An Encouraging Message

I have a message of hope and good cheer, of encouragement and inspiration to every suffering woman. I have endured the tortures due to female troubles and the consequent despondency and mental agony almost to the point of despair, and I have been restored from this condition to a state of vigorous health, and to the happy, exhilarating frame of mind which accompanies physical well-being. This change has been brought about wholly by the use of **ORANGE LILY**.

In addition, I have had the privilege and pleasure of inducing multitudes of other suffering women to give **ORANGE LILY** a trial, and have received thousands of enthusiastic acknowledgments of the blessings it has brought to them. The following is a sample:

Truro, N. S., April 5, 1909.
Dear Mrs. Currah.—Your very kind letter was received yesterday. In reply to your question about my health, I am thankful to say that I am very well. As I have never given you a statement of my case you may be interested in it.

For several years I have suffered untold agony. This suffering was continuous, but I would have violent attacks every few weeks, each attack lasting several days. The first Sunday in November, I felt the pain increasing, and so did not go to prayer. The rest of the family did go, and soon after the forcing down pains seized me and I had to remain on the floor until their return. I was in great pain all night and was very sick for a whole week.

Then Mrs. L. came to see me and told me of your wonderful medicine. I got my husband to send for it right away, as I was too sick to write myself. (My doctor could do nothing for me.) I have used 6 boxes of **ORANGE LILY**, and have had three months of good rest, and am now well, never better in my life. I have not had the old pains since. I often ask my husband if it is myself that is going around and doing my own work. I can scarcely believe it. It brings tears of joy to my eyes. I could shout it to all the world.

Your friend,
MRS. E. H. F.

Receiving, as I do, dozens of such reports each day, I feel impelled to make known to my suffering sisters the merits of **ORANGE LILY**. It differs from other so-called remedies in that it is not taken internally. It is a strictly local treatment, and is applied directly to the affected organs. Its curative elements are absorbed into the congested tissues, expelling the stagnant foreign matter which has been irritating the membrane and oppressing the nerves, and a growing feeling of physical and mental relief is noticeable almost from the start. It is a positive, scientific remedy, and even if you use no more than the Free Trial treatment you will be very materially benefited.

FREE TRIAL OFFER

I want every reader of this, who suffers in any way from painful monthly periods, irregularities, headache, indigestion or congestion of the womb, to send me the back, to send me their addresses, and I will forward at once, without charge, 12 days' treatment. If your case is not far advanced it may entirely cure you, and in any event it will do you much good. I am so earnest in making this statement, and so positive that it is true, that I trust every sufferer who reads this notice will take advantage of my offer and get cured at home, without a doctor's bill. Address, enclosing 3 stamps, **MRS. FRANCES E. CURRAN, Windsor, Ont.**

HECLA FURNACE
Is Guaranteed Gas-Tight and Smoke-Tight

20 years use has proved the strength of this guarantee.

In the "Hecla" Furnace, the cast iron top and bottom and the steel sides, are fused. That is, they are heated at white heat until they become practically one piece of metal.

