WANTS KINGSTON'S AID.

In Having Electric Line Run From Ottawa Here.

At the city council meeting last evening, Ald. McCann, chairman of the industries committee, handed a letter to the city clerk, from G. L. Dickinson, ex-M.P., Manotick, asking city to interest itself in connection with the electric railway which it is proposed to run from Ottawa, via Perth, to Lanark village. He thought that it would be a good thing if the line was continued along the west bank of the Rideau to Kingston. A meeting of the projectors is to be held in Ottawa on November 2nd, and he suggested that Kingston either send a representative or forward its views on the matter. It is proposed to operate the road under provincial charter, so as not to conflict with the Dominion charter granted to the Kingston, Smith's Falls and Ottawa railway company. What is really wanted is to find out what inducements Kingston would offer if the road was carried through this far. The council referred the matter to the industries committee, which will likely send a representative to the meeting.

THE FRONTENAC LOAN & INVESTMENT SOCIETY.
ESTABLISHED 1868.
President—Sir Richard Cartwright. Money loaned on City and Farm Properties. Municipal and County Debentures. Mortgages purchased. Deposits received and interest allowed.
S. C. McFILL, Managing Director.

Arrivals and Departures of Vessels at this Port.

Tug Mary Louise, at Locomotive works, with brick from Waddell's.

The schooner Julia B. Merrill arrived at Collins's Quay, with coal, from Origo.

There is quite a demand for pressed hay at Fort William, and during the past few weeks, several of the steamers have been loading hay, at Wolfe Island and Howe Island.

At Swift's wharf, Steamer Glenella called on her way to Wolfe Island to load hay; steamer Belleville cleared for Toronto last night; steamer Aletha down and up to-day.

The steamer Sowards arrived from Origo, with coal for Sowards. She had to come away without the schooner, Major Ferry, owing to the fact that the schooner could not be loaded until to-day.

The steamer Alexandria was so crowded with freight, when she arrived at Polger's wharf, Monday night, on her way to Montreal, that she was unable to take all the freight that was waiting for her on the wharf. She has a large cargo of cheese and apples, from Fleton, and put on some more cheese in Kingston.

Owing to the fact that the water is getting very low in the river, nearly all the grain, coming down from Fort William, is being transhipped into barges at the M.T. Co's elevator, in this city, instead of going on to Montreal. The grain is being transhipped into the barges, and the barges are sent on to Montreal, with very little delay.

M.T. Co's elevator: Steamer McKinstry, cleared for Belleville, to load cement, for Fort William; tug Mary, from Montreal, two light barges; steamer Kinmount, from Fort William, transhipped 72,000 bushels of wheat, into barges; cleared for Fort William; light steamer Glenmount, from Fort William, transhipped 73,000 bushels of wheat into barges, and cleared for Fort William; tug Gladys cleared for Montreal, with two grain barges; tug Emerson, cleared for Montreal, with four grain barges; tug Thompson, arrived from Montreal, with four light barges.

Are You Losing Weight?

PROUSE'S EMULSION
COD LIVER OIL

SOLE PRICE, 50c.

PROUSE DRUGGIST
Opposite St. Andrew's Church.
KINGSTON, ONT.

Part of Old Cabstand.

The claim of the cabmen of No. 490, who are petitioning the city council to be allowed to stand a couple of cabs alongside their new office at the corner of King and Clarence streets, is that the allowance of their request will simply be the restoring of a portion of the old cab stand. In former years the cab stand included the portion of the block on Clarence street, which the No. 490 men wish to use. As the express company no longer occupies the corner, they think they have as much right to stand cabs alongside the Clarence street side of the building as the company had to stand its wagons on the same spot.

Own Your Own Home

Don't borrow a house to live in at so much a month.

Think of the pleasure and satisfaction of standing on your own door-step and knowing that it is yours—yours to hold for life. If you so desire, then the little improvements that you make from time to time, such as fruit trees, shrubbery, vines, flower gardens, etc.—all these and many others will be yours. They will not only add to your comforts, but will make your home more valuable from a monetary standpoint.

HALLS OF QUEEN'S VITALITY OF RACE

DRAMATIC CLUB TO PRESENT SHAKESPEARE PLAY.

Freshmen's Reception on November 3rd—Arthur Craig Has Started Practices With the Glee Club—Other Queen's News.

By Our Queen's Correspondent.

