Don't Forget

Chase & Sanborn's Seal Brand Coffee

Even an expert won't buy coffee by its looks. He wants to taste it in the cup—because all coffee looks very much alike. If you want a delicious cup of coffee, get a brand that has proved its quality like "SEAL BRAND". The delightful flavor and fragrant aroma of the finest coffee berries are brought direct to your table by means of the sealed cans. The flavor and aroma are sealed in.

Insist on having Chase & Sanborn's Seal Brand Coffee in 1 and 2 pound sealed tins—never sold in bulk.

CHASE & SANBORN, - Montreal.

Had Weak Kidneys For Two Years.

Doctor Failed to Help. Doan's Kidney Pills Cured Him.

Mr. Edmund Assels, New Carlisle, Que., writes: "I feel it my duty to let you know of the great cure I have obtained by using Doan's Kidney Pills. I was troubled with my kidneys for two years. I tried a doctor, but he failed to help me. I read in the B.B.B. Almanac about Doan's Kidney Pills, and began using them, and after the first box began to feel better. I only used four boxes and they completely cured me. I am very thankful to have found so speedy a cure, and would advise everyone suffering from kidney disease to try them."

Perhaps no other organs work harder than the kidneys to preserve the general health of the body and most people are troubled with some kind of kidney complaint, but do not suspect it. It may have been in the system for some time. There may have been backache, swelling of the feet and ankles, distention of the urinary organs, such as brick dust deposit in the urine, highly colored, scanty or cloudy urine, bladder pains, frequent or suppressed urination, burning sensation when urinating, etc. Do not neglect any of these symptoms, for if neglected they will eventually lead to Bright's Disease, Dropsy and Diabetes. Price 50 cents per box, or 3 boxes for \$1.25, at all dealers or The T. Milburn Co., Limited, Toronto. In ordering specify "Doan's."

ORRINE CURES LIQUOR HABIT

CURE EFFECTED OR MONEY REFUNDED.
If you know anyone who ought to be cured of the "Liquor Habit," suggest to them to try the ORRINE treatment. DESTROY THE CAUSE.

You Cannot Cure Dandruff Without Destroying the Cause of It.
Many people wash their scalps Saturday night or Sunday, to try to keep the dandruff down for the week, but on Monday night the scalp has begun to itch, and Tuesday morning will find a good supply of dandruff when the hair is washed. There is but one real scientific way of curing dandruff; and that is to kill the germ that causes it, and falling hair, and finally baldness. There is only one preparation that will destroy the germ, and that is Newbro's Herpicide. It is an entirely new discovery and the only hair preparation that is based on the new scientific principle. In addition Herpicide is a very refreshing hair dressing for regular toilet use.
Sold by leading druggists. Send 10c in stamps for sample to the Herpicide Co., Detroit, Mich. \$1 bottles guaranteed. G. W. Mahood, special agent.

THE LATEST ELECTRIC LOCOMOTIVES

CHASSIS OF ELECTRIC LOCOMOTIVE, NO. 5094, TO BE USED IN THE NEW TUNNELS.

Official test has been made of the electric locomotives to be used in the New York tunnel extension of the Pennsylvania railroad. The test was with a six-car train on a six-mile stretch of electrified track on the old Southern railroad, the Far Rockaway branch of the Long Island's system, beginning at Jamaica.

The outward trip of six miles was made at a speed of sixty-three miles an hour. The return was made at a slower rate. The machine behaved perfectly throughout the test, exhaustive records of which were made by a member of the staff of George Gibbs, chief engineer of the electrical department of the Pennsylvania Railroad company.

In appearance the locomotive is similar to two passenger coaches, with huge driving wheels and rods. On each side of the steel cabins are open windows, while at the ends are oblong windows. The cabins conceal the motors with which the driving rods connect. But a view of the chassis gives an excellent idea of the intricacy of the machinery, which are soon to haul one thousand trains in and out of the New York station every day.

CANADA'S EXPLORER.

J. B. Tyrrell Has Contributed to Information on North.

When it comes to proving or disproving the statements of Dr. F. A. Cook, and Commander Robert Peary, on the North Pole issue, the veracity of the Eskimo will come strongly into play. Such is the opinion of J. B. Tyrrell of Toronto, mining engineer and explorer, who has spent several years investigating the mineral possibilities of the Arctic country. To him and his brother, James H. Tyrrell, of Hamilton, is due the credit of presenting in book form more light on the frozen north than possibly belongs to any other two individuals outside of Cook and Peary, should the latter's stories be verified.

