YEAR 78-NO. 33.

KINGSTON, ONTARIO, THURSDAY, FEBRUARY 9, 1911.

LAST EDITION

DAM AT SAULT

Matter Comes Up in House of Commons.

BORDEN'S MOTION

SOME PARTIES ARE IGNORING A TREATY.

A Deep-Laid Plot to Change the Course of the Grain Trade to New York—Would be Wise for Parliament to Oppose the Proposals Made.

Special to the Whig.
Ottawa, Feb. 7.—In the house R. L. Borden moved, yesterday, "For a copy of all correspondence, memoranda, reports, memorials, plans, orders-in-council, treaties, conventions, agreements, documents and papers of every kind, touching any proposal or bill to erect dams or other similar works across the River St. Lawrence, or part of the said river, at or near the Long Sault, or in the vicinity thereof, including all statutes of the state of New York and of the United States of America relating thereto, and all bills now before the congress of the United States touching the same, and all the proceedings upon all such statutes and bills."

In speaking to his resolution Mr. Borden explained that it would be highly unreasonable for the dominion government to allow the parties interested in the building of this dam to go ahead. Both the United States government and the company seeking the right to dam the Long Sault rapids at the South Sault are of the opinion they have solely the right to determine what they should or should not do in this matter, although ignoring the fact that there is a treaty (the Ashburton treaty) which enforced would positively prohibit any such work.

Dr. Reid, Grenville, read to the house the bill which was thrown out of the United States congress, and is now before their senate. In this bill the General Aluminum Company, of New York sought the right to construct this dam. Mr. Reid thought the whole scheme was a deep laid plot in which this company, if allowed to dam the South Sault, would immediately construct a canal from the dam to Lake Champlain and use it as a waterway to carry all the wheat coming east from Chicago. He pointed out that the towns of Cornwall, Morrisburg, Brockville, Prescott, Kingston, were not badly in need of electrical power, and would sooner wait a year or two than have the St. Lawrence dammed. He understood from Thomas Cote that plans of this canal had been laid before the International Waterways commission.

Hon. Mr. Pugsley and Sir Wilfrid Laurier said they had no intimation of any such thing. As far as the supply of power to Toronto was concerned it would be just as convenient for them to get it from Ottawa, which had lots to sell. Kingston would be the only town that would use any great amount of power, perhaps they would take about 6,000 or 8,000 horse power, but they, too, are in position to get a supply from a larger power company in Trenton. It would be wisdom on the part of this parliament, to strongly oppose legislation of this kind.

Hon. John Haggart, Col. Smith, of Cornwall, Haughton Lennox, South Simcoe and Judge Doherty, of Montreal, also spoke on the matter, and expressed somewhat similar opinions.

A Boy Died of Joy.

Orange, N.J., Feb. 9.—While cerebral hemorrhage was given as the cause of the death of Morris Jenks, a schoolboy, the indirect cause was his excess of joy at learning that he had passed an examination. First informed that he had killed young Henkle went home greatly depressed. He became ill from grief. Later it was found that a mistake had been made in grading his papers and that he had passed.

To Tax Manufactured Imports.

London, Feb. 9.—The Morning Post gives currency to a rumor that the government is considering important taxation changes in the next budget in the direction of large remissions of import duties on tea, coffee, cocoa, dried fruits and similar products, and the imposition of a general ad valorem tax of five per cent. on all manufactured goods, for revenue purposes only.

\$500,000 to Fight Plague.

Tokio, Feb. 9.—Dr. S. Kitano, accompanied by the chief of the Colonization Department, will leave for Manchuria on Feb. 12th, to investigate the plague situation. The government has requested an appropriation of \$500,000 for the diet to defray the expenses of fighting the epidemic.

New Name for Sewing Societies.

Boston, Feb. 9.—Probably one of the strangest names ever taken by a club is that adopted by the Cabalotte Club of Woburn, Mass. The name signifies just what it implies—gab-a-lot—and its emblem is a parrot. The club is composed of and limited to eighteen members, all representatives of Woburn's leading families.

Rubber stamps, pads, ink, deters, etc., may be had at the Whig office.