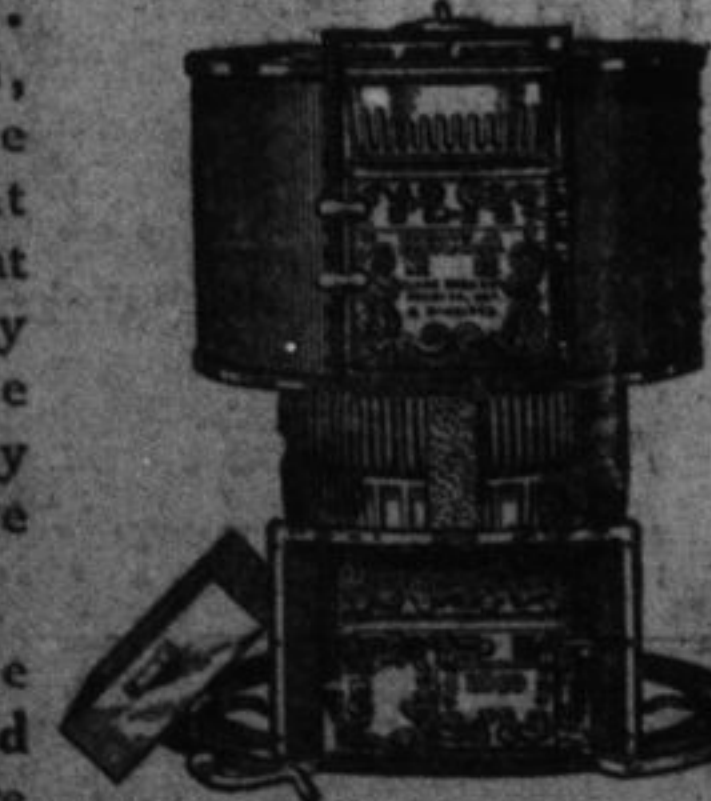

These Fused Joints are absolutely and permanently tight. There is no opening, nor any possibility of there being an opening, between the fire and the warm air chamber.

20 years use, proves this.

Fused Joints are a perfect guarantee against smoke, gas and dust in a "Hecla" heated home.

No other furnace has Fused Joints—they are exclusive "Hecla" patents. Insist therefore on a Hecla.

If you are going to put in a new furnace this year, let us plan the heating arrangements, and tell you just what it will cost to install the right furnace to heat right. Write for free copy of our book "Hecla Heated Homes."

SERMON FROM SHAKESPEARE

O that a man might know the end of this day's business ere it comes! But it sufficeth that the day will end. And then the end is known.

Julius Caesar, Act V, Sc. I.

Every general has, like Brutus, on the eve of battle longed in his heart to know what success would attend his efforts. It is well that the end can not definitely be foretold. If any army were sure of defeat it would rush in a panic from the field at the approach of the opposing force. If it had absolute assurance of victory it would not put forth the effort that would make it strong for future battles. The battle will end, that is sufficient. Let every effort be put forth to win a decided victory.

Brutus is not the only individual who has longed for definite information with regard to the future. The desire to have accurate knowledge of coming events is universal. Witches, wizards and astrologers, professing to be able to foretell events, did a flourishing business in the pre-scientific age; and in modern times palmists and fortune-tellers of various kinds still find their dupes. Curiosity with regard to the fate of one's business or life has induced many to seek those who profess to be able to look into the books of time and tell which grains would grow and which would not. This curiosity is a sign of weakness and impatience. It marks a tendency to lean upon others; the wise man can approximate at his own knowledge. There will then be no over-anxiety about it, no vain curiosity to know what is or is not to be the ultimate outcome of present actions.

Would it be well if the future were an open book and the end known? No worse fate could befall a man than to know the success of the few. A thousand norns struggled to live their lives for every oak that grows to majestic proportions. The success of any one individual is in a sense the product of the efforts of hundreds who have seemingly failed. Let it be supposed that a man knew that on a definite day in a given year he was to die! What would likely be the effect on him? If he were a peculiarly strong man he would work with energy to complete as many tasks as possible before his death. The majority of men would, however, be enervated by the shadow of the day of doom. It would press upon their imaginations with unbearable heaviness. They would be like the condemned man from whom all hope has been taken, counting the hours till his execution.

The great beauty of life is that the end of each day's business is concealed. With rare exceptions all men are confident of long life and that success will crown their present efforts. If it were not so effort would cease. The average man, if he knew that he had but a year to live, would fold his hands and cease toiling. Yet in that year he might accomplish something worth the whole of his previous existence. Again, if the ultimate fate of each individual were known, what unhappiness would be in the world! When incurable disease has taken hold of friend or kindred sorrow presses heavily upon the hearts of companions and relatives. Until the fatal hour arrives those in close contact with the victim suffer greatly from the mere knowledge of the inevitable. If the death hour of each individual were fixed in the calendar as are feast days, hope, which "springs eternal in the human breast," would be non-existent; and hope is the star that guides, the sun that brightens man in his journey through life.

Suppose, once more, that business success or failure could be accurately foretold. Would this knowledge be conducive of energetic action? What would be the use of toiling late and early, of studying and planning, if in the end failure for the individual was sure. It denotes discontent; the knowledge of their business future is concealed from men. All are confident that the end of the day's business will be success. It is this confidence that has made men great inventors and producers. Of the thousands who put forth effort but few are successful from the world's point of view. The way-side is white with the bones of those who have failed. And yet they have not failed, their efforts have encouraged others. The foundation stones of a cathedral are hidden from view, they attract no attention, yet they are vastly more important to the structure than the golden dome which inspires admiration in the multitude. Every worker may be a humble stone in the foundation of some noble enterprise. Should he know that his ambitions would never be realized his heart would cease to hope and his hands to work.

