

## Announcement

We are prepared to do Upholstering and all kinds of Furniture Repair and Cabinet Work.

Pianos Tuned and Repaired. SATISFACTION GUARANTEED. Apply to

**CONNOR & SLEETH**  
128-132 ONTARIO STREET,  
(Hooper & Slater's Factory).

Nothing considered quite such good form at the impromptu meal as

## PATERSON'S Cambridge Wafers

A dainty new biscuit made from cream of wheat. Always crisp and fresh. Sold in tins only, by all good grocers. Their flavor is truly delicious. 21 Made by Paterson of Bradford

## QUEEN'S COLLEGE STUDENTS

A COMPLETE LINE OF QUEEN'S COLLEGE TEXT BOOKS, SCIENCE AND MEDICAL INSTRUMENTS, NOTE BOOKS, ETC.

In Pennants and Posters we have the largest line in the city, having the exclusive sale for the city for the largest manufacturers and publishers in United States and Canada.

The finest line of Loose Leaf Note Books on the market.

The **COLLEGE BOOK STORE,**  
THE FINEST BOOK STORE IN EASTERN ONTARIO.

360 PRINCESS STREET. Phone 610.

## The Famous Rayo

Is the Lamp of Real Beauty

because it gives the best light of all lamps. The Rayo gives a white, soft, mellow, diffused light—easy on the eye because it cannot flicker. You can use your eyes as long as you wish under the Rayo light without strain.

The Rayo Lamp is low-priced, and even though you pay \$5, \$10 or \$20 for other lamps, you may get more expensive decorations but you cannot get a better light than the low-priced Rayo gives. A strong, durable shade-holder holds the shade on firm and true. This season's new burner adds strength and appearance.

Once a Rayo User, Always One.

Sellers Everywhere. If not at yours, write for descriptive circular to the nearest agency of the

Limited.

## Matured as Good Whisky Should Be.

If a time limit had been set on the building of the Egyptian Pyramids, likely they would not be standing to-day. It doesn't pay to hurry some things. That is why

### Corby's "Special Selected" Rye Whisky

is matured by the "slow but sure" method of storage in charred oak casks. For years the whisky is gradually ripened. Nature takes her time—but is thorough. The chemical properties of the charred wood remove the harshness of the new whisky. Age puts the finishing touches to the flavor—imparts the delicacy that is characteristic of Corby's "Special Selected."

This is the longest and consequently the most expensive method of maturing whisky. Not all whisky is aged this way. But it is the only way to get the Corby Quality.

Corby's "SPECIAL SELECTED" Rye Whisky is sold everywhere. Try it to-day.

The H. Corby Distillery Company Limited

Head Offices: Montreal. "Corby's of Corbyville for Over Half a-Century"

## Fall Shoes

DIDN'T SATURDAY'S WEATHER CONVINCE YOU OF YOUR NEED FOR NEW FALL SHOES?

OUR WINDOWS ARE FILLED WITH THE NEWEST AND BEST.

**J. H. SUTHERLAND & BRO.**  
THE HOME OF GOOD SHOES.

## OUTLOOK FAVORABLE

FOR POWER AGREEMENT WITH SEYMOUR COMPANY.

Civic Light, Heat and Power Committee Has a Conference With Company's Representatives—Company's Offer Looks Good.

The question of cheap electrical power for Kingston is at last before the city's lights, heat and power committee, which, yesterday afternoon had a conference with representatives of the Seymour Electric and Power company, of Cambridge, Ontario, which offers to supply Kingston with 3,000 horse-power at the rate of twenty-five dollars. The position of both the city and the company was pretty well aired, and when the conference ended, it looked as though there would eventually be some arrangement arrived at whereby this city would get advantage of the cheap power that the Seymour company is offering.

Twenty-five dollars a horse-power is the flat rate offered by the company, and it is offered for 3,000 horse-power whether the company is given the privilege of distributing the power to consumers in the city or not. The company is willing to sell power to the city on the kilo-watt-hour basis, but of course, the rate would not be so low. The committee is giving thought to this, however, that the company did not make an absolute stipulation that it must be given a franchise to supply the large consumers in Kingston. This fact was not mentioned in the letter to the city council, making an offer to supply the city with power. It was brought forth in the course of the discussion yesterday afternoon.

It was finally decided that the committee should, within a week, give the company a figure at which it would sell power on the kilo-watt-hour basis, and also a figure for supplying so much straight horse-power and so much by the kilo-watt-hour, that is a combination rate. When this information is received, the committee will meet again, and the figure into the matter. It is hoped that a deal will be reached before the end of the month, and that the city council will have the committee's recommendation before it. If a contract is signed with the company by November 1st, it will be able to supply the city with power twelve months thereafter.

