Cured by Lydia E. Pinkham's Veretable Compound.

If you want special advice write for direct or alternating current.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't healtate write at once.

If you want special advice write for direct or alternating current.

We all think that the unexpected happens just at the time it ought not limit this way, free of charge. Don't disery might be our portion if all our familied needs were well supplied.

PROPELS THE STREET

Modern Mystery. he Tory Times. Few of all the millions of people who

derstand the mysterious force which drives them so rapidly up and down

With a slight turn of the controller handle the motorman stops the big car on the corner in obedience to your signal, and no sooner are you aboard than the car glides rapidly forward and speeds along the track, to be as, quickly stopped and started further

To the superstitions foreigners the electric cars are very mystifying, and, be it known, it is very puzzling to anyone, but an electrical engineer, to tell just how the electric cars are pro-

It was only twenty-two years ago that Frank Sprague ran the first electric car the world ever saw at Richmond, Va., and since that time they have been improved until they are the perfect conveyance so common and well

patronized to-day. Electric cars depend upon electricity for energy. This electricity is generated in a power house either by developed water power or by steam enerators are generally used; but alters comes up she takes her cultivator and nating current is seldom used in street | keeps it clear of weeds, throughout railway work. This fact makes it neces sary to change the alternating cur- crops, intending to sow a field in rent, which surges back and forth clover every fourth year. Her main over the lines, to direct current which flows always one way. This change is clover, effected with rotary converters. The converter looks like a generator, but in reality it only changes the nature of the current with a very trifling loss

This direct current electricity is fed to the trolley wire at a pressure of about 550 volts. The trolley wire familiar to all as a heavy copper wire suspended over the tracks from insulated guy wires. In a few instances especially in New York, London, Chieago and other large cities, the wire carrying the current is laid underground and the trolley contact is under the car, or for heavy work the "third rail" is used and the current collected from a rail by a sliding shoe.

Rails Complete Circuit.

In every case where electricity is used for power purposes the current has to be "grounded," for return or a circuit with the power house. In the case of electric railways the rails are either welded or "bonded" together with straps of copper and used for

way line the trolley is released until the little brass wheel presses against show a well kept farm, but they the trolley wire. The wide flanges of drive the visitor over a stretch this wheel kept it from running off, and a heavy spring keeps it tight

motors located under the car, passes through the brass wheel and down the metal trolley rod to insulated cables concealed in the roof of the car. These cables lead to a "circuit breaker" in the roof of the vestibule. Some men are old at forty, others The duty of the "circuit breaker" is to "break" or shut off the current It's a mighty hard proposition to look when the load gets too heavy for the young, no matter how young you feel motors, because an overloaded motor if your hair is falling out and your would destroy itself by burning out in would destroy itself by burning out in an effort to carry more than its capa-

> The circuit breaker, which is a very simple contrivance, takes the place of "blow out" at the most inopportune from the chief inspector's office, moments. From the circuit breaker lowing a complaint made that the current is carried to the controller, which is an upright, oval iron box a note written in pencil. in each end of the car. It may be stated here that the equipment is the same on either end of the car so it can be run either way without turning

The controller is worked by two adjustable handles, the smaller of which is used only to reverse the motors.
With the larger handle the contact
points inside the device are opened speed and pulling power of the

Corresponding to the movements of the handle the current passes from the contact points to a series of resistance grids located under the car. These cast iron grids resist the current or hold it back. When the controller handle is moved up to a notch one of these grids is cut out and the resis tance is reduced, increasing the electricity which goes to the motors. As the handle is moved from point to point the resistance is lowered until the full power of the line is being fed to the motors and the car is running top speed.

Advantage of Direct Current. Direct current motors are used bereston, Iowa -" I was troubled for which can be secured. A street car in my side, sick headaches and nervousness. for direct or alternating current.

How Two Missouri Girls Cared for Estate Left by Parents.