Mr. Tyrrell was asked, some years ago, to take charge of an Arctic expedition, but the project died in appeal to him. Still, he can see no immediate reason why both Dr. Cook's and Commander Peary's stories should not be believed. Both men appeared to have found good ice for travel and the distances they claim to have traversed were not at all prohibitive. He could not see, however, why any country should care to either prove or disprove the statements of either explorer. The scientific results of a rush to the pole never seemed to him to warrant the expense or trouble. Such an expedition as Nansen's, where the time was spent in making scientific observations of the character of the sea, the land and the inhabitants—fish and animals—within the polar zone, always seemed to him exceedingly interesting, but the mere dash to the pole—to be the first to reach a theoretic point on the earth's surface looked to him as though the game was not worth the candle. At the same time, as an example of hardihood and adventurous spirit, he couldn't help but admire the men who had done it.

Mr. Tyrrell has made three notable tours of the extreme northern latitudes. On two occasions he was accompanied by his brother James. Three most entertaining books from the latter's pen relative to these expeditions are now in circulation. On a Government mission, sixteen years ago, they traveled from Edmonton to the Athabasca country, then north eastward to the extreme northeast angle of Hudson Bay and down the shores of the Hudson, late in the fall of 1894. Paterberg camp, reaching Churchill October 16. They were the first white men to traverse that country, between the Mackenzie River and Hudson Bay, and to come down the shores in such craft. At Churchill they were obliged to wait for a few weeks to gain strength and to collect dogs and sleds preparatory to an overland journey to Winnipeg. About the end of November—and of course winter had set in with the thermometer registering about 45 below—they left Churchill and started southward, passing York factory near the mouth of the Nelson, coming up to Oxford House and reaching Winnipeg on the second of January. The trip overland was subject to the ordinary conditions attending such expeditions, sleeping in their overcoats. At that time, it was the largest unexplored area of land in the world. A technical account of their observations was written by J. B. Tyrrell for the Dominion Geological Survey. In 1894 he traveled alone through the Eskimo country west of Hudson Bay on an official geological survey.

Canada has no object, anyway, no matter how other countries may per- spective over it, in trying to prove the exact location or discoverer of the north pole. She already has an enormous Arctic territory undeveloped, and the question is not for the present generation to bother with. The establishing of a claim to the earth's apex does not come within the scope of practical politics at the present time. These were the concluding words of Mr. Tyrrell's interview.

The residence of Hugh Adams, Jr., McDonald's Corners, was destroyed by fire last Friday night. Mr. and Mrs. Adams were awakened by the exploding of twenty-two cartridges, a box of which had been left lying on a shelf. Thomas Osborne, of Southampton, passed away on November 2nd, having reached his eighty-eighth milestone.

A quiet wedding took place in St. Edward's church, Westport, Oct. 20th, when Miss Sarah Ann Ryan was united in marriage to Lawrence A. Gairin, Malloytown.

News has reached Poland of the death of Edward Paul, eldest son of Robert Paul, formerly a resident of Hoods, but who is now settled in the west.

SMART COAT OF WHITE CONEY.

POSED BY MISS WELLINGTON OF THE "LOVE CURE CO." PHOTO BY JUEL PEEPER.

The acme of luxury seems to have been reached in these sumptuous fur evening wraps which will be seen in the opera foyer when the season begins. This coat is of pure white cone pit, with trimmings of white fox—a most expensive fur. With the coat is shown one of the new "dog muffs" which are a fad just now. The muffs has natural looking legs and is carried over one arm like a pet dog.

FATHER 80-MOTHER 76

The aged father and mother of a prominent Boston lawyer safely carried through the last two winters by

Vinol

The son says: "My father and mother owe their present strength and good health to Vinol. During the last two trying winters neither of them had a cold, and were able to walk farther and do more than for years. I think Vinol is perfectly wonderful. It certainly is the greatest blood-making, strengthening tonic for old people I ever heard of."

We want every feeble old person in this town to try Vinol. We will return their money without question if it does not accomplish all we claim for it.

No Soap-Shrunken Flannels

The woolen season is with us again. Every housekeeper knows what's in store for her, if she uses yellow rosin soap for washing. The woollens and flannels shrink and pucker up alarmingly small. Don't let your household suffer this winter from uncomfortable underwear. Try the Taylor way of washing and keep woollens their original size.

Taylor's Borax Soap

washes woollens without shrinking, and brings them out fresh, clean and free from any "soapy smell." It is not necessary to boil the clothes—you don't even have to rub them, except very soiled spots. The borax softens the water, so less soap is required. It purifies and sweetens, and leaves the hands soft and white.
