

# Watch that Bald Spot

Old, middle aged, and young men should keep a sharp look out for thinning out of hair right on the top of the head.

If your hair has already started to fall, if you have dandruff and your scalp itches at times, your hair lies in Parisian Sage, a really scientific hair preparation.

In Parisian Sage there is one ingredient that supplies nourishment to the hair root, one that kills the dandruff germs and another that puts life and lustre into the hair. But most marvelous of all is one ingredient that makes it possible for the others to penetrate into the scalp, get to the root of the hair and do their duty.

This wonderful agent keeps the other ingredients to soak in and get right down to the hair root where the hair worries and scalp ailments begin. This is why J. B. McLeod guarantees Parisian Sage to grow new hair (if the hair root is not dead), to stop falling hair; to kill the dandruff germs and stop itching scalp or money back.

A large bottle of Parisian Sage costs 50c at J. B. McLeod's and druggists everywhere, or by mail, charges prepaid, from Giroux Mfg. Co., Fort Erie, Ont. The girl with the Auburn hair is on every package.

# Pearsall's Millinery

The small Turban (or Touque) seem to predominate for the early spring wear. Not small shapes merely, but correct designs.

One of our Season's Beauties is a coarse braid in the Bluriot (or New Blue) Color, with three large bunches of imported French Roses in Isabelle (or Jun) shading. But it is not beauty or correctness in design alone are our hats so interesting—it is the combination of Beauty, Style and Prices. In all about three hundred and fifty different styles. Come and see them.

Mr. I. Allen, of Mississippi, and Mr. T. Lee, of Levant, are showing our Spring Hats now, and those in that vicinity should see them.

# STRONG OPPOSITION

## TO PROPOSED SITE FOR TUBERCULOSIS HOSPITAL.

Board of Health Heard Deputation—William McCammon Recommended as Inspector for Garbage Collection.

The members of the board of health, at their regular meeting, Tuesday afternoon, heard a deputation, strongly opposed to the placing of the proposed tuberculosis hospital, on the present site of the general hospital. The board did not take up this matter, after the deputation retired, but Chairman McCammon intimated that a special meeting of the board would be held, to go into the matter.

The deputation, which was composed of D. G. Laidlaw, G. A. McGowan, W. J. Crothers and Ald. Fair, placed before the board a petition signed by many influential citizens, asking that the hospital be not placed on the present site. The citizens signing the petition are in sympathy with the movement set on foot for the erection of the hospital, but urge that the present site would be a great detriment to the city. A site just outside the city was suggested.

Chairman Toye, Mayor Graham and Alds. Harrison and Hoag, of the garbage committee, also met the board, in reference to the appointment of an inspector, for the garbage collection, already decided upon. After a great deal of discussion it was decided to recommend to council that the collection of the garbage come under the supervision of William McCammon, at present sanitary inspector for the city. The by-law calls for the inspection to come under the charge of the board of health, and the chairman of the garbage committee, Ald. Toye, had the matter brought before that body, so that they might make some recommendation should they see fit, to council, as regards who should act as inspector. Ald. Toye pointed out that it was desired to have a man for the position who would meet with the wishes of the board of health. With the adoption of Ald. Toye's scheme, sanctioned by his committee, and the council, the duties of the garbage committee, are now practically at an end.

Chairman McCammon presided at the meeting, and the other members of the board present were Messrs. Taylor, Knapp, Strachan and Ald. Bailey.

The deputation re the tuberculosis hospital, was heard first. D. G. Laidlaw read the petition, and pointed out that the men signing it had contributed sums all the way up to \$100. The petitioners were in full sympathy with the movement for the erection of the hospital, but were of the opinion that it should be built outside of the city.

The names on the petition comprised some of the leading merchants, business and professional men of the city. Mr. Laidlaw referred to the fact that Montreal had been faced with a similar proposition, and had decided upon building the hospital outside of the city. Kingston should do likewise.

Asked concerning the opinion of the doctors on the present site, Mr. Laidlaw stated that while the doctors as a whole had not expressed an opinion in opposition, he knew that there were some who were opposed to the present site. The question should be given careful consideration.

Ald. Fair said that everyone who had signed the petition, had given the matter very careful consideration. It had been stated by a medical man that other cities had placed such an hospital in just the same location as proposed here. He had information from Toronto and London, and this was to the effect that in each place the tuberculosis hospital was located outside the city. The petition had been signed by prominent business men. Only one man approached, had refused to sign the petition.

