

"SIT TIGHT" THE CRY

BOARD OF TRADE OPPOSES RECIPROCIITY

With the United States—Canada's Manufacturers Must be Protected—Nothing Needs to be Yielded by This Country.

"Sit tight" was the advice given by H. W. Richardson to the board of trade last evening when the question of closer trade relations between Canada and the United States was under discussion, and the members of the board expressed unanimous agreement with the president that there should be no reciprocity. It was shown that for years the United States had tried to ruin Canada commercially by building a high tariff wall. Now the United States sees that its own future depends largely upon closer trade relations with Canada, the country of the twentieth century, but it is in Canada's interest to "sit tight" and yield nothing, but to build itself up like the United States did, by protection.

Dr. Ryan presided at the meeting in the absence of the president. Eventually it was decided, upon motion of W. R. Givens, seconded by D. J. Laidlaw, to instruct the council of the board to bring in a resolution on the matter under discussion at the next regular meeting of the board. The discussion was informal, but most instructive and interesting.

H. W. Richardson pointed out that Canada's industries must be protected. Reciprocity would injure Canada and benefit the United States. Our country had found other profitable markets, and should give nothing to the nation to the south. The farmers of Western Canada naturally wanted reciprocity so they could sell their grain to nearer markets, but they should remember that Eastern Canada had built up Western Canada and now it was the west's turn to stand by the east.

W. F. Nickle wanted to see created in Western Canada a strong British sentiment, so that the west would stand as the east had stood since 1776 for British connection, even when it would have been easier and more profitable to have thrown its lot with the United States. Canada had stood fast in the past, and it should do so again.

H. J. Carson was in favor of a "stand pat" policy. If the United States wanted to lower the duty on grain let it do it.

J. W. Power favored building the tariff wall between the two countries as high as could be. Canada didn't care now how high the United States tariff might be.

W. R. Givens said that in the past few years he had come to the conclusion that it was in Canada's interests to maintain a protective tariff.

D. J. Laidlaw pointed out that the tariff question was one between the farmer and the manufacturer. He remarked upon the strong opposition to the reciprocity taken by the French Canadian Chambre de Commerce in Montreal. The British sentiment down there was strong.

W. R. Givens stated that if there should be reciprocity a good many Canadian manufacturing concerns would be wiped out for the United States goods would be brought in to undersell them. Kingston would suffer in this regard.

John Donnell was strongly opposed to reciprocity. Canada should treat the United States as the latter had treated it. He was in favor of the "sit tight" policy.

This concluded the discussion which was so unanimous that the formal expression of the board by resolution is a foregone conclusion.

THE SPORT REVIEW.

Two City Baseball League Games This Afternoon.

The Irishmen-C.L.C. game called for this afternoon at 2:30 o'clock, was counted on as going to be a merry battle. Many changes in the lineup of the Irishmen are expected, and this will make a big difference. George Sullivan was named as umpire. The junior game between C.L.C. and Regiopolis was called for 1:30 o'clock on the old diamond.

Sporting Notes.

The Toronto ball club has spent \$10,000 for players this year. Chicago Cubs have won eight straight and are now leading the National baseball league.

Lajoie is leading the American baseball league in batting with .433, almost one hundred points more than the man next to him.

There are twelve 300 hitters in the American baseball league to date. Three of them are Tigers, four Boston, two Cleveland, one Washington, one Philadelphia and one St. Louis.

Hilliard Lang, Toronto, and Kid Howell, Haliburton, will fight ten rounds on Tuesday night next at the drill hall for the welter-weight championship of Canada, and a thousand dollar side bet.

Jem Mace, the veteran champion, and "Bill" Clark, another veteran, will likely box as a curtain raiser to the big fight July 14th. They will shy corners into the ring and add their colors to their corner posts, as in old-time battles.

The sale of the Daily Racing Record was stopped by the Toronto morality department, and summonses will be issued for the publishers to test the legality of the circulation of this sheet under the new betting law. The action will be taken merely as a test case.

To-night's "Uncle Tom's Cabin."

Among the notable scenes of Al. W. Martin's "Uncle Tom's Cabin," which is at the Grand to-night, is the scene of Claire home, showing a tropical garden with its fragrant magnolia and orange trees, among which nestles the typical southern plantation residence, the home of little Eva; Legree's cotton plantation in full bloom; the wild rocky path in southern Ohio, with the ice-choked Ohio river by its side. The transformation entitled "The Celestial City," is said to be the most magnificent tableaux ever conceived.

In offering his revival to our city Mr. Martin not only claims that the scene of the office is to any ever attempted but honestly assures prospective patrons that the company is composed of the most capable talent obtainable.

PUZZLED DOCTORS.

Victim of Pneumonia Left White as Marble.

London Mail. A case no less mysterious than that of Alan Rusbrooke, the brittle man at the London hospital, is puzzling the doctors at a Birmingham institution. The patient is Morgan Field, a needle pointer, who four years ago contracted pneumonia. The attack was a severe one, and for six months the man was unable to follow his employment. Shortly after this period his features began to contract, the natural lines gradually left the face and it became as white as marble. The hands, arms, feet and chest were similarly affected, and when the disease has attacked the sufferer the skin has become taut.

Something akin to a petrifying effect has been produced, and where the body is afflicted in this way the flesh is as cold as the marble it so strikingly resembles. So tight is the skin at the joints that the man cannot bend his limbs, while he can open his mouth only slightly, and then with extreme difficulty.

The condition is thought to be due to an obstruction in the arteries, veins or lymph vessels; dependent upon some disturbance in the nervous system. At present the patient is being treated with a view to improving his nutrition and increasing the blood circulation, and it is hoped that later on the treatment at the new Birmingham Electric Radium Institute, which is being built in connection with the hospital, will be the means of relieving the sufferer.
