

# Try HUNT'S For a Natty Hat

The Shirt Collar and Tie Store of the city. Collars in 4 sizes.

53 BROCK STREET

If you're interested in good shoes—better shoes possibly than you have been in the habit of wearing—we'd like to show you the new Fall models, and talk shoes with you.

We offer nothing in the way of any particular sentiment which will appeal to a Man to buy his shoes here.

We found our plea for your trade rather on the basis of good common sense and good shoes. Every Man wants the best shoes his money can buy. It is against this measure of goodness we put up in our Men's shoes and offer splendid values at such moderate prices as—

\$3.50, \$4.00 and \$5.

Box Calf, Gun Metal and Patent Calf. Blucher cut, Straight Last and Button styles. All toe shapes—some vulcanized and some double soles. All sizes and widths.

We'll stake our expectation for your patronage on these shoes, and it will be a good proposition, sir, to test them.

## J. H. SUTHERLAND & BRO. THE HOME OF GOOD SHOES.

THE HONEYMOON SPECIAL IN LEW FIELD'S "MIDNIGHT SONS," AT THE GRAND ON WEDNESDAY, OCT. 20TH.

**Wellman's Balloon Failure.** Montreal Gazette. Walter Wellman has figured in connection with a number of big projects that had small results, and when he talked of starting on a balloon voyage across the Atlantic there were doubts if he would accomplish anything. He started, however, and the result of any lack of courage on the part of himself or his crew. His airship was not equal to the task put upon it, and he had to abandon it. He was fortunate in being able to do so in safety. His experience, like that of Andre and Franckel in their effort to reach the pole by balloons, will be rather discouraging to those who have thought of voyaging by air across uninhabited regions. Much has been done in perfecting devices for air navigation, but much more must be done before transoceanic voyages can be undertaken with a reasonable hope of being completed.

## A Delightful Hair Dressing That Makes Hair Grow

**Favorite With Men and Women the Country Over.**

There is a reason for the phenomenal sale of Parisian Sage in the dominion since it was first introduced into Canada.

And the reason is plain to all. Parisian Sage does just what it is advertised to do.

Ask J. B. McLeod about it. He will tell you that he regularly guarantees it to cure dandruff, stop falling hair or itching scalp in two weeks on money back.

There is no reason whatever why any man or woman should fail to take advantage of the above generous offer.

Parisian Sage is famous in its peculiar power to turn the harsh, untractable hair that many women possess into luxuriant and radiant hair in a short time. Women of refinement the country over are using it and it never disappoints. Read this letter:

"I had Parisian Sage a good hair remedy. My brother has also used Parisian Sage and says it is fine. I found that it was a great hair tonic and cleanser. I have used other pre-

parations but Parisian Sage cleaned the scalp, stopped all irritation, made my hair thick, silky, and left no trace of stickiness as some other hair tonics had."

Mrs. Sarah Sanderhoff, 1403 N. Washington street, Owasco, Mich., June 22, 1909.

Sold by leading druggists everywhere and in Kingston by J. B. McLeod, for \$1.50 a large bottle. The girl with the Auburn hair is on every package. Mail orders filled, charges prepaid, by the Canadian makers, Citron Mfg. Co., Fort Erie, Ont.

"I had Parisian Sage a good hair remedy. My brother has also used Parisian Sage and says it is fine. I found that it was a great hair tonic and cleanser. I have used other pre-

## QUEEN'S WON EASILY THE PERSONALITY

DEFEATED OTTAWA COLLEGE OF CHRIST SUBJECT OF THE DEAN'S SERMON.

Kingston Collegiate Defeated Queen's III. by 20 to 4 in the Junior Game—"Ken" Williams, of the Montreal, in the City.

Poor old Ottawa College! Queen's 25, College, 2. The students from the capital city came to Kingston with the hope of carrying home a rugby victory, but oh how sad they went away. It was Queen's all the way. The Ottawa College team is evidently not in the same class with the organization of the sister universities. It possesses the essential weight but fails to use it to advantage. Its only redeeming feature on Saturday was its ability to hold Queen's on the majority of her backs, although when Elliott hit the line a perforation was generally the result. The Ottawa backs fumbled miserably and were frequently guilty of an unpardonable offense in passing the ball behind their own line. No footballer with reasonable experience would ever resort to such a hazardous move. The speedy

On Sunday Night—Christ the Pattern for Men and Women—Knowledge of His Father's Laws Secret of His Power.

