KINGSTON.

They Injure Children

Ordinary Cathartics and Pills and Harsh Physician Cause Distressing Complaints

You cannot be over-careful in the selection of medicine for children. Only the very gentlest bowel medicines should ever be given, except in emergency cases. Ordinary pills, cathartics and purgatives are apt to do more harm than good. They cause griping, nausea and other distressing after-effects that are frequently health-destroying and a lasting nuisance.

We personally recommend and guarantee Rexall Ordinaries as the safest and most dependable remedy for constipation and associate bowel disorders. We have such absolute faith in the virtues of this remedy that we sell it on our guarantee of money back, in every instance where it fails to give entire satisfaction, and we urge all in need of such medicine to try it at our risk.

Rexall Ordinaries contain an entirely new ingredient which is odorless, tasteless and colorless. As an active agent, it embraces the valuable qualities of the best known intestinal regulators.

Rexall Ordinaries are eaten like candy. They are particularly prompt and agreeable in action, may be taken at any time, day or night; do not cause diarrhoea, nausea, griping, excessive looseness or other undesirable effects. They have a very natural action upon the glands and organs with which they come in contact, act as a positive and restorative tonic upon the relaxed muscular coat of the bowel and its dry mucous lining; remove irritation, overcome weakness, tone and strengthen the nerves and muscles and restore the bowels and associate organs to more vigorous and healthy activity.

Rexall Ordinaries completely relieve constipation, except when of a surgical character. They also tend to overcome the necessity of constantly taking laxatives to keep the bowels in normal condition.

There is really no medicine for this purpose so good as Rexall Ordinaries, especially for children, aged and delicate persons. They are prepared in tablet form, in two sizes of packages: 12 tablets 10 cents, and 36 tablets 25 cents. Remember you can obtain Rexall Remedies in Kingston only at our store—The Rexall Store, G. W. Marshall.

CLEANING MEN'S SUITS

No need for a New Spring Suit. Our French Dry Cleaning will give you a change in your last season's Suit. Your friends will think it is new.

AT CONVOCATION

CONFERRING OF DEGREES AT
QUEEN'S.

Premier Whitney Speaks Out on the
Party Government Question—Pre-
faces His Address With Some
Pointed Remarks.

Grant Hall was filled to the doors, on Wednesday afternoon, for Queen's Convocation. Every seat, both down-stairs, and in the galleries, was occupied and much interest was taken in the proceedings. The students in the galleries, as per usual, enlivened the proceedings with the college yells, and songs.

Sir James P. Whitney, promises of Ontario, occupied a seat at the right of the aged chancellor. Sir Sandford Fleming, and the principal, Rev. Dr. Gordon, sat on the left of the chancellor. Hon. Frank Cochrane, minister of mines, Hon. William Duff, minister of agriculture and Allan Studholme, M.P.P., for Hamilton, were also present.

The proceedings were opened with prayer by the moderator, Rev. Samuel Lyle, D.D., after which the installation of the chancellor took place.

The ceremony was performed by Principal Gordon, who referred to the fact that Sir Sandford Fleming had just been re-elected to the position which he had held for thirty years, at the same time paying a warm tribute to his worth, to the university. He referred to him as "Queen's grand old man." No person had discharged his duties with more loyal devotion than the chancellor, and there was no one who had won more devoted success in public service. The chancellor was still young—young in sympathy for the youth, and in his desire for the good of the university.

After these remarks, Principal Gordon placed the robe on the chancellor, and he was duly installed into office. The chancellor returned his thanks, in a neat reply.

Afterwards followed the presentation of medals, prizes and scholarships by the chancellor. The winners of the university prizes were announced by G. Y. Chow, the registrar, the winners of the scholarships and prizes in theology were announced by Rev. Dr. Ross, and the scholarships and prizes in medicine by Dr. A. R. B. Williamson.

The different degrees were then conferred by the chancellor, and the tassels presented by Rev. Dr. Ross.

John McIntyre, K.C., was present, and in a few well-chosen words presented his own prize to the winner, Miss May L. Macdonell, in honor of classics.

Honorary Degrees Conferred.

Then followed the conferring of the degrees on the honor graduates.

Prof. Jordan presented Rev. A. T. Lowe, B.A., of St. Andrew's church, Quebec, for the degree of D.D.

Prof. Jordan stated that Rev. Mr. Lowe graduated from Queen's in 1878, and then took two years in theology.