W. J. Crothers said it would be a great mistake to erect the hospital on the present site, and spoke of the great drawback to the city, from the manufacturers' standpoint. Kingston would become noted for a tuberculosis city, and as a result, it would be a very great drawback, in the sale of goods. Land could be secured outside the city, at a very reasonable figure, and the outside location should be decided upon. He could readily see why doctors would be in favor of the present site. The two hospitals would be together, and it would save the doctors time, in getting from one to the other, when duty called them.

G. A. McGowan also spoke, on the same lines as the previous speaker. It was stated that the board had already approved of the present site for the hospital.

Ald. Bailey felt that the matter was worthy of reconsideration, by the board. He believed the board would be justified in promising the deputation reconsideration.

A letter was read from the directors of the Kingston Hosiery company, protesting against the present site for the hospital.

Ald. Toye drew the attention of the board to the appointment of an inspector for the collection of garbage, as already stated. Without the appointment of an inspector he felt that the whole garbage system would fall to the ground. He pointed out that it had been found in other places where there had been no inspector the collection had been an entire failure.

Mayor Graham was strongly opposed to expending the sum of \$600 or \$700 for an inspector, when the city at present had a sanitary inspector. The latter could do the work. If his duties at present were too heavy, he could be relieved of some of them.

Ald. Bailey said other cities had found that there was need for a special inspector for the garbage, and he felt that it would be safe to pursue that policy. Brantford had a most successful system, and an inspector was employed there. The city could give say \$500 and the board \$100, and for this amount, a good man could be secured.

Ald. Bailey then moved that the board recommends that a garbage and sanitary officer be employed to look after the garbage and sanitary inspection of the city.

Mayor Graham strongly opposed the appointment of a new man. A new man could not be appointed until the services of the present inspector were disposed of. If a man was taken off the police force for the work, as had been proposed, then a new policeman would have to be appointed. He believed the city had sufficient policemen now. The city had dozens of by-laws now, which were not carried out. He did not care what other cities were doing as regards a garbage collector, the question was regarding what Kingston should do. The city should go slow as regards the expenditure of money.

Ald. Bailey held that the present inspector had about all the work he could handle. There would be no use of loading him up with new duties.

Ald. Hoag opposed the expenditure of \$600 for a new man. He favored the appointment of Mr. McCammon.

Ald. Toye pointed out that no sum had been decided on for the salary of an inspector. An amount had merely been suggested. The main point was to have some one appointed who would secure complaints, which might be acted upon by the medical health officer.

Mayor Graham moved an amendment to Ald. Bailey's motion, that William McCammon be recommended by the board as sanitary and garbage inspector.

The board passed two resolutions as follows: "No person shall be allowed to construct dry earth or privy pits in any part of this city, where sewage system is in existence, but must install flush closets, the same to be connected by sewers, this to apply to all new buildings."

At the regular annual inspection, any person who is found within the restricted area, who has not complied with the regulations of the board, regarding the closing up of dry earth closets and privy pits, shall be prosecuted without further notice."

Mayor Graham strongly protested against both the resolutions. He did not believe in forcing people in the outskirts to comply with such a demand. He believed there should be some limit. There were many houses in which the improvements should not be placed, and cited many cases. The board had gone too far altogether in the matter.

# PEAT IN FRONTENAC

WILL BE A VALUABLE INDUSTRY SOME DAY.

J. G. McNulty Says There is Good Coal Deep Down, and Enough of it to Supply Eastern Ontario.

The Ontario Exploration Syndicate, which owns 15,000 acres of mining land around Wilbur, in North Frontenac, seventy miles from Kingston, directly connected with the city by the K. & P. railway, has 20,000 tons of ore on the ground awaiting shipment here to load into vessels.

Just as soon as the syndicate's pier is ready the shipping will begin. So J. G. McNulty, general manager, who was here yesterday, stated. The syndicate owns a great deal of timber, and 4,000 cords of wood are piled around Wilbur. This wood is to be used at the mines.

Mr. McNulty says that Frontenac will some day profit from the peat industry. In the north of the county there are thousands of acres of good peat, which in time will be utilized. He declares that there is a good quality of coal at a fair depth out there, and that there is enough of it to supply Eastern Ontario.

The syndicate is eagerly awaiting the adoption of the reciprocity bill. Mr. McNulty states that he has received some surprisingly low quotations for coal for the mines, provided reciprocity passes.