DAILY MEMORANDA.
Fire and High Commission, 1 p.m. Friday.
Limestone Ladies' N.C.W. A.O.C.W. meets tonight, at 8 p.m.
Y.W.C.A.—Miss Carrie McManis of Japan, will speak Saturday night, 7.30.

ANARCHISTS' SYMPATHY.

With Their Japanese Brethren—American Prosecuted.

Tokio, Feb. 9.—Persistent reports are in circulation to the effect that a representative of an American anarchist group arrived at Yokohama on board the Tenyo Maru, bearing a resolution of sympathy with the Japanese anarchists on account of the recent executions here. Detectives are very active, but the police refuse to give any information.

W. B. Fleisher, the American proprietor of the Japanese Advertiser, is being prosecuted for reproducing a socialist interview in the vernacular in his newspaper.

BULLETS THROW LIGHT.

Innovations at Night Manoeuvres in Germany.

Berlin, Feb. 9.—Manoeuvres of the most interesting nature took place on the parade grounds last night, at which a recent invention in the form of rifle bullets, which threw a brilliant light when fired into the air, was thoroughly tested. Searchlights and rockets also were utilized to-night, making every movement of the troops across the snow-covered country plainly visible. The military officials maintain secrecy on the results of the tests.

STOLE DEAD BODY.

Erie, Pa., Feb. 9.—With extreme difficulty, grave robbers opened the mausoleum of the late Congressman Scott, and removed the body of a female member of the family. The police believe the robbers are holding the body for a ransom, as the estate is very wealthy.

Government Owned Elevators.

Regina, Sask., Feb. 9.—The most important resolution to come before the grain growers of the three prairie provinces is as follows: "That in the opinion of this convention, the finding of the elevator commission is not in accordance with the expressed wishes of the people of these provinces, and that this convention unanimously favors a system of government-owned interior elevators."

Would Curtail Colleges' Powers.

Winnipeg, Feb. 9.—A large gathering of Manitoba College alumni, last night, passed a resolution against granting of degree-conferring powers to denominational colleges. The resolution will be forwarded to the provincial government. A student petition will be set going to support the resolution as it is understood the Wesleyan students are taking action in support of the Methodist colleges' movement for degree-conferring powers.

C.P.R. IS TO COLONIZE

BRITISH COLUMBIA BY READY-MADE FARM SCHEME.

Desirable to Increase the British Immigration to Western Canada—What the Railway Company Will Do.

Montreal, Feb. 9.—That the Canadian Pacific Railway will continue its ready-made farm scheme until every square inch of Great Britain with every one of these farms is supplied with one, is the statement made by J. S. Dennis, the manager of the company's irrigation and land interests, who returned to Montreal yesterday after a visit to England.

Mr. Dennis has been in consultation with the officials of the company in Great Britain regarding the condition for immigrants, which the company is carrying on there, and which will be continued during the present season on a bigger scale than ever. The company is particularly anxious to increase the British immigration to this country, in view of the big American immigration into the west. That the ready-made farm scheme is a food for attracting British settlers is shown by the eagerness with which these farms are being taken up. Last year 100 of such farms were offered. This year an additional 250 had been prepared, and for these over 1,000 applications have already been received. It is also intended to extend the ready-made farm idea to British Columbia, and to colonize the five-million acres which the company owns in the southern part of that province by means of irrigated farms.

That there will be a bigger immigration of British people this year than ever, Mr. Dennis seems confident, for he said, "that wherever he went great interest was displayed in Canada."

Improper Stamp Sales.

New York, Feb. 9.—A. C. Montross, the wealthy postmaster at Larchmont, fashionable New York suburb, is under suspension pending action by the postal authorities on complaints alleging the improper sale of stamps. The postmaster's pay is governed by the gross sale of stamps there, and it is charged that Montross sold large quantities of stamps to friends who used them in their business here in New York.

Night Raiders in Colorado.

Delta, Col., Feb. 9.—Opposition to the employment of Japanese labor in the orchards of Western Colorado came to a head, Monday night, when night riders visited the camp of Japanese employed in setting out fruit trees at a ranch near here, and drove them off, warning them not to return on pain of death. The Japanese left the ranch.

