As An Advertising Medium

TT is somewhat rare to find the two essentials - quantity of readers and quality of readers -combined in one medium.

Some papers have quantity of circulation, got by reducing subscription rates below cost of paper, or through guessing competitions or gift enterprises. These readers are of little value to a business man.

Then again some papers have quality or class in their readers, but such papers are generally of very limited circulation.

THE GLOBE is the one outstanding medium of Publicity in Canada which combines highest quality and large quantity.
