ASEPTO SOAP POWDER
sweetens the home

Is Your Home "Surgically Clean"?

THE greatest guarantee against illness—against disease—is cleanliness. Let Asepto help you keep your home clean—"surgically clean."

For Asepto sterilizes everything it washes. Everything touched by water in which Asepto has been dissolved—and only a little Asepto at that—is left absolutely antiseptic, sweet and clean.

Ordinarily the application of disinfectants requires considerable work. When Asepto is used, it enables one to carry on a complete course of sterilization ALL THE TIME without any additional work—both cleans the home and KEEPS it clean.

Yet Asepto is more than merely an antiseptic—more than a germicide; it is also a soap powder—as good as the best soap on the market.

It is the fact that both its soap and germicidal properties work toward the same identical end that makes it so effective. The soap qualities of Asepto loosen and remove the accumulated uncleanness—the germicidal qualities sterilize the cleansed surfaces.

Do not get the idea, however, that Asepto is of value only as a disinfectant. It is far more than that. Try it in your washing—on anything. The way it cleanses will amaze you.

With Asepto, you don't have to rub or boil clothes—you just put them to soak in water in which Asepto has been dissolved, leave them there for a couple of hours and then rinse them and hang out to dry.

Or for washing dishes and greasy cooking utensils—use Asepto.

A single package of Asepto will make up two gallons of the best soft soap you ever used. And it will cost you only five cents, too.

Tell your grocer to include a package of Asepto with your orders—all good grocers sell it at five cents.

MAY MAKE RECORD

MARKET OPENED THIS WEEK WITH RUSH.

There is Good Demand in Britain—The Outlook, However, is Not Considered Very Bright—Butter Market Decline.

Special to the Whig.
Montreal, June 22.—This week's cheese market has opened with a rush in the country, and it is maintained at its present rate, we should see a record established at the country markets. Last week's markets all over the country were quiet and prices were steadily maintained at from 10 1/2c to 10c, with here and there a broad selling at one-sixteenth over these prices. At these figures a good deal of trading was done, and large quantities were sold, one of the heaviest shipments of the season to date going out of this port. At the lower level of price reached there was a considerable development of the demand for export, and most dealers were cleaned out by the end of the week. This seemed to encourage them to go in for this week's offerings, and as a consequence of the keen competition for the offerings on the boards, held on Tuesday, prices were advanced very quickly, and at closing as high as 10 1/2c per lb. was paid. Earlier in the morning at Campbellford, the prices paid ranged from 10 1/2c to 11 1/2c, and within a couple of hours of a full quarter cent per pound. In view of the present good demand from Great Britain there is no doubt that these prices will be maintained this week, and even more money may be paid. The cable advices from Great Britain however are not at all encouraging, and the outlook for the future is not very bright, and we believe that as soon as the present demand, which is for strictly June made cheese, is satisfied, we shall see a reaction in the market with a decided set-back to prices.

The receipts into Montreal continue to show marked increase over those of the previous year, the total for last week amounting to 84,505 boxes as compared with 73,228 boxes for the corresponding week last year. The total receipts to date amount to 311,178 boxes, as against 282,016 boxes last year in the same period, a net increase of ten per cent. It is not at all likely that this increase will be maintained throughout the season, and reports coming in already from the country indicate a falling off in the make, showing that we have passed the flush of this season's make, and that the make from now on will begin to decline.

The market for butter decline sharply last week, and finest creamery was selling freely on this market, at 22 1/2c per lb. At the country markets however prices ranged all the way from 22c to 22 1/2c per lb. The latter price having been paid at Cowansville for two or three of the large factories selling there, the bulk of the butter in the country however has been sold at from 22c to 22 1/2c per lb., and is being quoted in Montreal at 22 1/2c to 22c per lb. At the lower prices there has been considerable enquiry from the other side, and several hundred packages have been sold for export. This trade however will not amount to much, owing to the high prices that are being asked for our choicest creamery butter.

Asylum de Luxe.

Nervous Prostration For Three Years
"Dr. Miles' Restorative Nervine cured me of a period of nervous prostration of over three years duration, and the Anti-Pain Pills are as necessary to us as the roof of our house. They have been household remedies with us for many years."
WM. J. LOUGHRAN,
1214 Catherine St., Philadelphia, Penna.