While the company is willing that the city should distribute all the power consumed here, it would like to supply the manufacturers. It could do so at a cheaper rate than the city could, and it was pointed out by some of the company's representatives that if it was given the right to distribute, there would be a good deal more power used in Kingston than if the city did the distributing, for the company would vigorously urge the use of power, and naturally could give a lower rate than could be given from the city plant. The committee does not like the idea of an arrangement of this nature, and it is the most important part of the offer that will have to be considered.

The city's representatives in attendance at the conference were Ald. Elliott, chairman of the committee, Mayor Cooper, Ald. Hogg, Ald. Harty, Ald. McKay and Ald. Pringle, and Manager Folger, representing the Seymour company. Presenting for the city were J. Carey, Toronto; A. B. Colville, Campbellford; and A. B. Cunningham, Kingston.

At the beginning of the conference, Ald. Elliott said he hoped that an agreement would be reached that would be satisfactory to both city and company. It could not be expected that a final arrangement would be reached at this meeting, as there were a good many details to be considered. However, he hoped that a good advance in negotiations would be made.

Mr. Colville said that he re-echoed the words of Ald. Elliott, and hoped for an arrangement that would be beneficial to both city and company. Since the meeting in Belleville of representatives of various municipalities last June his company had purchased some interests in dispute near Havelock Falls. It proposed to supply power to municipalities from Kingston to Ottawa. Its offer to Kingston was to supply 3,000 horse-power at the rate of \$25. The first thing to decide was as to whether that price was satisfactory to the city. He claimed that the best service would be secured by the company distributing the larger block of power. It could give manufacturers better rates than the city could.

Ald. Elliott asked where the power would be delivered.

Mr. Carey replied that the delivery would be at the company's sub-station at whatever voltage the city desired.

Ald. Elliott said that the committee would not feel justified in dismantling its plant. It would be necessary to keep the city's plant in reserve for operation, in case of accident.

Mr. Carey replied that if his company thought that would be necessary it would not be making overtures to the city at all. The chances of an accident was very rare. It would scarcely cause half an hour's delay. Mr. Carey said that his company proposed to give Kingston so good a service that the maintenance of a city auxiliary plant would not be necessary. There could not be a complete breakdown, or interruption, as the company would have several stations.

Mr. Carey further stated that at present only a single line would be carried to Kingston. There were two lines to St. Anne, below Belleville. The company had two power houses in Peterboro, two in Campbellford, and one at Trenton. Another was being built at the latter place.

Ald. Elliott drew attention to the fact that Winnipeg was recently thrown into darkness by an accident to a plant. Mr. Carey replied that Winnipeg had only one station. His company would soon have six.

Ald. Elliott wanted to know if the price would remain the same at all seasons. For instance, there were some seasons when not nearly so much power was used. Mr. Carey replied that there would be no variation, as the same amount of power had to be manufactured by the company whether it was used or not. He stated that the company would be willing to sell power at a flat rate of about a kilo-watt-hour, according to the amount of power used. Of course the price would be different.

In reply to Mr. Elliott Mr. Carey

said that the company would build and equip its sub-station.

Ald. Elliott wanted to know at what rate a kilo-watt hour the company would supply power to the city for.

Mr. Carey said it would be first necessary to go through the records of the city's plant to determine whether there was any objection to the company using the city's plant or a substation, in view of having to carry a line of such powerful voltage into the city. Mr. Carey said he did not think so. Toronto allowed lines carrying greater voltage than his company carried, to enter the city.

It was made clear that the erection of a sub-station was necessary. One might be built close to the city's plant.

Manager Folger said it would be necessary for the city to install machinery to change the company's alternating current to direct in the city plant. Kingston, the manager said to Mr. Carey, was a direct current town.

Ald. Elliott said that perhaps the biggest question was as to whether the city council should recommend the city council should recommend the city distribute power to the consumers in the city. Kingston had a large debt on its plant and it had, therefore, to act very carefully.

Ald. Harty wanted to know if the company would supply the city with power, if the latter wanted to distribute all the power itself.

Mr. Cunningham thought that was a matter that rested more between the manufacturers and the city, than between the manufacturers and the Seymour company.

Mr. Carey stated that his company was willing to do business with any municipality, so long as it saw a chance to make a reasonable profit out of what it sold.

Ald. Harty wanted to know if the company would supply the city with power, if the latter wanted to distribute all the power itself.

Mr. Cunningham pointed out that the company could sell cheaper than the city, and it was advisable to give manufacturers power at the lowest possible rate.

Mr. Carey was of the impression that in Kingston there was a market for 3,000 horse power. He included the needs of all manufacturing places in this estimate.

Mr. Cunningham advised the civic committee to deal with the matter as promptly as possible, and not let it drag on. The Seymour company, when it submitted the additional figures requested, would like the city either to accept its offer promptly or to reject it.

