After 20 Years of Intense Suffering.

"I have been afflicted for twenty years with an obstinate skin disease, called by some M. D.'s. psoriasis, and others leprosy, commencing on my scalp; and in spite of all I could do, with the help of the most skilful doctors, it slowly but surely extended until a year ago this winter it covered my entire person in the form of dry scales. For the person in the form of dry scales. For the last three years I have been unable to do any labor, and suffering intensely all the time. Every morning there would be nearly a dust-panful of scales taken from the sheet on my bad, some of them half as large as the envelope containing this letter. In the latter part of winter my skin commenced cracking open. I tried everything, almost, that could be thought of, without any relief. The 12th of June I started West, in hopes I could reach the Hot Springs. I reached Detroit and was so low I thought I should have to go to the hospital, but finally got as far as Lansing. so low I thought I should have to go to the hospital, but finally got as far as Lansing. Mich., where I had a sister living. One Dr. — treated me about two weeks, but did me no good. All thought I had but a short time to live. I carnestly prayed to die. Cracked through the skin all over my back across my ribs, arms, hands, limbs; feet badly swollen; toe-nails came off; finger-nails dead and hard as a bone; hair dead, dry and lifeiess as old straw. O my God! how I did suffer.

"My sister. Mrs. E. H. Davis, had a small part of a box of Cuticura in the house. She wouldn't give up; said, 'We will try Cuticura.' Some was applied on one hand and arm. Eureka! there was relief; stopped the terrible burning sensation from the word go. They immédiately got Cuticura Resolvent, Ointment and Soap. I commenced by taking one tablespoonful of Cuticura Resolvent three times a day after meals; had a bath once a day, water about blood heat; used, Cuticura Soap freely; applied Cuticura Ointment morning and evening. Result: returned to my home in just six weeks from the time I left, and

know his condition to have been as stated. We believe his statement to be true in every particular." L. B. Simmons & Son, Merchants; G. A. Thompson, Merchant; A. A. Davis; Millard E. Joiner, Merchant; John Carpenter; A. M. Leffingwell, Attorney and Counselor-at-law, all of Henderson, N. Y. The above remarkable testimonial was written January 19, 1880, and is republished because of the permanency of the cure. Under date of April 22, 1910, Mr. Carpenter wrote from his present home, 610 Walnut St. So., Lansing, Mich.: "I have never suffered a return of the peoriasis and although many years have passed I have not forgotten the terrible suffering I endured before using the Cuticura Remedies." Since this cure was made by the Cuticura Remedies, they have made their way to every part of the civilized world. A 32-page book-let describing humors and affections of the skin will be mailed free to those desiring fur-

MAN'S PROPORTIONS.

Athletics a Prime Factor-Development Mental, as Well as Physical -Comparison With Composite

Boston, Nov. 30 .- According to Dr. Sargent, if you are a typical woman: Your feet are bigger. Your hips are smaller. Your waist is further round. Your shoulders are broader. Your neck is thicker than those of the typical woman of twenty years ago. Is woman fast assuming the physical proportions and mental character-

years and is approaching that of the opposite sex is the belief of Dr. Dud-Sargent and Harvard gymnasium in Cambridge, and recognized through-out the country as the foremost au-

Twenty years ago, according to Dr. Sargent's statements, woman's ultra-leminine characteristics small waist, large hips, small feet, etc.—were over-developed, and she was the very anti-thesis of man in physical proportions. To-day her physique has become revolutionized, he says, and already This great evolution has taken place,

MURDEROUS MILLINERY

among birds to satisfy demands of modern millinery was pressed home speech at the annual meeting of the Selborne Society, London, England. "The whole volume of the bird life

of the world is being reduced at an alarming rate," he said, and then he gave the reason-that to obtain the feathers the birds had to be killed in

At that time birds' natural fear of man disappears under the stress of providing for and protecting their young, and it is under conditions such as these that the old birds are shot and rifled of their plumes, and the young left to die of starvation in

Scenes of Slaughter. Thirty years ago there were heron ries in the United States which were estimated to contain about 3,000,000 white herons. At the same period these birds roamed widely over China in prodigious multitudes. But even these vast hordes could not withstand slaughter during the breeding season and now the white heron is practically exterminated both in North America and in China. Now the same havoc is being wrought in South Americain every country of the world, indeed where the white heron is still found.

The feeding grounds of the American jabiru, the largest but one of living storks, are also the scenes of slaughter during the very period when the bird should have respite. Thirty thousand quills of these birds are sold annually in London alone, and as the species was never very numerous, it

will soon be wiped out. So wary is the bird that it keeps be yond the range of a fowling-piece, but is shot to-day with a soft-nosed bullet from a Mauser rifle—a dreadful missile, which often tears away a great piece from the body of the bird. Even in this sickening condition, unless the mutilation be such as to prevent flight, the majestic creature will take wing in one last effort to escape. Of a sudden it falls lifeless to the carth -and woman's wish is gratified.

One Gang Shoots 300,000

So far this year but three plume sales have taken place in London, yet in those three sales alone there were catalogued the skins of over 25,000 humming birds.

Even the law is set at defiance by the gangs of men who make a live lihood by the slaughter of the birds. Not long ago a gang was surprised on one of the islands which the United States had decreed to be a "bird reservation," and these men had in their possession the plumage of 300,000

There was no bird in the world towards which the eyes of zoologists were turned in more admiring wonder than that pride of Australia, the lyre bird. Yet the rarer the bird became the flercer grew the competition to secure its tail feathers, and not long ago a party of plume-hunters sur rounded a patch of scrub in which the birds were known to be breeding. and, setting fire to it, shot down the birds as they struggled through one itiless ring of fire to meet death in another. Then the tail feathers were cut off and the bodies left to rot.

It was decided to organize a crusade throughout the country by means chiefly of lantern lectures, and stir up public sentiment in favour of the Plumage Bill, by which the importation of feathers would be prohibited by law; and an appeal was made fo

A TONKIN AMAZON.

The Remarkable Wife of a Notorious

Fourteen followers or accomplices That the physical type of woman-visit-hood has undergone a tremendous For- change in the short space of twenty kin, arrived at Marseilles on their She is Thy Ba, De Tham's second son. Her age is about 30. Imperious and cruel, this woman fought by her husband's side in all his battles with the French troops, and exercised great influence over him. She strenuously opposed the release of the French-man Voisin—who had been kidnapped by De Tham—and urged that his head should be struck off. It was by a mere chance that she was captured The French troops, victors in a skir-mish, were searching the bandit's lair. Thy Ba had taken refuge in a thicket, into which a passing soldier drove his bayonet. There was a howl. Thy Ba had betrayed herself. On the voyage this woman's word was discipline over them in the improvised cell in which they were kept, and which they were only allowed to leave twice a day. She distributed their food to them and regulated all the details of their daily life on board. When the vessel reached port it was she who led the captives as they step-