Practical and concluded by a great deal of hand-shaking and greeting of old friends, the opening session of the Theological Alumni conference was held at four o'clock on Monday afternoon, in Convocation Hall. The president, Rev. James Wallace, M.A., was in the chair, and unfortunately Dr. W. J. Clark, of Westmont, was unable to be present to take his place on the programme. His paper was read by Rev. Prof. K. Laird and was a very able discussion of "The Training of the Ministry as Outlined in the Basis of Union." Rev. Ernest Thomas, of Merrickville, opened the discussion in his usual bright and penetrating way. Rev. James Anthony, Rev. I. N. Beckwith, Rev. D. Strachan, Dr. Jordan, Dr. Smead and others took part in the debate, and the general consensus of opinion seemed to be that the article of "The Basis of Union," while faulty in a few minor particulars, was well adapted to conserve the necessary features of theologic education. The attendance promises to be exceptionally good this year and the prospects are for a very delightful and instructive conference.

Never was such marked enthusiasm manifest, as in this season being evidenced in the affairs of the Queen's Dramatic Club. This admirable organization is now diligently preparing for its annual production. It has decided to present Shakespeare's "The Storms to Cyprus," and it is expected that the piece will be put on at the Grand sometime during the latter part of November or the early days of December. The club is arranging to procure the services of Sinclair Hamilton, who for the past few seasons has so ably directed the dramatic capabilities of the Queen's students.

Year '12 Arts chose the following executive at its elections Monday afternoon: Hon. Treatant, Dr. MacNeil; president, A. D. Matheson, vice-president, Miss Connor, secretary-treasurer, J. D. McCrae, assistant-secretary, Mr. VanBlerice, historian J. L. MacDonnell; assistant-historian, Miss Tait; Marshall, A. W. Trefry. Professors: Miss Edith Farrer, poetess, Miss Watt; orator, J. A. Campbell.

An event looked forward to with special pleasure in the social life of Queen's is the medical dance. Arrangements are being made for this function the evening of Friday, November 18th, and it is believed that it will surpass all former affairs.

The Glee Club will undoubtedly be the best choral organization that Queen's has had in many seasons. Arthur Craig, who was last spring appointed director, is from the beginning employing methods that will produce the best results. Heretofore, no standard were held up by the club, but this season all applicants have been required to pass a rudimentary examination which will provide for the conductor a working and workable organization. The first practice was held Monday evening. There was a very gratifying turnout. Miss Shaw will preside at the piano this session.

Nominations for the Arts Society executive will be received at the regular meeting this afternoon.

The Freshmen's reception is being arranged for. The affair will take place in Grant Hall, Thursday evening, November 3rd.

PROF. A. P. KNIGHT TELLS HOW TO IMPROVE IT.

He Lectured Before Queen's Theological Alumni on "Hereditary"—Education and Law Improve the Race—Canada Should be Rid of Weak-minded.

"How to Improve the National Vitality of the Race," was the chief point in the lecture addressed by Prof. A. P. Knight before the Queen's Theological Alumni association this morning. The series being given by Prof. Knight is on "The Conservation of the Race," and his subject of his first lecture was "Hereditary."

Prof. Knight first presented a number of slides showing photographs of weak-minded people at Orillia asylum, so as to show what heredity is. There are three grades of weak-minded, lower, middle and higher. It is the higher grade of imbeciles from whom criminals are recruited. Three-quarters of the men in the penitentiary are weak-minded or moral imbeciles. For a full description of a moral imbecile, Prof. Knight quoted from a report of Dr. C. K. Clarke, formerly of Rockwood hospital. He also made a reference to the Barrie man convicted of murder. After the sentence, Dr. Ryan, of Kingston, saw the murderer and offered him his sympathy in the awful position he found himself in, and asked him if he did not realize his position. To which the man replied: "Not by a damn sight." This was given as an illustration of the criminal imbecile.