He added that it was much easier for a speaker to deliver an address inside a building than in the open air; it would also be better for his hearers, and for this reason Premier Whitney had decided to give his address at convocation instead of at the ceremony of laying the corner stone.

Premier Whitney said that he did not propose to deliver an address.

Nothing would please him more than to have a heart to heart talk with his audience. It appeared to him that in the remarks of Principal Gordon he had heard an echo on political parties, and he could not allow it to pass without a reference.

He said that under British institutions is secured the greatest liberty by self-government, and that the only way to maintain this was by party government. And while there was no government that would be no less a political party, as soon as the public recognize this tremendous truth there would be less public偏見.

Without party rule there would be stagnation, and success would grow less.

British people, no matter where they live, might be asked, should renounce these facts and allow them to sink deep in their hearts.

Premier Whitney then referred to the new chemistry building, and with a smile said that he was glad to know that the university now had an income of \$80,000, and that it would not be necessary for any more deputations to go to Toronto to seek aid from the legislature. Proceeding in his reference to the new building, he spoke as follows:

tures at Queen's last winter by Dr. Park.

Vice-Principal Watson introduced the name of Prof. T. R. Glover, lecturer in classics in St. John's College, Cambridge, England, for the degree of LL.B.

Nelson Shields Presented.

A very interesting part of the proceedings followed, in the presentation to the university of a Nelson shield, the gift of the British and Foreign Sailors' Society for Canadian schools. The presentation was made on behalf of the society by the moderator, Rev. Samuel Lyle. The chancellor received the shield, on behalf of the university.

Principal Gordon announced that there was a similar shield to be presented to the Royal Military College, and the shield was presented to Col. Crowe, the commandant, by Rev. Alfred Hall, of South Africa, the secretary of the society, who has been in this country looking after its interests.

Col. Crowe, in an able manner, returned thanks for the kind gift to the college.

The shield is of a unique design, very handsome, and worthy of special mention. On the upper corners are the oak and maple leaves. In the upper center is the historic ship Victory, under full sail. In the lower center is a bust of Nelson, on one side of which is the immortal flag signal, and on the other the date of the momentous day in the empire's history.

"Around the training school of the Church of Scotland, there grew up a great university with faculties in arts, science and medicine. The imperial authorities realizing that the Church of Scotland was an established church, showed interest in the establishment of Queen's."

"One of the best traditions in the history of Queen's University is that from the beginning it was an absolutely tolerant institution and even in the early fifties Anglicans, Methodists and Roman Catholics availed themselves of her advantages. There is not more remarkable evidence of Scottish tenacity and courage than in the fact that when the disruption of the Church of Scotland took place in 1843, affecting equally the Canadian church, the Free church students withdrew from Queen's. She was left with eleven students and most of the staff gave up the fight. But the trustees determined to weather the storm and by 1850 there were forty-one matriculated students, Queen's, like all other universities, had her periods of strain, but having survived the disruption she can be hopeful of surviving anything."

"The foremost men of Queen's have been known in quarters far outside the boundaries of the Presbyterian church. The names of men like Principal Snodgrass, Prof. MacKers, Rev. Dr. Watson and above all Principal Grant, are household words in Canada.

Retiring trustees, Rev. Dr. Wardrop, Rev. Dr. Campbell, Rev. Dr. McLaren, Dr. A. T. Drummond, J. K. Macdonald, George Gillies, were re-elected.

Motions of condolence were passed in connection with the death of John Charlton and also of Mrs. Gordon.

Victoria Day Meeting.

The outstanding feature in the history of Queen's is the marvelous power it has shown, notwithstanding the accidents and shocks of ill-fortune.

First, there was the disruption of 1843, it survived this. Then it lost the government in 1868 when the province, under Sandfield Macdonald, adopted the policy ever since followed, under which policy no grants of public money can be made to what for the want of a better name are called "sectarian colleges." Then the college, by the failure of the Commercial Bank, lost a large part of its revenue.

It is evident from the history of Queen's that, whenever it was thrown most on its own resources it threw the best and I suspect that this is true of other institutions as well as individuals. Under Principal Grant Queen's made an appeal for support which has ever since given her a recognized place in the field of university work all over this continent.

"So much for the college and university."