The first of a series of six monthly sermons to students was preached by the Dean of Ontario in St. George's cathedral, on Sunday night. His subject for the course is "Lux Mundi," and last night he spoke of the personality of Christ, his text being, "What manner of man is this?" It was generally admitted, said the dean, that the personality of Jesus Christ is the characteristic of the Christian religion. It has its theology, its ethics, its philosophy, but its core is the one unique Personality—His relation to Him. Human personality is almost impossible to define. We all know what we mean by it, but find it hard to put it into words. The nearest we can come to it is to describe it as the power, a man has of impressing himself, his thoughts and convictions upon the life of his fellows. Personality is the greatest gift God has given man, a gift that has often been made wrong use of in this world.

WILLIAM DOBSON. Who is now a fixture on Queen's half-back line.

Queen's wings never once allowed their opponents to get away for anything that looked like a run; Smith, Slicer and Elliott got them all.

The Queen's back division is an splendid piece of football mechanism. Seldom did the cogs clog. Leckie caught and kicked the pigskin to the king's taste and his several prolonged runs were the happy faculty of being able to throw his arm, either right or left, in throwing off his opponents when he is on the run. "Billy" Dobson made his initial appearance, and gives promise that before the season is over he will be one of the best in the intercollegiate. "Jobie" is in first-class condition and made several substantial gains for Queen's. Elliott, in spite of the painful gnawings of a nasty knee, was into the harness again playing his usual horse-of-egame. When "Ed" starts on a run he does not stop at any of the flag stations but goes right through, and usually, as was the case on Saturday, carries with him several of his opponents. The pig fellow was in his right place. He is without doubt the most valuable wing man in the college association. Smith and Slicer are as speedy and neat a pair of kickers as could well be wished for. They both know their game and seldom fail to get their man. The Queen's scrimmage clearly demonstrated that they are capable of holding a whole lot more than Ottawa College.

The game was anything but an interesting exhibition of football. The spectators tired of the almost unvaried monotony of Queen's scores, and had it not been for the several special stunts performed by the wearers of the tri-color, it would have been a poor affair from the onlooker's viewpoint. Queen's got over for two touches, one on straight kicking in the first quarter, and in the final period, when Hugh Young stole the ball at ten yards. "Paddy" Moran did not fail to put on one of his sensational "drops." He endeavored to repeat the stunt in the last quarter, but kicked into the line.

Queen's gathered in ten points in the opening quarter, and the tri-color, eight in the third and six in the final period. Ottawa obtained their victory in the second quarter.

Dr. Etherington and E. O. Slicer satisfactorily substituted in the unavoidable absence of Dr. Patterson and "Marty" Walsh.

The teams lined up as follows: Ottawa—Full back, Mulligan; halves, Shesby, Quilty, Smith; quarter, Nagle; scrummers, Lofius, Lacey, Whibbs; wings, Sullivan, O'Halloran, Brown, Harrington, Kennedy and Gilligan; Queen's—Full back, Leckie; halves, Moran, Dobson, Cook; quarter, Reid; scrummers, Ovesand, Bruce, Kinisla; wings, Slicer, Elliott, Eskine, Young, Smith, M. Smith.

Ottawa Citizen's Comment. The Ottawa Citizen blames the bad fumbling of the Ottawa College backs for the loss of the game at Kingston on Saturday, but concedes Queen's had the better team. It remarks: "During the intermission the Queen's University band struck up lively music and kept the crowd, which was composed mostly of local students, in good humor. It was the first time the band has appeared in public, and it received a great ovation."

"Ken" Williams in Town. "Ken" Williams, half back of the Montreal rugby team, dropped off here yesterday, to visit his father and mother, on his way from Toronto to Montreal, after the rugby match with Argonauts on Saturday. He said that Montreal was crippled at present by the temporary loss of two half backs and a quarter, and that was the reason of Argonauts' victory by the small margin of one point. Of course, Argonauts have improved in their play since they met Montreal on the latter's grounds. Next Saturday, Montreal will have a home game with the Hamilton Tigers.

But there is one Personality that stands apart from all the rest, the Personality of the man, Christ Jesus, who was morally perfect. Should it be objected that this very moral perfection might be a barrier between our God and us, that weak nature would demand like weakness that there be sympathy, we answer, Who was it, Who while on earth attracted sinners? Where has there ever been such sympathy with moral imperfection as was in Him from Whom men then and still to-day receive power to overcome?