Night Riders have ordered Japanese laborers to leave fruit camps in Western Colorado, under pain of death.

EMPLOY ARMY

To Drive Back the Bubonic Plague.

RUSSIA TO PROTECT

HER FRONTIERS FROM THE INVASION.

Fresh Alarm Over the Breaking Out of the Plague in the Inner Portion of Peking—Chinese Government Censorship.

St. Petersburg, Feb. 9.—The vast army of Russia will be mobilized, if necessary, to protect her frontiers from the invasion of the bubonic plague from Manchuria and China. Conferences of the czar, Premier Stolypin and the minister of war were held yesterday to discuss the object of moving soldiers to the westward and southern frontiers, following a despatch relating to the seriousness and spread of the scourge.

Fresh alarm over the spread of the plague in the east was caused here yesterday, by the receipt of despatches from Peking stating that it has broken out in the inner city, and that a Buddhist priest had died of the disease. Although the first despatches declared that only one priest had perished, later advices stated that the situation was more serious, and that at least six persons were inoculated with the plague germs. The Chinese government has established a censorship over plague news following the fresh and most dangerous outbreak.

WINNIPEG PRINTER FROZEN.

Met His Fate While on the Athabasca Trail.

Edmonton, Alta., Feb. 9.—Mr. Sherman R. Spence, a printer, who had worked in Edmonton for several months past, and who joined the survey party of A. T. Fraser to go to the Peace River country, was frozen to death while following the trail along the Athabasca. The body was brought to Edmonton by A. L. Meagher, one of the engineers with the survey party.

Mr. Spence was thirty-seven years of age, and his father and mother live in Winnipeg. Spence lived in Winnipeg for many years, and had charge of the ad. setting department of the Free Press for a number of years.

Indian's Long Tramp.

Dawson, Y. T., Feb. 8.—Thomas Njootli, only thirteen years old, and son of the noble house of the Peel River reds is to-day breaking a trail of 150 miles up the Klondike valley behind a dog team.

Young Njootli and his father, Amo Njootli, the preacher of the Peel River tribe, left comfortable quarters at Dawson and plunged into the wilderness on the long tramp. They will follow the depressions between the hills for twelve sleeps before they make home.

Imposing Lincoln Memorial.

Washington, Feb. 9.—The house enacted into law the senate bill providing for a commission to secure plans and designs for a suitable monument or memorial to Abraham Lincoln, in this city. It is estimated that this memorial of \$2,000,000, and be the most imposing of all the monuments in Washington, save only the towering shaft erected in memory of Washington.

A \$2,000,000 Order.

Schenectady, N.Y., Feb. 9.—It is announced that an order for two million dollars worth of railway equipment for the Chicago City railway has been placed with the General Electric company and work at the big plant is booming. This is the largest order for railway apparatus ever booked by one concern and calls for nearly a thousand car equipments. Many other large orders have been received.

What Becomes of New Yorkers?

New York, Feb. 9.—"There should be an investigation," said Judge John C. Cahalan, at a dinner of 300 West Virginians at the Waldorf, "to learn what becomes of the people who are born in New York city. Whenever you hear of anyone it is always some man who has come from another state. It would be interesting to know what becomes of the men who are born here."

Murder in Restaurant.

St. Louis, Mo., Feb. 9.—John B. Condon, formerly of Jersey City, N.J., shot and killed Emmanuel Leontinis, a restaurateur, and perhaps fatally wounded Miss Ethel Champe, a waitress, in a restaurant. Condon had been taking his meals in the restaurant. He told the police that for two days he had had a desire to kill.

Must Retract or be Sued.

Winnipeg, Feb. 9.—President Henderson of the Manitoba Grain Growers' Association, has instructed attorneys to sue former Minister Ellison, of British Columbia, unless he retracts or submits proofs of his authority for the statement that J. J. Hill gave Manitoba grain growers \$50,000 to promote reciprocity.

Night riders have ordered Japanese laborers to leave fruit camps in Western Colorado, under pain of death.