It is a blessing that the future is a closed book; that the end of the day's business is concealed. The end is coming, and there is much to be done. The crown of successful achievement may be yours, but it will not be won by sitting idly by and awaiting the inevitable doom.

ON ONTARIO LINES, Grand Trunk Installs Telephone Dispatching System.

The Grand Trunk Railway System have recently placed in commission on their Northern division, two telephone train dispatching circuits. One circuit is between Parkdale Junction and Burlington Junction, via Allandale, a distance of 145 miles, and the other between Allandale and Nipissing Junction, a distance of 165 miles. Train dispatchers on each of these circuits are located at Allandale.

On the circuit between North Parkdale Junction and Burlington Junction there are twenty-one way stations, and on the circuit between Allandale and Nipissing Junction twenty way stations. These circuits are constructed of No. 9 gauge hard-drawn copper wire, transposed at intervals of every half mile through the open country and are more resistant as is necessary in the vicinity of high voltage power lines, in order to avoid inductive influences and to render the telephone circuits absolutely quiet. The station equipment is of the latest and most modern type on the market, and consists of a swinging arm transmitter and hand-held receiver for each way station, thus giving the operator the free use of his head, hands and body while using the telephone. The apparatus is swung to one side out of the way while not in use. The train dispatching office is equipped with a selector system for calling offices and the duration of the ring in each way station is controlled by the dispatcher, who plainly bears the ring through his receiver. Any office on the line can be signalled within eight seconds, and, as the signal bell in each office consists of a four-inch gong, there is little doubt but what the operator will hear the call, even though outside of the office and at a distance from it. The dispatcher has absolute control of the circuits and way stations must obtain his co-operation when desiring to communicate with one another.

The telephone is considered superior to the telegraph as a medium for dispatching trains, both as a factor of safety and a saving of time. By telephone each station and numeral is first pronounced and then spelled out letter by letter, by the dispatcher for verification when an order is issued, and repeated in like manner by the receiving operator; while by telegraph stations and numerals can only be spelled out in Morse characters.

During the past three years the telephone has made rapid strides on trunk line railways in the United States and Canada for train dispatching purposes and, to-day, over thirty thousand miles of railway are being so dispatched. While the expense of constructing and equipping telephone circuits greatly exceeds that of constructing telegraph lines, the railways have obtained so much better results with the telephone that they feel justified in spending the money.

It is understood to be the intention of the Grand Trunk railway to extend the use of the telephone over its more important lines in the near future.

The new system has met with the immediate favor of the dispatchers and operators, the transmission being so excellent that the work is transacted in fully fifty per cent. less time and in a more personal and satisfactory manner than is possible with the telegraph.

CEETEE UNDERWEAR
Guaranteed Unshrinkable Pure Wool

Ill-fitting underwear ruffles the temper and irritates the nerves.

That's why people who know look for the "sheep" trademark on every garment of underwear. It's an absolute guarantee of comfort—the mark of distinction in underclothing.

"CEETEE" Underwear fits snugly and wears well, because—it is made from the finest Australian Merino Wool—insist on your and knit to the form—comfortable from first to last. Don't simply ask for "Underwear"—insist on your dealer showing you "CEETEE."

Look for the "sheep" in all lines for men, women and children.

THE C. TURNBULL CO. OF GALT, LIMITED - Established 1859 - GALT, ONTARIO

It Pays For Itself

Figure it out in dollars and cents. If you can make five tons of coal last as long as six tons and with coal at \$6.00 a ton, don't you make \$6.00 clear. Now the cast iron range illustrated will save 20% of your fuel when hard coal is burned. It is fitted with that greatest of modern stove improvements the

GURNEY-OXFORD ECONOMIZER

It is a device that is put on Gurney-Oxford Stoves alone, and in putting them out for your inspection we feel justly proud of the choice we have made in selecting this line of satisfaction giving stoves. Look them over on our floors.

