COMING

Canada's Hair Expert

Every woman and every man whose hair is not in a perfect condition is vitally interested in the coming visit of Frank Pember, of the Pember Hair Store and Beauty Culture Institute, of Toronto. Prof. Pember's advice upon the condition of your scalp, if followed now, may prevent baldness. If your hair is thin, faded, scraggy, coarse, or sickly he can help it. If you are in need of a natural wavy switch, being transformation, wave, braid or set of puffs, you will see the most beautiful and the most beautifying exhibition ever displayed in this town.

PROFESSOR PEMBER

Desires to emphasize the famous Pember Toupee for bald or semi-bald men. He will show a full line of the very unusual preparations used at the Institute of Beauty for the complexion, hands, hair and feet. A visit will be undoubtedly worth your while at the

BIG SHOWING MADE ASKED FOR A GRANT

BY THE LIGHT, HEAT AND POWER PLANT.

Profit for 1910 was \$18,000—Big Increase in Output—The Cost of Producing Electricity Less Than in 1909.

Ald. Elliott presented to the city council, last evening, the annual report of the light, heat and power plant for 1910, which showed a profit of \$18,000 on the year's business. The success of the plant was heard with much satisfaction by the members of council.

Ald. Elliott stated that in the gas division, the station output had been increased in 1910 from 41,000,000 cubic feet to 49,000,000, a net gain of 8,000,000 cubic feet over 1909, or an increase of twelve per cent.

During 1910 there were 257 new customers added to the mains, making a grand total of 2,927 consumers on December 31st, 1910.

The department laid 7,712 feet of gas mains, making a total of 20 1/2 miles of mains in operation at the present time.

The cost of gas manufacture for 1,000 cubic feet of gas was reduced from forty-seven cents in 1909 to forty-two cents in 1910, which represents a saving in raw material, after allowing twenty per cent. for loss and depreciation, of \$1.840. As a result of the visit of a deputation from the light, heat and power committee, last spring, to western cities, a saving of between \$800 and \$900 was effected in oil, which made it possible to reduce the cost of manufacture.

In the electric department the total output in kilo-watt hours in 1910 was 1,071,181, as against 972,384 in 1909, an increase of ten per cent.

The cost of manufacture per kilo-watt hour was reduced from 1.54 in 1909, to 1.61 in 1910, a net gain of practically a quarter of a cent per kilo-watt hour.

The number of new electrical consumers added during 1910 was 127, making a grand total of 1,066.

The total revenue from both gas and electric departments was \$92,323.59, an increase of practically \$5,000 over the previous year.

The plant paid \$4,259.97 in taxes and \$125 towards the salaries of officials in the city buildings. The interest charges were \$12,217.12, and \$3,700 was wiped off in debentures.

After paying a total fixed charge of \$25,723.71, the plant has a net surplus over and above all expenditure of \$18,084.71.

The manager reports that it is necessary that the manufacturing end in connection with the gas department be strengthened this year, at an expenditure of from \$12,000 to \$15,000. Some of the oldest street mains will have to be renewed, at a cost of \$2,000.

Ald. Elliott stated that it was his intention, at the next meeting of council, with the consent of his committee, to recommend that a sinking fund be established in connection with the light, heat and power plant. He would suggest that the nucleus of the fund be at least \$6,000 or \$7,000.

Ald. Elliott further stated that to Manager C. C. Folger was in a large measure due the success of the plant. The mayor congratulated Ald. Elliott upon the excellent showing made by the plant, and upon his comprehensive report.

Orpheum's Good Show.
The programme at the Orpheum for the first part of this week is good. Arthur Yule and company, featuring "Baby Helen," the most wonderful child prodigy of the age, are very interesting. Baby Helen sang two songs in perfect harmony and took the contralto part in a trio, without making a break. "Bill" Jones, in his comedy musical act, was also good. Theresa Miller, comedienne, sprung some good jokes. Arthur Lyon sang "Where Are Those Sleepers of Yesterday."