Ald. Elliott replied that when the company gave the committee the alternative quotations requested, the latter would very soon reach a conclusion, and make a recommendation to the city council.

Manager Folger, in discussing the proposition as a question of time, stated that it would take some time before the city could close a deal with the Seymour company. A good deal of information had to be secured by both sides. If an arrangement was made, it would take some time to be worked out. There had to be a canvass made of the local manufacturers to find out if they would take power in quantities.

"A 50c. Lime Juice Cocktail for 30c." during October Red Ticket Sale, at Gibson's Red Cross Drug Store.

"Coffee Finally Had to Go." The way some persons cling to coffee even after they know it is doing them harm is a puzzle. But it is an easy matter to give it up for good when Postum—properly made—is used instead.

"A girl writes: 'Mother had been suffering with nervous headaches for seven weary years, but kept drinking coffee.' 'One day I asked why she did not give up coffee as a cousin of mine had done who had taken to Postum. But mother was such a slave to coffee she thought it would be terrible to give it up.' 'Finally, one day, she made the change to Postum, and soon her headaches disappeared. One morning while she was drinking Postum so freely and with such relief I asked for a taste. 'That started me on Postum, and I now drink it more freely than I did coffee, which never comes into our house more.' 'A girl friend of mine, one day, saw me drinking Postum and asked if it was coffee. I told her it was Postum and gave her some to take home, but forgot to tell her how to make it. 'The next day she said she had found out how to make it. Postum, I found out she had made it. She ordinary coffee. So I told her how to make it right, and gave her a cupful I made, boiling it fifteen minutes. She said she never drank any coffee that tasted so good, and now coffee is banished from both her table and her mind.' 'Read the little book, 'The Road to Wellville,' in plain, 'There's a reason.' Never read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest."

## THE SPORT REVIEW

OTTAWA COLLEGE DOES NOT UNDERESTIMATE QUEEN'S.

The Presbyterians are Working Hard —Queen's and R.M.C. Open Rugby Season Here Next Saturday.

Ottawa College is not under-estimating the strength of Queen's rugby team. The Journal notes that the Presbyterians are having three practices a day this week and says: "It looks from here as if the tri-color defenders this year will be practically a new line-up, most of those of last season's team who are here being at present training out in other positions. Ed. Elliott and Erskine, of last year's wing line, are practicing on the half line, although Elliott is considered more valuable to his team as flying wing. Garcock, of Ottawa, looks like a fixture at quarter, with Capt. Moran at half back. Lennie and Hagyard will probably complete the back division. Smith, of Ottawa, is fast and a dead sure tackle at left outside, while the middle and inside wing positions are warmly contested for."

Queen's II and R.M.C. I. On Saturday next, the rugby season in Kingston will be formally opened, when Queen's and Royal Military College teams meet on Queen's athletic grounds in the intermediate series of the intercollegiate union. It is not expected that a very close game will be witnessed, but there is one thing certain, a good vigorous contest will result, for the Presbyterians and the cadets, when they meet, play from the drop of the hat.

Which Will Win. The dates are fixed and the Chicago Cubs and Philadelphia Athletics are waiting for the umpire to call play ball a week from next Monday. Who will win and why?

The Cubs have the benefit of experience, having participated in three world's series to date.

The Cubs are veterans who have played together for years.

The Cubs' team work is probably better than that of any team in the world.

The Cubs have infinitely better men behind the bat.

The Athletics have the best pitching staff, and in Cooney the greatest pitcher. His record is 46 consecutive innings without being scored upon.

The Athletics lead the Cubs in hitting and fielding.

The Athletics have the benefit of Connie Mack on the bench.

The Athletics are younger men and as a team have more speed than the Cubs.

The Athletics can rely upon the sacrifice hit because they have pitchers competent to win with a one or two-run lead.

The case running of the two teams is about even.

All Kinds of Sport. The American baseball league season closes Saturday.

An Ottawa Argonaut says that the Toronto Argonauts are dickerizing for "Jack" Williams.

The Canadian rules adopted in United States football are commended on all sides.

## A FEW DOSES END BACKACHE AND REGULATE THE KIDNEYS

ANY BLADDER OR URINARY MISERY SIMPLY VANISHES.

If your kidneys are disordered, or you suffer with backache or bladder misery a few doses of Pape's Diuretic will effect a cure.

Put an end to kidney trouble while it is only trouble—before it develops into Inguis, Dispas, Gravel or Bright's disease.

The moment you suspect any kidney, bladder or urinary disorder, or feel a dull, constant backache, or the urine is thick, cloudy, offensive or full of sediment, irregular of passage, or attended by a scalding sensation, begin taking Pape's Diuretic as directed.

With the knowledge that there is no other medicine at any price, made anywhere else in the world, which is

so harmless or will effect so thorough and prompt a cure.