"My special duty here, to-day, is to lay the cornerstone of the new chemical laboratory, connected with the School of Mining. I believe the first chemical building was really the first laboratory erected in Ontario purely for the teaching of chemistry. The government has appropriated \$100,000 for the new building, payable in five annual instalments, and beside this new building will stand the new mining and metallurgy building, rendered possible by the princely contribution of Prof. Nicol, head of the department of mineralogy. I believe the total income of the School of Mining is in the beginning, \$30,000; it is now \$85,000. The original staff of four professors and occasional lecturers has expanded to thirty-six professors and assistants. Instead of five engineering students in the first session there are now three hundred and twenty. This progress is at once satisfactory and astonishing. The discoveries in chemistry are very important factors in modern progress in trades and manufactures. They are closely in line with the advancement of the country and, therefore, deserve all possible encouragement. I repeat then that, it affords me great satisfaction to come here and take a formal part in these proceedings. The government of Ontario feels convinced that under the shadow of Queen's University and subject to the good influences which radiate from it, the School of Mining and the departments connected with it will go on and prosper."

Premier Whitney was warmly applauded in taking his seat.

This concluded the programme and the proceedings were brought to a close with the singing of the National Anthem.

MAKES HAIR GROW

G. W. Mahood Has an Invigorator That Makes Hair Grow in Abundance or Money Back.

If your hair is thinning out gradually it won't be long before the bald spot appears.

The time to take care of the hair is when you have hair to take care of.

For thin, falling hair the best remedy known to mankind is Parisian Sage. It is compounded on scientific principles and furnished to the hair root a nourishment that acts quickly and promptly and causes the hair to grow strong.

Principal Gordon then introduced the name of Hon. Dr. Pyne, minister of education, for the degree of LL.B. He felt sure that all would agree that next to the prime minister, there was no position in the provincial cabinet, the duties of which were of more essential importance to the people of the province, than that of the minister of education. There was also many possibilities. The people might well appreciate the efforts put forth to improve the conditions of our schools, to raise to something like an adequate figure, the remuneration of our teachers. In the university there was a great opportunity of testing the worth of this department.

There was still much to be desired in the public schools, Principal Gordon added, but we must recognize the fact that much had been accomplished.

"We regret very much that Hon. Dr. Pyne is unable to be with us in person. He is suffering from a severe attack of rheumatism, and he has our sympathy, but, no doubt, arrangements will be made for him to address the students some time in the future, in recognition of the distinction bestowed upon him."

Premier Whitney then arose and said that Hon. Dr. Pyne had requested him to express his sincere regret at not being able to be present, and at the same time to express his appreciation of the honor conferred upon him.

Dean Connell introduced the name of Dr. William H. Park, professor of bacteriology and hygiene, in the University of New York, for the degree of LL.B. Dr. Park was unable to be present, but would seek an early opportunity to visit Queen's. He referred to the series of very instructive lectures at Queen's last winter by Dr. Park.

At S.A. BARRACKS.

Commissioning of Band and Local Officers.

To night, at the S.A. Citadel, the annual commissioning of members of the band; and local officers, will take place. Commissions for the different branches of the army work in the city will be as follows:

Eighteen bandsmen, 16 Sunday school teachers, 5 war cry sergeants,

3 prison sergeants, 5 league of mercy sergeants, 2 orderlies, 1 flag sergeant,

also treasurer, secretary and Sergt. Major.

A new flag will also be presented to the corps. All are invited to witness this interesting ceremony.

incorporating Queen's university was passed in 1840, and the royal charter was granted in 1844.

"Very well-known names are associated with the foundation of Queen's, both clergymen and laymen, such as Rev. John Macphar, Hon. William Morris, Rev. Dr. Matheson, Rev. Prof. Mowat, Chief Justice McLean, and Hon. James Crooks. At the jubilee meeting of Queen's in December, 1889, Sir John Macdonald recalled the reorganization meeting in 1839. Sir John gave his reminiscences of this meeting in which he had taken part and he concluded his speech in these words:

"I look forward with great hope to the future of the university. I stood at its cradle, and am proud to be such a healthy child. You are yet young, but you are healthy, strong and active, and can look forward with hope to the years of strong, vigorous manhood before you in the future."

"Around the training school of the

Church of Scotland, there grew up a

great university with faculties in

arts, science and medicine. The im-

perial authorities realizing that the

Church of Scotland was an es-

tablished church, showed interest in

the establishment of Queen's."

"One of the best traditions in

the history of Queen's University is

that from the beginning it was an

absolutely tolerant institution and

even in the early fifties Anglicans,

Methodists and Roman

Catholics availed themselves of

her advantages. There is not more

remarkable evidence of Scottish tena-

cacy than in the fact that when the