Christ was unique in that he based His authority for His teaching on Himself. "Moses said, But I say unto you." He had no hesitation in revising a code which He, Himself acknowledged, had divine authority. He did not direct those that listened and were heavy laden to go to a higher power than Himself. "Come unto Me," He called.

"Did it ever occur to you," said the preacher, that Jesus Christ was the ideal for women as well as for men. Not a virtue we can conceive for noble manhood or noble womanhood, but we can find in Him. He had the splendid capacity for leadership which is a characteristic of the best men, side by side with the unselfish tenderness that is our highest conception of all that is best in woman.

Touching on the supernatural power of the Divine Man over material things the dean said the explanation seemed to lie in the fact that the Son of God, in harmony with the will of the Father that He knew the workings of the laws governing spiritual things, was it any marvel that He should also understand the Father's laws in regard to material things? Was it any wonder that He should be able to cleanse a body from sickness and more marvellous than the cleansing of the soul from sin? The centurion before the cross answers the question of the text "What manner of man is this?" by the words "Truly this man was the Son of God,"—nothing short of that explains Him.

"I have called these sermons which I hope to preach to you 'Lux Mundi.' Let us turn towards that Light, and try to understand what that Personality can be to us. To the young, I would say, 'Do not be ashamed to take as your guide the God-Man, Christ Jesus, who says to you as He said to the disciples long ago 'Follow Me.' Ask the old if they have ever regretted following Him, and then if He ever failed their trust.' He asks for the life of us all. Let us give it.

In simple trust like those who heard it fitted, at Best's."

The gracious calling of the Lord, May we like them, without a word, Rise up and follow Thee.

**At First Baptist Church.** In the absence of the pastor, Rev. D. Laing, who is attending the Baptist convention, at Toronto, Rev. A. Laird preached at the First Baptist church, Sunday morning, and delivered the sermon, "In the evening, Dr. E. J. Lake had charge of the service.

"Orchid cream" makes rough skin soft as velvet. Sold at Gibson's Red Cross Drug Store.

William Lever, of Rees Bros', staff, has returned from a week's hunting trip up the river.

Eyes tested free and glasses properly fitted, at Best's.

John Hughes, William street, left today, on a business trip to Winnipeg.

"Rapid shave powder," makes shaving a pleasure. Sold at Gibson's Red Cross Drug Store.

Supplemental examinations in theology began at Queen's University today.

Wine of Cod Liver Oil, in 50 cent bottles, at Best's.

Mrs. Warner, Napawa, is with the Misses Clark, University avenue.

Jacob Hatten, Chicago, is visiting his cousin, J. Gawley, Glenvale. Furs dry cleaned, My Valet.

**What the Guards Want.** Penitentiary guards say they want not only increased pay, but shorter hours. At present, owing to the reduction of their number through several dismissals and suspensions, and also resignations, they have had to do much extra work, as the vacancies have not been filled.

## GOOD SHOES FOR WOMEN

THE RESTSHU is a thick Flexible Sole Shoe—made for comfort—at the same time full of style.

Price, \$4.50

We also have wonderful \$3.00 VALUES in Women's Up-to-Date Shoes—in lace and button, in patents, gun metals, kids; also gun metals with cloth tops.

Inspection Invited.

## ABERNETHY'S

### CHURCH AND MASSES

**WHY SO MANY REMAIN FROM PUBLIC WORSHIP.**

Rev. T. E. Bourke Gives the Reasons—Like Christ, the Church Must Have Boundless Compassion for Men.

A large congregation assembled in Brock street Methodist church Sunday evening to hear the pastor, Rev. T. E. Bourke deliver the second sermon of the series of sermons to young men. The preacher announced his text, Matthew 23, 35, "But when he saw the multitudes, he was moved with compassion on them." This passage reveals the heart of Christ to ward the masses, said the preacher. To fulfill his mission, the church must have boundless compassion for men. The preacher advanced further reason why the masses are away from the church—

1. Some say that the socialistic movement of our day, and the labor unions and lodges are responsible for the drift from the churches. There is no doubt but the most radical of the socialists are opposed to the church, and many find in socialism a substitute for the church, and thousands of others find in the labor unions which have done so much for the betterment of human conditions a substitute for the church. Where the church has not been openly antagonistic to such movements, it has allowed them to develop without the guidance and sympathy of the church. If such movements help to lighten the load of the toiler and better human conditions, then the church ought to be sympathetic toward helping to correct their mistakes and helping them to be a greater power for the betterment of human conditions.

2. Others say that the drift from the church is characteristic of modern life. The body is so weary as the nerves are so exhausted that by the time Sunday comes along an easy conscience does not find it difficult to get an excuse to remain away from the church.