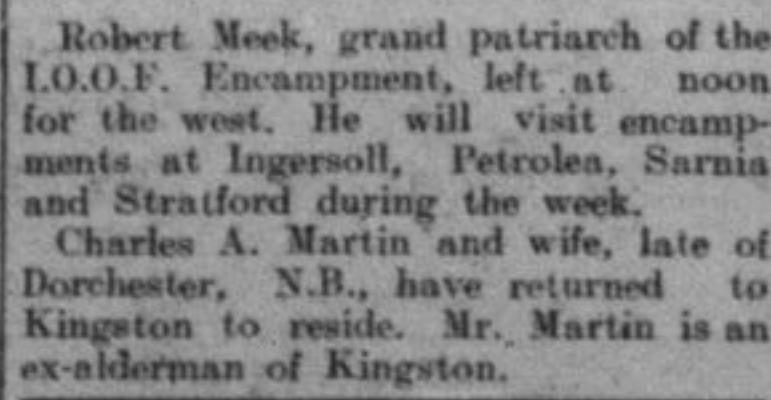

A Reliable Road-Maker.
H-Bicycles could speak they would sing the praises of the Dunlop Tires. "Dunlops" add to the days of the Bicycle by smoothing out jolts and saving the cost of repairs. Dunlop Tires are manufactured by an exclusive process. You simply cannot get Dunlop Perfection unless you equip your Bicycle with Dunlop Tires.

Keep the House Warm.

Hard on Railways
Last night's weather was very hard on the railways. The snow was drifting and it was a hard task for the trains to make time. On the G.T.R. a number of freights were stalled for an hour or so, and, this morning, nearly all the trains were late.

For Algoma Central.
The latest order the locomotive works has is to build ten locomotives for the Algoma Central railway. The works is now well supplied with orders, which will take nine months to fill.

The annual missionary services for Amherst Island were held at Emerald, in the morning, on Sunday, February 12th, and at Stella in the evening. The Dean of Ontario preached at both services, and collections were good.

On Monday evening, Rev. J. O. and Mrs. Crisp entertained the choir of St. John's church, Portmouth, at the rectory, following a sleigh drive.

ASKED FOR A GRANT

TO THE MOWAT MEMORIAL HOSPITAL.

A Big Deputation Waited Upon the City Council—F. Welch, Dr. W. T. Connell, C. Bermingham, and H. McBratney the Speakers.

Last evening an hour and a half of the city council's time was occupied in hearing deputations, and as a result it was after midnight before the council got through its business.

A large deputation waited upon the council to ask a grant towards the Sir Oliver Mowat Memorial hospital for tuberculosis. At present \$18,300 has been subscribed. Frederick Welch presented the petition and referred to the fact that the deputation included all classes of citizens and all public and charitable bodies, among the latter being the Daughters of the Empire and the Woman's Auxiliary of the general hospital.

It had been found, Mr. Welch said, that there were at present in Kingston, 200 poor, consumptive people. Only for the Woman's Auxiliary, he said, the general hospital would have been bankrupt long ago. During the past ten years the general hospital treated 162 consumptive cases and the Hotel Dieu 202 cases. The death rate was ten per cent. Consumption is rampant in the hospitals and throughout the city.

Mr. Welch read a letter from Dr. Bruce Smith, inspector of hospitals and charities, regarding the location of the hospital. Dr. Smith said that taking everything into consideration it would be better to erect the hospital on the general hospital grounds. The response of the people of Kingston to the canvass for subscriptions had been remarkable. Every class, creed and color had contributed a share, and he was proud of the people of this city.

The estimated cost of the building to accommodate twenty-two people was \$25,000. The government gives twenty per cent. after \$20,000 has been expended. The proposal was to take in consumptives, give them three months of treatment, and educate them as to how to take care of themselves. Mr. Welch claimed that consumption could be wiped out to sixty or seventy years. London and St. Thomas gave \$5,000 each for their sanatoria—Ottawa gave \$10,000 to the Lady Grey Sanatorium, and is paying for its maintenance. Toronto gives \$6,000 a year and Ottawa gave \$1,500 a year to the Gravenhurst Sanatoria. Mr. Welch said that Kingston was now asked to provide as liberally for this hospital project as it was doing for other charitable institutions.

