THE MARKET

The most noteworthy feature of the Cobalt market during the past two weeks has been the unusual falling off of stock transactions caused no doubt by the slump in the market leaders, LaRoc and Crown Royalty. We cut out our usual advertisement last week awaiting a revival of various market factors, and now before that nearly all the stocks on the list, with one or two exceptions, are a purchase investment as a rule have had back, looking for lower prices and a firmer tone to the market. We believe the bottom prices are here, and if you act quickly and buy now you will show a very fair profit on your purchases before the year end. Also those who have stocks purchased at higher prices should double their holdings at the present low level and by so doing reduce their average price. You must be very in mind that although the stock price has fallen, yet the mine is worth just as much as ever.

WE RECOMMEND

We recommend the purchase of LaRoc, Right-of-Way and Trethewey, Otton, Cobalt Lake and Rochester in the low price group. Beaver has shipped a car of high-grade ore and should be picked up at these prices. Holders of Right-of-Way are advised to get in and purchase some of the block of stock that has been thrown on the market. As soon as this is out of the way you will see much better prices. Send us your orders for cash or on margin. Don't delay, but purchase now. There is on the upward climb. We told you to buy it at 20. It is now 26, and going up. Buy it. Write us your order now.

CANADIAN CENTRAL

More good news for shareholders in this company. Two more wells started on the company's oil lands. The Halliday lease will prove of great value. Power hoses and tanks are being rushed up. The company now have 12 wells and they all pump oil, and are the best in the field. Remember this company with all its oil holdings has also some very fine silver properties in the Montreal River district. Work is being pushed as fast as possible on M.R. 2471, and as depth is reached the ore grows richer. The stock is now selling at 90 cents per share. Buy it now. Write us.

THE ZOO LINE

The very thing for the children

CHRISTIE'S NEW SWEET BISCUIT

Children crave for sweet and toothsome things. The Zoo Line, our new sweet biscuit, is meant to meet this craving in a healthy, wholesome way.

The Zoo Line represents the alphabet from A to Z. There is the imprint of a well-known animal on each biscuit as well.

This new line will delight the hearts of children—arouse the activities of budding minds.

These new sweet biscuits embody all the purity and lasting goodness that has made the Christie reputation possible.

The carefulness, cleanliness and science—the things that make for Christie purity and quality—have been specially exercised in the production of this new line.

The Zoo Line is just as representative of the biggest and cleanest biscuit factory in Canada as our famous Zephyr Cream Sodas or any of our 600 varieties.

Delight your children by buying a package of the Christie Zoo Line of sweet biscuits!

Sold by all Grocers

CHRISTIE, BROWN & CO., LIMITED, TORONTO

MEETING OF DAIRYMEN

WAS HELD SATURDAY AT THE DAIRY SCHOOL.

Addresses Were Given By R. G. Murphy, Dr. W. T. Connell and G. G. Publow—Matters of Interest to the Business Deal With.

On Saturday afternoon, a special meeting of the dairymen of Frontenac county was held in the lecture room at the Dairy School. The attendance was very small, and this fact is to be regretted, as at such meetings matters of importance to all farmers in the dairy business are taken up and discussed.

Joseph McGrath, director for the district, occupied the chair, and during the course of the meeting had the honor of being elected director for this district. John K. Ingham, M.P.A., the president of the district, was also present, to deliver an address, but at the last moment he found it impossible to be present, owing to business in the milk commission.

R. G. Murphy, secretary of the district, was present and was called upon. He pointed out that the turning out of milk was just as much a business as the manufacturing of shoes. Business principles must be put into the work, just the same as in any other line of work. Unless you had good business men in the work, it would be a failure. The one point, which he wished to impress upon the farmers, was to make dairying a business. The speaker spoke of the rapid strides made in the work of dairying at Denmark.

The speaker said that the dairymen should take advantage of the co-operating association, if in order to find out what they were doing. They should become thoroughly acquainted with the cows, and get the best possible good out of them. A farmer should not be satisfied in just having his cows as good as a neighbor's. To make the business a success he must also consider the cost just the same as a man would in any other line of business.

Herbert Brentnall, instructor for the Kingston district, was called upon for a report, and in summing up the work for the season, stated that there had been much improvement. Although prices had been low, the season, on the whole, had been quite satisfactory. He had made tests of 100 tons of milk and found fifteen samples tainted, an increase of five over last year. Some of the larger factories were well equipped, but he was not satisfied with the condition in some of the smaller ones. He was pleased to see that silos were being put up on many of the farms; he believed that over-

farmer should have one. He also would recommend the growing of more alfalfa hay. He also urged that there be more co-operation among the factories. He found that some weigh tanks were not kept very clean. Along with this, cleanliness in the milk supply, there was room for improvement.