RECOVERED REASON.

"Holy Roller," Who Killed Child, is Released.

Easton, Pa., Feb. 9.—Robert B. Bachman, of Zanetti, a member of the religious sect known as the "Holy Rollers," who killed his little niece in a religious meeting at his home in 1908, has been given his freedom.

After the crime was committed Bachman was declared insane and removed to an asylum.

A few weeks ago a petition was presented to the court by the hospital authorities, saying Bachman had recovered his reason. He furnished \$2,600 bond to keep the peace and was to-day released.

ROBBERS WERE REPULSED.

Eight Armed Men Attacked Money Wagon in Germany.

Essen, Germany, Feb. 9.—Eight armed men yesterday attacked the money wagon containing about \$40,000, which was intended for the payment of the miners in the government pits at Gladbeck, in Westphalia. The wagon was proceeding through the forest in a chariot of four armed men and two gendarmes, and the guards successfully resisted the bandits. Many shots were fired, but the robbers escaped into the woods. Later two suspects were arrested.

AUSTRALIA ANXIOUS

CONCERNING THE IMPORTATION OF JAPANESE.

Into South Pacific Islands—Matter of Grave Importance—Arrival of First Shipload Causes Trouble.

Victoria, B.C., Feb. 9.—Advices were brought by the steamer Zealandia that much excitement was occasioned in Australia and New Zealand by the report that arrangements had been made by the French nickel mining companies in New Caledonia to bring five thousand Japanese to the South Pacific Islands.

Hon. Mr. Fisher, premier of Australia, in an interview, said the arrival of thousands of Japanese at Noumea was a matter of grave importance to Australia, owing to the danger of New Caledonia being made an intermediate settling ground for hordes of Japanese with Australia as the final destination.

The Nacmea correspondent states that the arrival of the first shipload of Japanese is causing disturbances. The bringing of the Japanese was arranged in France.

A POCKET RECEIVER.

New Apparatus for Aerography Invented.

London, Feb. 9.—Prof. Belar, of Laibach Observatory, telegraphs that he has invented a very cheap, handy pocket aerograph receiver, which can be quickly erected anywhere. Experiments made on a hill near Laibach were most successful. Messages were picked up from Malta, Paris and Chile.

Prof. Belar does not state whether his instrument dispenses with the poles and wires that are necessary to the use of other pocket apparatuses.

Another Girl Disappears.

Berlin, Feb. 9.—One of the strangest disappearance cases with which the German police have had to deal in many years has been completely baffled. It is that involving the disappearance of Miss Margaret Damm, a young musical student from Omaha, Neb., who has been mysteriously missing since January 24th. Some of her friends believe that she has committed suicide, but as her body has not been found, the authorities are inclined to doubt this. Other friends of the young woman repudiate the suicide theory and will ask United States ambassador to assist them in the search for her.

DIED OF STARVATION

SAD END OF A FAMOUS ENGLISH INVENTOR.

He May Have Found a Great Electrical Secret—He Was Buried in Potter's Field.

New York, Feb. 9.—The finding of three large pine cases containing mechanical apparatus in a storage vault of a down town safety deposit company, has led to the discovery that John Needham Longdon, a fellow of the Royal Society of Engineers, and an inventor of note, well-known throughout the British empire for his work in the field of civil and mining engineering, died here of starvation several months ago, while seeking the secret of generating cheap electricity, which he believed would revolutionize the power system of the world.

Longdon is said to have spent \$100,000 in the work, and whether he really discovered the secret he was after, will not be known until his friends have inspected the contents of the three cases in the storage vault.

Longdon died in the New York hospital and was buried in Potter's field. The landlady of a cheap lodging house had found him lying upon the floor in his night clothes, while gas was escaping from a jet near by. Circumstances pointed to his death being accidental rather than a case of suicide.

The autopsy showed that exhausted vitality from starvation was rather more responsible for death than the gas. Relatives recently came to New York to look up Longdon's whereabout and came across the pine cases in the safety deposit vault. These led to the locating of his lodging place and the news of his death.

CHANGE DATE

Dislike Contests During Holiday Season.