3. Some others say that the drift is partly due to the fact that conditions have so changed. In former days the pulpit was about the only source to get on with their reasoning. They argue with themselves that "cause their stomachs do not do the work given them, they must be given less work, in other words, they must be starved. It would be just as sensible for a business man who is unable to do all his own work to cut down his business to his own capacity as it is for a man to starve himself to relieve his stomach. The sensible business man employs a lady and goes forward with his business. Likewise the sensible dyspeptic will employ help for his stomach and give his body proper nourishment.

Stuart's Dyspepsia Tablets actually do the work assigned to them. They relieve weak and overburdened stomachs of a great portion of digestive duty. Their component parts are identical with those of the digestive fluids and secretions of the stomach and they simply take up the grind and carry on the work just the same as a good, strong, healthy stomach could do it.

On this account Stuart's Dyspepsia Tablets are perfectly natural in their action and effects. They do not cause any unnatural or violent disturbance in the stomach or bowels. They themselves digest the food and supply the system with all the nourishment contained in what is eaten and carry out Nature's plans for the sustenance and maintenance of the body.

How much more sensible is the method than that employed by many sufferers from weak stomachs. By this means the body and brain get all the good, nutritious food they need and the man is properly nourished and equipped to carry on his work and reform his habits. He could not possibly be in proper working condition by starving himself or employing some untried, insufficient food that does not contain enough nutriment for a year-old baby. A strong man doing strong work must be properly fed and this applies to the brain as well as the body.

Stuart's Dyspepsia Tablets, by relieving the stomach of its work, enable it to concentrate and regain its normal health and strength. Nature repairs the worn and wasted tissues by starving himself or employing some untried, insufficient food that does not contain enough nutriment for a year-old baby. A strong man doing strong work must be properly fed and this applies to the brain as well as the body.

Miss Beatrice McKeandry, of Brewer's Mills, is the guest of Mrs. I. Jenkins, University avenue.

### WORK OF THE CHURCH

Emphasized by Rev. T. W. Savary, on Sunday.

In his sermon, on Sunday morning, Rev. T. W. Savary, of St. James church, referred to the work carried on by the various organizations within the church, and emphasized the duty of each member to take a share in the work. It was his duty, he pointed out, for every member to take part in some branch of the work of the church. Some had talent for teaching in the Sunday school, others for singing in the choir, and so in the different branches of the work, and it was their duty to attend this work.

The speaker made an eloquent appeal for service and was listened to by a good-sized congregation.

**R. A. FOWLER, EMERALD, ONT., Wants to Have All Tax Exemptions Abolished.**

R. A. Fowler writing in the Canadian Forum says: "The best thing the dominion government would do for agriculture would be to pass an act that would abolish all tax exemptions. Any church, institutions or industry that cannot get along without the public paying its taxes, should go out of business. The farmer is far the heaviest taxpayer. It would not only lighten his burden but would give a tremendous 'boost' to the whole country."

**To be Married Thursday.** Mr. and Mrs. E. T. Bennett, Ottawa, have sent out invitations to the marriage of their fourth daughter, Eva Alice, to David Lorne Jackson, formerly of Kingston; the wedding will take place on Thursday, Oct. 27th, at home after 11 o'clock, at 93 Brock street, Ottawa.

Mrs. Priscilla Davis, Thurlow, died rather suddenly on Thursday night, heart trouble being the cause of death. Deceased was eighty-seven years of age.

**THEY ACTUALLY DO THE WORK.**

**Food Eaten is Worthless Digested—Some Stomachs Must Have Help.**

Food taken into the stomach which, from the nature of the food or the condition of the stomach, is not digested, is worse than no food at all. This is a true statement as far as it goes and a great many dyspeptics go only this far with their reasoning. They argue with themselves that "cause their stomachs do not do the work given them, they must be given less work, in other words, they must be starved. It would be just as sensible for a business man who is unable to do all his own work to cut down his business to his own capacity as it is for a man to starve himself to relieve his stomach. The sensible business man employs a lady and goes forward with his business. Likewise the sensible dyspeptic will employ help for his stomach and give his body proper nourishment.

Stuart's Dyspepsia Tablets actually do the work assigned to them. They relieve weak and overburdened stomachs of a great portion of digestive duty. Their component parts are identical with those of the digestive fluids and secretions of the stomach and they simply take up the grind and carry on the work just the same as a good, strong, healthy stomach could do it.