The lecturer drew distinctions between weak-mindedness and insanity. Insanity is due to a disease of the brain but up to the time of the attack, the person is perfectly normal and may recover from the illness of the nervous system, just as one may recover from any other acute disease. Dr. Knight pointed out that in Ontario we have some 700 families, and asked, "What can be done to rid the country of them?" His answer was—

1. By education, by instilling into the general public, to those of good family stock, higher ideals of what a perfect woman, a perfect man and a perfect woman should be. In teaching high ideals, men and women, in selecting life partners, will be guided by that policy. It will be work, the lecturer said, but in the end a stockier race would result.
2. Next, to improve the family by the help of law, deterring imbeciles. This idea should be extended. All imbeciles are not in asylums, but they should be hunted up and placed in confinement, as Hon. Mr. Hanna has been trying to do for the past few years. The defects in the Juke family were that one branch produced criminals and the other paupers. Prof. Knight declared that the confirmed pauper, the man who could not provide for his family, should be shut up in public buildings and detained there for life, and no citizen, Canada, he said, should stake every means of improving the national vitality of the race.

Machinery Reference Books for Self Education in Mechanics

THE FIRST PRACTICAL MECHANICAL BOOKS OF HIGH GRADE TO RETAIL AT 25c PER COPY, IN QUALITY EQUAL TO THE MOST EXPENSIVE WORKS.

LIST OF TITLES WITH NUMBERS 1 TO 60:

- 1 Worm Gearings.
- 2 Milling Practice.
- 3 Drill Jigs.
- 4 Milling Practice.
- 5 First Principles of Theoretical Mechanics.
- 6 Punch and Die Work.
- 7 Lathe and Planer Work.
- 8 Working Drawings and D. R. Practice.
- 9 Designing and Cutting Cam.
- 10 Examples of Machine Shop Practice.
- 11 Bearings.
- 12 Mathematics of Machine Design.
- 13 Blanking Dies.
- 14 Details of Machine Tool Design.
- 15 Spiral Gearings.
- 16 Machine Tool Drives.
- 17 Straightening of Castings.
- 18 Shop Arithmetic for the Machinist.
- 19 Use of Formulas in Mechanics.
- 20 Spiral Gearings.
- 21 Blanking Dies.
- 22 Calculations on Elements of Machine Design.
- 23 Theory of Castings.
- 24 Examples of Calculating Designs.
- 25 Deep Hole Drilling.
- 26 Modern Punch and Die Construction.
- 27 Locomotive Design—1. Boiler and Cylinders.
- 28 Locomotive Design—2. Valve Motion.
- 29 Locomotive Design—3. Smoke-box, Trusses, Cab and Tender.
- 30 Locomotive Design—4. Springs, Machinery.
- 31 Screw Thread Tools and Gages.
- 32 Screw Thread Cutting.
- 33 Systems and Practice of the Drafting-room.
- 34 Care and Repair of Dynamometers and Motors.
- 35—Tables and Formulae for Shop and Drafting-room.
- 36 Iron and Steel.
- 37 Bevel Gearings.
- 38 Grinding and Lapping.
- 39 Fans, Ventilation, and Heating.
- 40 Fly-Wheels.
- 41 Jigs and Fixtures—1. Principles of Design, etc.
- 42 Jigs and Fixtures—2. Open and Closed Drill Jigs.
- 43 Jigs and Fixtures—3. Principles of Boring Jig Design, etc.
- 44 Machine Blacksmithing.
- 45 Drop Forging.
- 46 Hardening and Tempering.
- 47 Electric Overhead Cranes.
- 48 Girders for Electric Overhead Cranes.
- 49 Principles and Practice of Assembling Machine Tools—Part I.
- 50 Principles and Practice of Assembling Machine Tools—Part II.
- 51 Principles and Practice of Assembling Machine Tools—Part III.
- 52 Advanced Shop Arithmetic for the Machinist.
- 53 Use of Logarithms and Logarithmic Tables.
- 54 Solution of Triangles—Part I.
- 55 Solution of Triangles—Part II.
- 56 Ball Bearings.
- 57 Metal Spinning.
- 58 Helical and Elliptic Springs.
- 59 Machines, Tools and Methods of Automobile Manufacture.
- 60 Construction and Manufacture of Automobiles.

ORDERS FOR TRANSFER

Of Signalling Office From Kingston to Ottawa.

Tuesday morning, Lieut.-Col. Hemmings, I.C., received orders from military headquarters at Ottawa to be removed at once to Ottawa, the office books and papers of the late Maj. Bruce Carruthers, assistant adjutant-general for signalling. When Maj. Carruthers was appointed to the position in 1906 he took command of this new department of the Canadian service on condition that his headquarters be made at Kingston, his home city. His request was granted, and that is why the signalling headquarters have been here for the past year and a half year. The office really belonged to headquarters at Ottawa, and hence, it is returning there. It is not yet known who the successor of the late Maj. Carruthers will be. The transfer of the office will take away from Kingston Sergt.-Maj. J. R. McGowan, who has been the chief signalling instructor for Canada, and who has been popular in both civic and military circles. Sergt.-Maj. McGowan is making preparations for departure, and will leave for the capital about the end of the week.

