Toronto Globe. The second division clubs of the Eastern Baseball League are travelling at a dizzy clip right now. The race in the Powers circuit is much closer than in the American and National Leagues, where it is all over but the shouting. There are less than 200 points between the first and last clubs in the Eastern race.

Nationalize Meat Trade. Wellington, Sept. 2.—Speaking of the operation of certain trusts in the United States Premier Ward stated that should any United States combination endeavor to control the New Zealand meat market parliament would be consulted as to whether the meat trade should be nationalized.

If a chance offers Premier Ward will give parliament an opportunity of discussing imperial unity, which, in his opinion, will be the most important question for the next imperial conference.

\$1.65—Watertown and Return—\$1.65. Good going Saturday, 5 a.m. and 2 p.m., and Sunday, 7:30 a.m. and 2 p.m., returning up to Monday.

GOT HIS HAIR BACK. Was Perfectly Bald When He Started to Use Newbro's Herpicide.

Frederick Mansel, Maryland black, Batts, Montana, bought a bottle of Newbro's Herpicide, April 6th, '09, and began to use it for entire baldness.

The hair follicles in his scalp were not dead and in twenty days he had hair all over his head. On July 2nd he writes, "and to-day my hair is as thick and luxuriant as any could wish." Newbro's Herpicide works on an old principle and with a new discovery—destroys the cause and you remove the effect. Herpicide destroys the germ that causes dandruff, falling hair and finally baldness, so that with the cause gone the effect cannot remain. Stops falling hair at once and a new growth starts.

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. \$1 bottle guaranteed. Jas. B. McLeod, druggist, special agent, Kingston, Ont.

HECLA FURNACE

And The Most Vital Improvements Made In Warm Air Heating In 30 Years

The first vital improvement is the FUSED JOINTS. The objection to the ordinary warm air furnace is, that where the steel and cast iron parts are bolted and cemented, the joints do not remain air-tight. The iron and steel of the furnace expand and contract under the influence of heat and cold. Bolts work loose, cement drops out and gas, dust and smoke escape into the house through these openings.

To overcome this, we perfected FUSED JOINTS. Instead of bolting and cementing iron and steel together, we fuse them at white heat until they become one solid piece of metal.

FUSED JOINTS make the combustion chamber absolutely air-tight. They are permanent joints and insure the warm, heated air being always fresh, healthful, invigorating and untainted.

HECLA FIREPOTS are reinforced by 97 steel ribs fused into the outer surface. This makes them the stiffest, strongest and most durable firepots that can be made.

The steel ribs increase the radiating surface of the firepot by 300%. This increase in the radiating surface of the firepot, increases the radiating power of your furnace and enables you to get more heat out of the fuel that you burn.

In fact, actual tests has shown a saving of at least one ton of coal in seven, through the heating efficiency of the "Hecla" Steel Ribbed Firepot.

These are vital improvements—"Hecla" improvements—that are found only in "Hecla" Furnaces. There are others, described and illustrated in our book. Write for free copy. Send us a rough plan of your house and we shall be pleased to make up free estimate of the cost of installing the proper "Hecla" Furnace.