Dr. W. T. Connell, who kindly offered to give an address, spoke of the pasteurizing of milk, and the benefits derived from it. He pointed out that the pasteurizing of milk destroyed the germs, prevented the milk from being a breeding place for bad flavors, removed the bacteria, and mixed up the small fat left in the whey. In his tests he had found that if the temperature was raised to 152 to 158 degrees, it was high enough. There was no need to go higher. He found that some factories were not getting the best out of the pasteurizing of the whey, owing to the fact that they allowed whey washings to get into the tanks. When a factory man did this he was practically undoing his pasteurizing. However, the speaker pointed out that these things would correct themselves in time. It was his opinion that pasteurizing had come to stay. At some of the factories the sanitary conditions were not of the best; there was a very poor water supply. There was a room also, where a person might slip a hole and get water that the water would be good for tea. This was not true in all cases. The trouble around many wells was that there was not a good drainage. A good water supply was a most important factor. It was found, that many of the tanks came from the well. Some wells were very poorly protected. They were allowed to be open so that dirt could get into them. The mouths of the wells should be protected against surface matter. Another drawback in the making of cheese was that factories stood near a cow yard or a pig pen. This would be sure to give a taint. Such a place would also breed flies and bacteria.

G. G. Publow, chief dairy instructor, and superintendent of the dairy school, gave a stirring address. He regretted the fact that there was such a small attendance at the meeting. He could not understand why the farmers would not turn out if they were showing indifference to the work, they were making a big mistake, and the time was not far distant, when they would realize this. The instructor, he remarked, had been very modest in his report. He had visited the cheese factories in the Kingston district, and would say that some were not making the progress of others. The dairymen, he pointed out, must not be satisfied in having the buyers pass their cheese. Never in the history of the trade, had the competition been so keen, as at the present time. Other countries were making a bid for the trade, and it rested with the dairymen to see what could be done. It was not right that the men in the business

should sit back, and rest upon their past record. Other countries were taking advantage of the progress made in Canada, and we could easily see the need of making progress. True, this had been a good season, with an increase in output, and there was every appearance of an increase in the output again next year. Farmers had more young stock, and there appeared to be a better quality, due, no doubt, to the weeding out.

The speaker would say, however, that dairymen were becoming more interested in their work, they were making improvements in their buildings. The milk had never been delivered in as good condition as this year. Everyone in the business appeared to have had something to do with the improvement. Some might say that the makers were responsible for the great change, but it was a fact, that all the farmers had been awakened. The speaker was glad of that, and while on the whole, the factories showed up better, there were some much better than others. The aim should be to make the cheese uniform. There were some dairymen who turned out first-class cheese, and looked for higher prices than the others, and in this they were right. An effort should be made to turn out cheese of the highest possible standard. He made a strong appeal for better work in the Kingston district.

S. S. Chittam, one of the local instructors, also spoke.

Be Free From Rheumatism.
 Many people who have suffered more or less from this affliction for years, and who have tried ordinary remedies without avail, are apt to drift into the idea that they can't be cured. As a matter of fact many people who have been crippled and almost helpless for years have been thoroughly and permanently cured with Dr. Hall's Rheumatic Cure. Don't be content to suffer. You can be entirely freed from rheumatism and all its complications by the use of this remedy. Dr. Hall's Rheumatic Cure is a great blood purifier and spring tonic. In bottles, 50 cents, at J. B. McLeod's drug store, corner King and Brock streets (Wade's old stand), and corner Princess and Montreal streets.

The Late Mrs. James Lawson.
 A message was received by Henry Lawson, Sydenham street, this morning, announcing the death in Ottawa of Mrs. Lawson, wife of Rev. James Lawson, of Diamond. Deceased had been ill for several weeks, at the home of her son, where she had gone on a visit. She was a daughter of the late James Campbell, inventory, and later of John Campbell, of Kingston, and was upwards of sixty years of age. Surviving her are her husband and five children, D. Elston Lawson, Lawsonburg, Alta. Vernon, Ottawa; Wilfrid, Montreal; and two daughters, Bertha and Edith, in Ottawa. The funeral occurs on Tuesday.

Naturally Anxious to Hear.
 A farmer named McLaughlin, from Newboro, was at police headquarters Saturday, endeavoring to find out something about a man named Douglas, who came to his farm about two months ago, saying he was an agent of the British government in search of any living relatives of a Robert McLaughlin, who died in Scotland some years ago, leaving a large estate. He went carefully into details with the farmer, getting much information, but so far Mr. McLaughlin has heard nothing from him.

WARREN TOPPAN, Lynn, Mass.

Cured of severe compound cold and cough by
Vinol

"From Dec. 20, '08, to March 1, '09, I had three bad colds, one on top of the other. I got so weak I could hardly get around. Nothing seemed to help me until I began to take Vinol. The change was magic. Three bottles completely fixed that compound cold and stopped the terrible cough—and what surprises me most, at the same time it cured me of a severe stomach trouble that has bothered me for 20 years. Vinol is certainly a wonderful medicine."

Mr. Toppa is one of Lynn's most prominent and highly respected merchants, whose word is as good as his bond.

The reason Vinol is so successful in such cases is because it contains the two most world-famed tonics—the medicinal, strengthening, body-building elements of Cod Liver Oil and Tonic Iron.