Rev. James Lawson, of Ottawa, who has been touring the west and visiting various points on the Pacific coast, is now in the city, the guest of his brother, Henry, on Sydenham street. Mr. Lawson contemplates another visit to his native land, England, where he is to spend Christmas, after which he intends visiting the continent and probably also the Holy Land.

DISTRIBUTING TREES

To More Applicants Than Ever Before.

The report of the Superintendent of Forestry for 1909 (which forms part of the annual report of the department of the interior, just issued) reports further development in the work of tree distribution from the forest nursery at Indian Head, Sask.

For some years the number of trees set out in the spring from the nursery has remained practically stationary at about two and a half million. The reason for this is that the capacity of the nursery is now almost, if not quite, reached, and if trees are to be distributed in great numbers either an enlargement of the present nursery or the establishment of new ones will be necessary.

At the same time the number of applicants for trees has greatly increased. In 1909 trees were sent to 2,010 applicants; in 1910 that number had increased to 3,173—an increase of considerably more than 50 per cent. In 1908 the average number of trees sent to each applicant was 1,100; in 1910 only 400 could be spared to each applicant.

In 1909 the number of new applications received was 2,255; in 1910 the number had increased to 3,832.

There is no reason why farmers in the west should not grow their own maple and ash trees, and to any who contemplate doing this the Forestry Branch will be glad to send advice and also seed as far as the means at their disposal will allow.

One point that must be carefully attended to, however, is the source from which the seed comes. If at all possible seed from trees growing in the western provinces should be secured. The forestry branch has had several experiences of failure, entire or partial, with certain samples made from imported seed. For example, in 1906, the crop of Manitoba maple seed in the Canadian prairie provinces was a failure. Seed for sowing the following spring was got from Dakota and sown in the nursery in the spring of 1907, and in 1908 the trees from this seed were sent out. This particular lot of maples has been reported to have suffered very much from winter-killing, in some cases the entire tree, top and roots, having been killed during the severe weather, in other cases only the tops having been killed back. Usually, the maple has been found hardy in almost every part of the west, and the loss of so many is no doubt due to the fact that the seed from which they originated was obtained from regions farther south. A similar failure occurred some years ago with elm seed imported from Eastern Canada.

Occasionally, however, when the local supply of seed fails, nothing else can be done but obtain seed elsewhere and take the risk.

Further interesting particulars regarding this work given in the report referred to, copies of which can be obtained, free of charge, by addressing R. H. Campbell, superintendent of forestry, Ottawa, Ont.

Rev. James Lawson, of Ottawa, who has been touring the west and visiting various points on the Pacific coast, is now in the city, the guest of his brother, Henry, on Sydenham street. Mr. Lawson contemplates another visit to his native land, England, where he is to spend Christmas, after which he intends visiting the continent and probably also the Holy Land.

Perth Road House Burned.

Perth Road, Oct. 26.—Neighboring farmers have reported an abundant crop of potatoes. Work has been greatly facilitated by the use of J. Henry's potato-digger. An interesting discourse was given by Rev. E. Lloyd, last Sunday evening. The home of William Wilson was entirely destroyed by fire on Thursday evening. Mrs. J. S. Roberts, accompanied by her two children, has returned home after a two weeks' stay in Enterprise. John Henry's residence presents a striking appearance after a new coat of paint. Miss Ruby Buck expects to leave on November 15th, and after visiting in Hamilton and London, will spend the winter with relatives in Detroit. Ross Miller made a trip to Battersea last Sunday. John Harris has returned from Watertown, N.Y. Miss Mabel Froeman leaves Wednesday, for Naples. Mrs. R. G. Stone and Miss Minnie Roberts are on the sick list. A large party was given for Miss Ruby Buck and her cousin, Miss Alice Dempsey, at Perry Buck's residence, Sydenham. J. Cockill intends spending the winter at home. Miss Freeman returned Thursday, after a week's visit near Inverary.

Umbrellas