TALKED ABOUT IT

SIR JAMES APPROVES OF THE PROPOSALS.

Never Had Heard a Good Reason for the Present Time of Holding the Elections—Allan Studholme Had a Bill on the Subject.

Toronto, Feb. 9.—Before the legislature finishes its work this session there will probably be upon the statute books an amending act changing the date of municipal elections throughout the province. For session after session the question of changing the date has occupied the attention of one legislator or another without receiving the serious consideration of the house, but yesterday it was under discussion for nearly an hour and a half. A dozen members had something to say about it, generally of a favorable nature.

The matter was introduced by A. E. Donovan, Brockville, who drew a touching picture of Christmas-time—the time when the "spirit of peace on earth and good-will to men" should have away—being disturbed by contentions striving for municipal honors. The municipalities were losing good servants because business men could not spare the time for electioneering during the holiday season. He waved before the members letters from a number of provincial premiers—one from Sir James not being among them, however—and quoted their expressions of opinion against elections being held during the Christmas season. Another sheaf of letters from mayors and reeves added their weight of approval for the change.

Mr. Donovan's suggestion as incorporated in his bill was that the second Monday in January be made the day for receiving nominations, with the third Monday for elections.

Daniel Reed, South Westworth, opposed the change as likely to disfranchise the great body of commercial travellers who were home during the holiday season. W. F. Nickle, of Kingston, J. H. Fisher, of North Brant, J. Thompson, of East Peterboro, J. W. Johnson, of West Hastings, and J. R. Dargavel, of Leeds, favored the change. A. A. Mahaffy, of Muskoka, feared that it would inconvenience the lumbermen, while E. G. Macdonald, of West Elgin, thought it would not give municipalities time to prepare legislation before the house met.

The prime minister surprised the house somewhat by endorsing all that was said regarding the necessity for a change, but he objected to the date chosen.

"I never heard of any one who could give a good reason for the present time of holding elections. But," he continued, "the honorable member for Brockville is all wrong about the time." Sir James declared that the government did not intend to take any side and would leave the matter to be worked out in committee.

"Certainly," he remarked, as he sat down, "there is no time more unsuitable for elections than the present one." The bill will go to the municipal committee, as will a similar one that Allan Studholme introduced on behalf of the city of Hamilton. The Hamilton bill, however, provides for elections the Wednesday before Christmas. The labor member in explaining another clause of the Hamilton bill providing for the election of controllers for two years provoked a smile by stating that he was not in favor of it.

BIG NAVIGATION MERGER.

A Number of Lines are to be Included.

Toronto, Feb. 9.—Local confirmation was given, to-day, to the rumor that a gigantic lake transportation merger is in process of formation, to include not only the Inland and Northern navigation lines, but the smaller lines on the great lakes, making a two-million-dollar concern, with Rudolph Forget, Montreal, as president. A combine steamship man, to-day, declared that the defeat of the Long Sault project in congress has been instrumental in bringing the matter to a head. Mr. Forget is expected here shortly, to look into the Toronto end.

Ask Bounty on Steel.

Ottawa, Feb. 9.—A deputation of 150 residents of Morrisburg, Ont., waited upon Hon. Mr. Fielding, yesterday afternoon, and asked that a bounty of not less than five dollars a ton, be granted on sheet steel manufactured in Canada in view of the fact that the duty of five per cent. on the importation of that commodity will be removed under the reciprocity agreement with the United States. The reply of the minister was not altogether encouraging.

A Wild Man Arrested.

Fort William, Feb. 9.—To all appearances as wild as the denizens of the New Ontario forest, which have been his sole companions for the past four years, John Beck, about forty years of age, garbed in crudely fashioned coat and trousers of skins, was taken through Fort William from Vermilion Bay, about a hundred miles north-west of this city, to Kenora, where he will be committed to an institution for the violently insane.

WOMAN STAGGERED COURT.

Talked so Fast Court Had to Order Recess.

St. Louis, Feb. 9.—Telling of her married life, Mrs. Alice L. Lemen talked so fast on the witness stand that Judge Hadley ordered a recess of three hours to give his fagged stenographer a rest.

