought that the ewes had established their ownership by the fact that they had travelled a distance of a mile and a half to get back to their flock.

Miss Minnie Clark, of England, has worked a 300-acre farm for three years in the Canadian west, and while over in England last week told the National Union of Women Workers at Portsmouth that at the end of the fourth season she made 100 per cent. profit. She is agitating for the extension of free grant lands in the west for spinners.

A motor parade was one of the features of a recent county fair in Kansas. Only automobiles owned by farmers were allowed in the parade and there were more than 100 cars in line.

The benefits of rotation cannot all be gained in a few years, but the turning under of sod or the roots of leguminous plants will be a constant method of improving soil conditions. The Irish Homestead says the spores of potatoes blight are supposed to be carried over from one season to the other in the tops. As a means of prevention the Homestead recommends burning the tops in fall.

When machines that are not to be used for some time are being stored they should be thoroughly cleaned and oiled, and if necessary painted. A good coat of paint will go a long way in preserving the condition of any implement.

To some city dwellers the farm is the final haven to which they aspire. To own a small farm of their life is the one dream of their life. And yet, some farmers don't appreciate the boon when they have it in their hands. There is as large a proportion of "boarders" in the average flock of hens as in the average herd of dairy cows. Some will not lay over seventy eggs in a year, while others will go over 200. The only way to weed out the unprofitable ones is to keep a check on production.

increased till they are getting all they will see that you do not keep any old hens over the winter just for layers. If a sufficient number of pullets have not been raised better sell the old hens and buy pullets. It's the pullets hatched early (and these can be raised only with good winter laying hens) and young hens that lay best in winter.

The United States weather bureau costs \$1,000,000 a year and employs 200 men in different parts of the country, who send various reports to Washington twice each day. The bureau forecasts are now sent to more than 1,000,000 American farmers every day by means of rural delivery.

### Poultry Notes.

A chicken's stomach is not made of iron, and the same diet day after day harms them as much as it does a human.

This is the time of year to begin cutting out the flock. Deadheads are not wanted, neither are fowls with pernicious habits.

The site for the poultry house and yard should be selected with an idea for natural drainage. A knoll or ridge is a preferable location.

Poultry shows in Alberta, says the Homestead, prove that the poultry breeds of the province are making decided improvement.

"Cool ashes thrown about the poultry house are sure death to the small, blood-sucking mites. Use plenty of them and keep on using them."

No better litter can be provided for the poultry house than that furnished by dry leaves, and now is the time to put away a stock for winter use.

Some poultrymen advise camphor gum put in chicken's drinking water once or twice every ten or twelve days as a good preventive against cholera.

Fowls live mostly on grain and seed, but require also some green grass and juicy vegetables, and meat of some kind.

It appears that the apple-eating habit is growing in Germany. Imports of fruit have nearly doubled in two years, yet this country gets but a small share of the increase. The German tariff war stands in the way.

The colonists of French Uganda have sent a petition to the French colonial office, asking that lions be protected, on the ground that these animals alone are capable of protecting the settlers against other animals which destroy their crops.

During last spring over two and one-half million young trees were distributed from dominion government nurseries in the west to be planted on ground belonging to over 2,000 farmers who applied for the stock. Over 2,200 applications for trees for next year's planting have been received.

### Produce and Prices.

Kingston, Nov. 6.—Prices were quoted to the Whig as follows: Fish—Salmon trout, 12c. lb.; skinned dilly herring, 20c. lb.; whitefish, 12c. lb.; pike, 10c. lb.; Chinook salmon, 30c. lb.; kippered herring, Yarmouth blenders, 40c. doz.; perch, 30c. doz.; frogs legs, 40c. lb.; Atlantic salmon, 30c. lb.; salt codfish, 7c. to 15c. lb.; halibut, 20c. lb.; fresh haddock, 10c. lb.; bullheads, 12c. lb.; red herring, 20c. box; mackerel, 15c. lb.; lake herring, 8c. lb.; finnan haddock, 10c. to 12c. lb.; fresh lobsters, 25c. lb.; sea bass, 12c. lb.; pickerel, 12c. lb.; muskell, 15c. lb. ## MOIR'S CHOCOLATES

Suggest a Tele-A-Tete

The young man, who desires a quiet tête-à-tête with a particularly charming person of the opposite sex, should accept this gentle hint and take along a box of Moir's chocolates when he calls. We will wager his lady friend will readily discover a secluded

corner wherein they can exchange confidences and enjoy the incomparable deliciousness of these pure, wholesome bonbons. The only regret that accompanies a box of Moir's Chocolates occurs when the last one has vanished. Every ingredient is the purest and best. Every bonbon the highest quality. Every box spiced with the charm of wide variety.

MOIR'S, Limited, Halifax, N. S.

## THE BEVERAGE FOR ALL WEATHERS.

"Epps's" means Excellence

**EPPS'S COCOA**

A delicious food and drink in one.

Grateful A cup of "Epps's" at breakfast Warms and Sustains Comforting you for hours. As a supper beverage it is perfect.

# Facts For Sick Women

We know of no other medicine which has been so successful in relieving the suffering of women, or secured so many genuine testimonials, as has Lydia E. Pinkham's Vegetable Compound.

In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound. Almost every woman you meet has either been benefited by it, or knows some one who has.

In the Pinkham Laboratory at Lynn, Mass., are files containing over one million one hundred thousand letters from women seeking health, in which many openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound has saved many women from surgical operations.

Lydia E. Pinkham's Vegetable Compound is made exclusively from roots and herbs, and is perfectly harmless.

The reason why it is so successful is because it contains ingredients which act directly upon the female organism, restoring it to healthy and normal activity.

Thousands of unsolicited and genuine testimonials such as the following prove the efficiency of this simple remedy.

Belleriver, Que.—"Without Lydia E. Pinkham's Vegetable Compound I would not be alive. For five months I had painful and irregular periods and inflammation of the uterus. I suffered like a martyr and thought often of death. I consulted two doctors who could do nothing for me. I went to a hospital, and the best doctors said I must submit to an operation, because I had a tumor. I went back home much discouraged. One of my cousins advised me to take your Compound, as it had cured her. I did so and soon commenced to feel better, and my appetite came back with the first bottle. Now I feel no pain and am cured. Your remedy is deserving of praise."—Mrs. Emma Chatelet, Valleyfield, Belleriver, Quebec.

Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

**"CEETEE" UNDERWEAR**

Always Comfortable Always Elastic

"CEETEE" Underclothing delights the most particular—it is made from the finest Australian Merino Wool, thoroughly combed and cleansed. It is SOFT and VELVETY to the skin—no irritating, tickling sensation as with ordinary underwear.

GUARANTEED UNDERWEAR