NEW YEAR'S IN OCTOBER.

A Writer Refers to the Jewish New Year's.

By Rev. J. M. Farrar, D.D.

New Year's in October makes you sit up and think. If you think hard enough, you can lean back and rest. You never heard of New Year's Day coming in October? January 1st, you say, is New Year's Day. True it is that January 1st is our day, but we are not the only people in the world. The Jews are very much older than we are, and their New Year's Day came on October 4th. We date our New Year from the birth of Christ. The Jews date their New Year from the creation of the world. They believe that the world was created 3,760 years and three months before the birth of Christ.

First, the home life of the Jew. In the Jewish home more children are born and fewer die than among any other class of people. Every child is welcomed and loved. In the Jewish home the children honor their parents. As father and mother grow older they are treated like a king and queen. If you will visit the poorhouse in your county or state you will not find a Jewish father or mother there. Jewish parents love their children and Jewish children love their parents. A Jew organized in New York the pure milk supply for babies. As a result the death rate among little children has dropped from ninety-six to sixty-three in every thousand. Second, the Jew in American history. A Jew gave the money to send Columbus on his voyage to America. Queen Isabella had pawned her jewels some months before and did not have any left to pawn for Columbus. Luis de Santangel furnished the money for Columbus. The map of Columbus used was drawn by a Jew. One of his officers, his doctor, and his interpreter, were Jews. The interpreter stood on American soil first.

After living in every country in the world the Jews selected America as their Promised Land. In 1664 they came to America and on April 25th, 1665, they were given the legal right to make it their country. Now 2,000 years they had been without a country and without a flag. In New York city we have ten times as many Jews as there are in the Holy Land and thirty times as many as dwell in Jerusalem. In twenty-eight of our public schools were found 61,605 children, and of these 61,105 were Jews.

About twenty years ago the New Testament was, for the first time, printed in Hebrew. So many of the Jews wanted to read about Jesus that 600,000 copies of a Hebrew New Testament were printed. It is believed that there are 250,000 Jewish Christians. Three thousand converted Jews are preaching the Gospel.

It's the easiest thing in the world to apologize when you are in the right. The undertaker may be slow—but sooner or later he will overtake you. Never do until to-morrow the mean things you contemplate doing to-day. He is a wise man who doesn't strive to know too much.

This Enormous Plant is the Result of 50 Years' Experience in Making JERSEY CREAM SODAS

and hundreds of varieties of Fancy Sweet Biscuits and Confectionery

Established in 1858 by T. McCormick in a very small shop, about 12 by 18 feet.

Now, look at the picture of the largest biscuit and candy factory in Canada, owned and managed by his three sons.

The factory is also the most modern on this continent—is thoroughly ventilated and kept scrupulously clean.

A wonderful business growth—won solely on the High Quality of McCormick's Products.

MCCORMICK'S JERSEY CREAM BISCUITS SODA

McCormick's Biscuits are Exclusive in Quality and Pre-eminently the Best.

A CONTINENTAL REPUTATION.

Great numbers of discriminating American women-visitors to Canada have pronounced McCormick's Jersey Cream Sodas vastly superior to the American crackers. They have even insisted on the factory shipping a supply to their grocers, stating that they were willing to pay the duty if, by so doing, they could enjoy such a luxury.

Now, why don't you try McCormick's Jersey Cream Sodas and prove their superiority?

Ask your grocer for 3-lb. tin—or a 10-cent package.

And see that "Little Lord Fauntleroy"—our trademark—is on the package.

They are made from Best Blended Flour, First Quality June Creamery Butter, Fresh, Sweet, Whole Milk, Pure Sugar, etc.

All materials are analyzed by an expert chemist and therefore McCormick's are in a position to guarantee the Purity and Quality of their biscuits.

No other Biscuit Factory in Canada employs a chemist to insure wholesomeness of its biscuits.

So perfect is the manufacturing system that McCormick's Biscuits are baked, packed, labeled, sealed and ready for shipment in about one hour from the time the dough leaves the mixing room. This, coupled with an enormous daily output, insures daily delivery of fresh, crisp biscuits to all parts of Canada.

To produce biscuits like McCormick's has taken a life time of study by expert bakers and large expenditures in experimenting.