Mrs. Lemen is suing for divorce from her second husband, William C. Lemen, a former commission merchant. She began talking at four p.m. yesterday. Even her attorney found it almost impossible to get in a word. Questions were not needed, and the witness easily maintained a high velocity of language which never flagged.

"Used to sit up night still twelve o'clock darnin' my husband's socks," she raved along.

"Often I didn't have clothes to keep me warm. One cold time I come down town with him and he would buy me \$10 worth of clothes. When we got to the store he handed me \$15 and strolled away."

And so it went on and on and on. At 11 a.m. the stenographer threw up her hands. Her fingers were blue and cramped with fatigue.

She had filled two notebooks and started on a third and shook her head feebly to indicate her inability to continue.

TAFT DEMANDS VOTE.

Washington, Feb. 9.—President Taft served notice on congress, yesterday, through Senators Crane and Carter, that there must be a vote on the reciprocity agreement with Canada or he would call all congress back in extra session almost immediately after March 4th.

C.P.R. ACQUIRES OUTLET.

To the Atlantic Seaboard at Newport, Va.

Montreal, Feb. 9.—Canadian Pacific railway has acquired an outlet to the Atlantic seaboard, at Newport, Va., by an agreement with the Chesapeake & Ohio railroad, and it is stated here that the Canadian Pacific will take over the Washburn from Detroit, to Chicago, or build an entirely new line from Detroit to connect at Chicago with the Chesapeake line.

TO MAKE SECOND ATTEMPT.

McCurdy to Fly Over Mexico Gulf Next Week.

Havana, Cuba, Feb. 9.—J. A. D. McCurdy, the Canadian aviator, to-day shipped his aeroplane back to Key West, whence he will make another attempt to fly over the gulf within ten days. He will also enter in some most daring contests of aviation at Tampa's coming meet.

COMPLETE DENIALS

REGARDING THE REPORTED NAVIGATION MERGER.

R. & O. Company Officials Say There is Nothing in It—Long Sault Dam Projectors Not Buying Stocks.

Montreal, Feb. 9.—An emphatic denial was given by officials of the R. & O. company this morning, that they were contemplating any amalgamation or arrangement with any other company.

"Mr. Playfair's visit has absolutely nothing to do with our company," declared Percy Smith, general secretary. "We are running our own business, and will continue to do so. We do not want to amalgamate with any other company, and we are not seeking to purchase any other company."

Mr. Smith also emphatically denied that there was any attempt being made by promoters of the Long Sault dam project to obtain control of R. & O. stock.

Playfair Knows Nothing.

Hamilton, Feb. 9.—At the annual meeting of the shareholders of the Inland Navigation company, here, to-day President Playfair was asked regarding the report that the Bichellu & Ontario Navigation company, of which Rudolph Forget, M.P., is president, had in hand a merger of this huge company with Inland, Ltd. "It is all news to us," was Mr. Playfair's reply. "We know nothing of it."

RECIPROCITY DEBATE.

Opposition May Allow Bill to go Into Committee.

Ottawa, Feb. 9.—It is expected that the debate on the reciprocity negotiations, this afternoon, will develop something definite as to the tactics of both parties on the important subject. It is probable that the opposition will permit the bill to go on to the committee stage without serious opposition. This will give more opportunity for a debate in committee. Henri Bourassa has arrived, and will likely make things interesting.

Objects to Circus at Fairs.

Toronto, Feb. 9.—H. Bollett, president Holstein Friesian Cattle Association, made a strong denunciation at Fairs Association, to-day, of the inclusion of fairs and exhibitions. They had a tendency, he said, to draw away from the instructive branches of fairs.

Travers Makes Assignment.

Toronto, Feb. 9.—W. B. Travers, convicted ex-manager of the Farmers' Bank, has made a personal assignment, for the benefit of his creditors, who will share in his assets with the bank.

WEATHER PROBABILITIES.

Toronto, Ont., Feb. 9, 10 a.m.—Ottawa Valley and Upper St. Lawrence—Warm southerly winds; light snow fall to-night and early Friday. Cold again on Friday night.