On this account Stuart's Dyspepsia Tablets are perfectly natural in their action and effects. They do not cause any unnatural or violent disturbance in the stomach or bowels. They themselves digest the food and supply the system with all the nourishment contained in what is eaten and carry out Nature's plans for the sustenance and maintenance of the body.

How much more sensible is the method than that employed by many sufferers from weak stomachs. By this means the body and brain get all the good, nutritious food they need and the man is properly nourished and equipped to carry on his work and reform his habits. He could not possibly be in proper working condition by starving himself or employing some untried, insufficient food that does not contain enough nutriment for a year-old baby. A strong man doing strong work must be properly fed and this applies to the brain as well as the body.

### STEAMER ON SHOAL

BELLEVILLE MET MISHAP BE-LOW ALEXANDRIA BAY.

Released by Calvin Company, and Came to Kingston—She Escaped Damage—Only a Few Bolts on Her Huller Were Loosened.

The steamer Belleville, of the Rich-leau and Ontario Navigation Company, ran on a shoal late Saturday night close to the Sisters Islands in the vicinity of Alexandria Bay. She was running full speed, and was making good time when she struck. It was an account of the fact that the night was so dark that she went on the shoal. The blackness was so intense that the lights could not be distinguished along the shore, consequently she ran on her course. She struck hard and fast near the stern. A call was sent to the Calvin Company, and it quickly dispatched a tug of assistance. She had considerable cargo on at the time and most of this was moved forward to lighten the stern. The tug arrived at the scene of distress somewhere about midnight, and worked until Sunday noon before she was liberated. She came on up to Kingston under her own steam. In spite of the fact that the run on hard, but every little damage was done. The only damage was a few loose bolts on the huller.

The Belleville is one of the most seaworthy boats on the lakes to-day; it is not for this fact she would have been damaged to some extent. The crew are at a loss to understand why she came off so badly. The usual she ran on an "extremely rocky" reef, and it was a miracle that she was able to proceed on her way unassisted.

**Movements of Vessels.** The government boat Scout was in port over Sunday.

The steamship Westport cleared for Rideau canal ports, with freight.

The steamer Missisquoi made trip to Kingston on Saturday from Gananoque.

The tug Cardinal and barge were in port over Sunday on the way to Charlotte.

The steamship Waterloo passed down on her way to Brockville, Saturday.

The steamship Mary Louise, loaded with freight, cleared on Saturday for Rideau canal ports.

The steamer Midland Queen, passed down on Saturday morning, loaded with grain from Fort William.

A large number of vessels, tied up on Saturday on account of the storm, were able to clear on Monday.

The steamer Belleville unloaded her cargo of wheat, at Richardson's wharf, and cleared for the upper lakes.

The tug Edmund and barge Columbia, loaded with lumber, arrived from Padford Mills, on the way to Ogdensburg.

The gas buoy in the middle ground at Vine Mile Point went out on Saturday night. The steamer Scout is replacing it.

The steamship John Randall cleared from Richardson's wharf, with grain for Washburn. The barge Valentin is also loaded grain at this elevator for Montreal.

Marine men state that there is talk of some of the Canadian and American vessels being laid up, owing to lack of trade. There is no grain demand for grain, just at the present time.

M. T. Co's elevator, The Emerson, from Montreal, with four light barges, cleared from North Fairhaven, for barge Dunmore, loaded with coal for Montreal; steamer McKinstry, from Fort William, with grain, is expected during the afternoon to discharge.

The steamer Renville arrived at Richardson's elevator, Saturday forenoon, with grain, from Fort William, and the crew reported a rough passage on the lake during the night. Quite a lot of rough weather was experienced on the way down, and this caused some delay.

At Swift's wharf: The Waterbury, coaled yesterday on her way up the lake; steamer A. E. Ames stopped on her way up, Sunday, and discharged considerable freight; Britannia passed down, yesterday; steamer Belleville stopped yesterday and coaled; steamer Brockville down and to-day.

The barge P. B. Locke, while discharging a cargo of coal at the malt house wharf yesterday, had quite an exciting experience. A terrible sea was running so high that the ways washed right over her rail. It was with difficulty that she was kept right side up. While being washed around in this fashion, she sprung a leak. The pumps were set to work, keeping her free of water, and had to be kept going all day, Sunday. On Monday morning she was brought to the Kingston dry-dock and will remain there for repairs. At the time the vessel sprung the leak, she had about half her cargo still on board, and this made it difficult to keep her upright.