Kansas City Star. A Missouri young woman has prov-ed that a woman's "sphere" is a very elastic thing by going into the fields and performing a man's work on her own farm. She is Miss Loretta Judson, twenty four years old, of Caddo,

When the young woman and her sister, Miss Daisy Judson, two years her junior, lost both parents in a runaway accident three years ago, the sympathetic neighbors were sorry. What would become of them? course, to keep the farm and live in question, the neighbors believed. At that time farm land was very cheap in the Ozarks and it was realized that but little could be obtained from a sacrifice sale of the eighty acres of

The girls made it known that they ntended to make their own way in the world and that they intended to the old homestead. And they set to work, the younger sister as housekeeper and the older sister as a worker in the fields. Miss Judson now has one of the best farms in

In the springtime Miss Loretta with her team of big black horses early in the morning plowing the and plants the corn. After the corn crops are corn, wheat, oats and

She owns all her own machinery and can drive a binder as well as any farmer. Miss Judson never sells any of the grain or hay from the farm. She feed it to her cattle, horses, hogs and sheep. She keeps only registered hogs and sheep and has a good grade of shorthorn cows. She rears good colts each year and attends to the breaking of these herself. She can ride the wildest colt and soon teaches the young animals that she is

In the winter months Miss Judson cuts enough wood to last through the coming spring and summer and attends the repairing of the farm buildings and fences. A good stone henhouse was built by the elder girl for her sister, who cares for the poultry. Large flocks of chickens, turkeys and geese are marketed by the girls each

The girls take pleasure in showing visitors over the farm and talking of their plans to build up the place and make further improvements, but they never beast of having done anything that any other girls would not have done. They are able not only to show a well kept farm, but they can good roads in front of the place. This is due to the belief of Miss Loretta in the virtues of the road drag. She has a heavy drag and after a rain part of the public highway.

This part of the road never causes the road supervisor any trouble and is one of the few pieces of road in the county that is kept in good condition the year round.

Teacher Too Fastidious. Henceforth fastidious public school teachers must not demand that excuses for absence shall be written in ink on perfumed notepaper. Such the old time "fuse," so prone to is the dictum that has been issued teacher in Jones-avenue school refused

When asked about the matter, Inspector Hughes states "She has no right to refuse a note scribbled on brown paper, so long as it is legible and genuine. There are many homes in this city where notepaper is not always handy, and we'll take a note that's written with the worst of pencils on the shabbiest of brown paper if the signature is genuine and if we

This world holds a lot of people who purposely make mistakes. If it is right to say it make "no" decidedly emphatic.

## REID & CHARLES

I have a message of hope and good cheer, of encouragement and inspiration to every suffering woman. I have endured the and inspiration to every suffering woman. I have endured the torture due to female troubles and the consequent despondency and mental agony almost to the point of despairs and I have been restored from this condition to a state of vigorous health, and to the happy, exhibiting frame of mind which accompanies physical well being. This change has been brought about wholly by the use of ORANGE LILY.

In addition I have had the privilege and pleasure of inducing multitudes of other suffering women to give ORANGE LILY a trial, and have received thousands of enthusiastic acknowledgments of the blessings it has brought to them. The following is a sample: following is a sample: Dear Mrs. Currah,-Your very kind letter was received yes-

terday. In reply to your question about my health, I am thankful to say that I am very well. As I have never given you a statement of my case you may be interested in it.

For several years I have suffered untold agony. This suffering was continuous, but I would have violent attacks every few weeks, each attack lasting several days. The first Sunday in November, I felt the pain increasing and so did not go to prayers. The rest of the family did go, and soon after the forcing down pains seized me and I had to remain on the floor until their return. I was in great

pain all night and was very sick for a whole week. Then Mrs. L. came to see me and told me of your wonderful medicine. I got my husband to send for it right away, as I was too sick to write myself. (My doctor could do nothing for me.) I have used 5 boxes of ORANGE LILY, have around and doing my own work. I can scarcely believe it. It brings tears of joy to my eyes. I could shout it to all the world. I cannot speak enough in its praise.

Your friend, MRS, E. H. F.

Receiving, as I do, dozens of such reports each day, I feel impelled to make known to my suffering sisters the merits of ORANGE LILY. It differs from other so-called remedies in that it is not taken internally. It is a strictly local treatment, and is applied directly to the affected organs. Its curative elements are absorbed into the congested tissues, expelling the stagnant foreign matter which has been irritating the membrane and oppressing the nerves, and a grow-ting feeling of physical and mental relief is noticeable almost from the start. It is a positive, scientific remedy, and even if you use no more than the Free Trial treatment you will be very materially benefited.

### FREE TRIAL OFFER

I want every reader of this, who suffers in any way from painful monthly periods, irregularities, leucorrhoea, inflammation or congestion of the womb, pains in the back, etc., to send me their addresses, and I will forward at once, without charge, 10 days' treatment. If your case is not far advanced it may entirely cure you, and in any event it will do you much good. I am so earnest in making this statement, and so positive that it is true, that I trust every sufferer who reads this notice will take advantage of my offer and get cured at home, without a doctor's bill. Address, enclosing 3 stamps, MRS