Dr. W. T. Connell addressed the council on the matter. He referred to the possibility of tuberculosis spreading through the gathering of consumptive patients in the proposed hospital. He said that the danger depended altogether upon the patients. They could be educated to be careful in their spitting in public places. There was practically no danger from consumptives in a well-lighted room or in the outer air, for the germs practically became dead in light.

Cornelius Bermingham said that as a business man the project appealed to him. There was the economic value of every adult life to the community. It was a good investment of money, to erect a tuberculosis hospital, and try and save those in danger of being carried off by the dread white plague. The investment for an hospital of this kind would give an increasing return each year. Mr. Bermingham declared that after the evidence it had received by the subscriptions given by the people of the city it must see that it was the most popular project that Kingston ever had, and it would not be too much for the council to duplicate the amount already subscribed. He was sure that debentures could be issued for such a project as this. The council had the backing of the citizens in this project.

H. McBratney spoke as the representative of the labor unions and heartily supported a liberal grant by the city council. He knew that anything the council might do would be backed up by the workmen of the city.

The mayor referred the matter to the finance committee and promised the deputation that the matter would receive careful consideration.

Prof. Alexander Laird addressed the council on behalf of the Children's Aid Society, and asked for a grant towards the salary of its agent. The Ontario government was giving \$480 a year; the county council of Frontenac \$150 a year. Prof. Laird asked the city council to also give \$150. Citizens had subscribed \$150 privately. Rev. Douglas Laing and Rev. T. W. Savary also spoke on behalf of the grant.

The Archbishop's Departure.
The lady's address, Archbishop Gauthier, this evening will be read by James Swift. The clergy's address will be read by Vicar-General Masterson, of Prescott. Announcement will be made this evening concerning the administration of the archdiocese until the appointment of a successor to Archbishop Gauthier.

INCOME FOR OLD AGE

AN ADDRESS ON GOVERNMENT ANNUITIES.

Dr. Samson, Lecturer-in-Chief, at City Hall Monday Night—Placed Matter Before Audience in Interesting Manner.

An address was given in the city hall, on Monday evening, by Dr. Samson, lecturer-in-chief, on government annuities.

The audience which greeted the lecturer was very small, about thirty in number, and when the importance of the subject is considered, the slim attendance is much to be regretted. Dr. Samson is an entertaining speaker. He presented his subject in a forceful and eloquent manner, and was listened to with great interest.

It can be truly said, that the enthusiasm made up for the small attendance.

Dr. Samson's home is in Windsor, and he has been a practicing physician for forty-two years. He has been "rambling around the country," as he himself likes to term it, preaching on the government annuities, and Monday night's address, was the 140th he has given, since he started on his rounds. The doctor has many very interesting stories to tell, which have a direct bearing on the work he is setting forth, and he is a fine platform speaker.

Prof. Skelton occupied the chair, and introduced the speaker, ably filling the duties in the absence of Mayor Graham, who had to attend a meeting of the city council.

In his opening remarks, the speaker referred to the fact that nearly every country had endeavored to solve the great question of what could be done to take care of the men in their old age, when they were without means.

The Canadian government had decided upon a method, that of annuities, to help the people. A boy at sixteen, putting in ten cents per day, for a year, in an annuity would at the age of 70, receive \$100.50 a year. The speaker then went on to explain the system giving an explanation of the results to be obtained by the different amounts invested. Books were distributed to the audience, giving a detailed account. There was no necessity for a man to go to the poorhouse. He pointed out how misfortune often came to those who had accumulated wealth, and the necessity for making preparation for old age. The celebrated Charles Dickens died rich, but today, the British government was called upon to pay \$2.50 per week, for the support of his three children. In order to keep them out of the poorhouse. There were life assurance companies banks and benefit societies, for the payment of money, but the government annuities paid interest at four per cent, compounded, and the expenses came out of the nation. It was felt by the government, that it would be a good investment, for the country to pay the costs, as it would have a tendency to do away with poorhouses.

The speaker gave illustrations of the power of money to increase with the years, and made a strong appeal for the support of the people in the annuities.
