Laurier stuck to his guns, and seven years later they battered down the citadel of power, held by his opponents for eighteen long years. A little farther on is a page cartoon in which Mr. (now Sir William) Van Horne, and the late Hon. Thomas

Then early in the grey dawn of a Monday morning a gang of men started to work mixing the concrete and filling the forms. They worked continuously from daybreak till after sunset each night for six nights. At night they slept on the ground beside their work. Very close to the hour of midnight on the Saturday night the last shovelful of concrete was thrown in, and the men celebrated the occasion in their own way. Their object in getting the wet mixture in quickly was to make the bridge one solid piece of concrete.