Much sickness is due to nervous troubles. Headache, dizziness, epilepsy and insanity are nervous troubles. Then there is a large class of disorders which arise from a weakness of the nerves of an organ or part, as weak lungs, heart, stomach, kidney, bladder, eyes, etc. Dyspepsia and indigestion are usually the result of nervous disorders.

Restorative Nervine
soothes the irritated nerves, and assists the nerve cells to generate nerve force.

Found Miser's Hoard.
Seattle, Wash., June 21.—Otto Speltz, of Bellingham, Wash., has a pet red squirrel and one morning this week was surprised to see the little rodent tearing a \$5 Canadian bill to pieces. Speltz secured the money and has sent it to Ottawa for redemption. He had no more than dispatched the letter containing the shreds of the five than the squirrel was found playing with a piece of United States \$10 bill.

Speltz gathered this money in before it was too damaged for barter, and is now watching the movements of his pet. It is believed the rodent has discovered a hidden hoard laid away in past years by a miser or which was cached by a robber in a hollow tree and found by the pet.

WOMEN CRITICIZED PASTOR.

Church Declines Rev. E. C. Brown Another Year.

Moline, Ill., June 22.—Because Rev. J. G. Brown, pastor of the local Unitarian church, made radical assertions at the Unitarian conference recently held in Chicago, the members of his church have declined to accept his services for another year. Mr. Brown's statement in Chicago that all women are liars acted as an electric shock, and the women of the congregation were only waiting for the chance offered at the annual meeting. Mr. Brown was a candidate for re-election, but the nays secured a majority of one ballot.

The pastor was somewhat unpopular with the men, he having classed them as liars also, though the latter assertion was made one day later than the statement regarding the women. One of the officers of the congregation, says Mr. Brown, was rejected because he was not quite enough of a Unitarian. The officer said: "What we want is a Unitarian and not a man who preaches his own ideas, together with a mixture of Unitarian and orthodox dogmas. He did not fit very well in the local congregation."

ELECTRICITY FROM SUN.

Claim Made by Sun Electric Generator Co.

New York, June 21.—The American says it has been learned that the men who have been selling stock in Wireless and Radio Telephone and Telegraph companies have been actively engaged in selling a large amount of stock in the Sun Electric Generator company, of 129 Maiden Lane, that claims to produce electricity direct from the sun.

On the roof of the offices at the Maiden Lane address is fitted up a machine, composed of hundreds of pieces of lead, to each of which a bit of tin is fastened. These metals are set in glass-covered frames, one side of which is exposed to the rays of the sun and the other kept in the shade. It is claimed electrically sufficient to operate all lights in any building is obtained by this process.

Was Cured of Sliced Heart.

St. Louis, June 21.—Michael Lawless, in whose heart twelve stitches were taken at the city hospital a month ago, has been discharged from that institution cured. Lawless walked away unassisted, boarded a car and waved a farewell to the physicians.

Lawless declared he felt no ill effect, but, on the contrary, was in much better physical condition than before he received the wounds. Photographic tracings of the action of the heart showed his pulse was even more regular than that of several of the physicians who attended him. The doctors attribute his remarkable rally partly to his youth and good constitution but give full credit to Dr. W. C. G. Kinney and his assistants, Drs. Shutt and Rodney Bunch, who performed the operation.

ROBIN HOOD FLOUR IS DIFFERENT

This is the Wonderful New Flour
that has made such a sensation throughout Western Canada.
Made of highest grade Saskatchewan wheat, in the newest, best-equipped, largest mill on the prairies.
Made with the determination to give users better flour-value, greater certainty of baking-success, fuller satisfaction with the final result, whether with biscuits, cake or bread.
Housewives throughout all the West admit that Robin Hood Flour gives all this. Therefore, Madam, it is the flour for you.

This flour cannot be described in an advertisement. We use this paper merely to give the introduction—to say:
"Let us make you acquainted with Robin Hood Flour."

It is the guaranteed flour. If you are not satisfied with it after two fair trials, ask your grocer for your money back. He will give it to you.
Add more water than usual when using Robin Hood Flour. Made of such hard, dry wheat, it absorbs more moisture—producing a larger, whiter loaf.

The difference between Robin Hood Flour and other flours you have to find out for yourself. That there is a difference every woman who now uses Robin Hood admits.