# BOY SCOUTS INSPECTED

At Armouries Last Night by Col. Hemming.

The three detachments of Boy Scout of the city, St. George's, Y.M.C.A. and Sydenham street were inspected in the Armouries, on Tuesday evening, by Col. Hemming. The scouts formed an imposing cavalcade as they lined up, 150 strong, to be put through their drill. The inspection was very minute and Col. Hemming spoke to nearly every boy in uniform. After the match past Col. Hemming addressed the boys in an inspiring manner complimenting them on the splendid showing they made, of their good appearance and that they marched well. He said, in opinion, there was nothing better to bring out and develop what was in a boy than the Boy Scout movement. There were great opportunities to learn things. The boys are taught how to act in an emergency should anything occur and they are always ready to do a kind act. They also have a good chance to learn different trades for nearly everything is taught. He expressed himself as being quite pleased to have the opportunity to review them.

Misses Hazel Abernethy and Flossie Bogart, the only two girl guides in the city, also participated in the review and marched past with the others. The bugle band of the 14th Regiment assisted with the various calls. A great deal of credit for the way the boys showed up is due the scout masters of the different divisions. Scoutmaster Atkins is at the head of the Y.M.C.A. Scouts, Sergt.-Maj. Hurd those of St. George's and Roy Ward those belonging to Sydenham street.

After the review Sergt.-Maj. Hurd, who is leaving soon for the old country, was presented with a Swastika badge which gives him access to any Scout council in the world. The presentation was made on behalf of the Scouts of St. George's.

After the presentation Canon Starr spoke a few words to the scouts and thanked Col. Hemming for consenting to review them.

Death of Mrs. Quinn. The death occurred on Wednesday morning on Mrs. Ann Quinn, widow of the late Owen Quinn, at the home of her son-in-law, James Tierney, Colborne street. Deceased was born in county Tyrone, Ireland, and had resided in Pittsburgh township nearly all her life. The funeral will take place on Friday morning to St. Mary's cathedral.

Looking After Truants. Three cases of truancy were reported to the police and the lads who are endeavoring to play the old game of "hooky" are being attended to. With the system in vogue in Kingston, the lads have a very poor chance of keeping away from school without being caught.

# GRAND OPERA HOUSE.

"Madame Sherry" to be Produced Thursday Evening.

A significant feature of the overwhelming success in New York of the new musical production "Madame Sherry" which comes to the Grand on Thursday, March 16th, is the lavish praise the production elicited from theatrical reviewers, excerpts from which follow:

Herald—"Welcomed with laughter and applause. It rivals 'Merry Widow,' and is one of the best musical shows in New York in oh! ever so long!"

World—"Easily the brightest and most diverting musical production New York has seen in many days, or is likely to see in as many more. At last a musical show that's novel." American—"A new 'Merry Widow,' Sun—"Audience applauded every musical number and laughed at everything the comedians plainly labeled as a merry jest."

Felix Haney as Ald. Phelan.

That wonderful play, "The Man of the Hour," by George Broadhurst, which has taken New York, Chicago and the entire country by storm, will be the attraction at the Grand, on Saturday, March 18th, matinee and night. No play of the present era has received the attention from press and public that this clever comedy drama has, and it bids fair to go on until the copyright expires. A long stage career is the more assured for it because the interest does not depend upon the rendering of any particular part by a star actor. Throughout the beautiful story run the scarlet threads of laughter, the gray threads of pathos and the white threads of good deeds, and from these variegated strands Mr. Broadhurst has woven a tapestry of humor, love and kindness that touch the eye and heart alike, and the figures stand out with striking fidelity to life.

"Three Twins" Again Scored.

The largest house during the Lenten season greeted "Three Twins," at the Grand last evening. It is just a year ago since this production was seen here, and its return found it as popular as before, principally because Clifton Crawford again headed it. Crawford is a finished comedian, and his vaudeville specialty in act II, was delightful. His dramatic rendering of Service's Yukon verses and the famous "Gunga Din" created great applause. Mayme Gehue in "Yama Yama Man" was another applause earner. The company was strong throughout and the scenic effects were magnificent.

# TO DOUBLE ITS GRANT

So That the Cost to the City Will be Small.

In view of the purchase by the city of a cataraqui bridge, and improvements in the interests of navigation, the Dominion government is to be asked, as soon as the bridge by-law is passed to double its present grant for bridge toll, bringing it up to \$3,000. It is understood that the civic deputation which recently waited upon the ministers at Ottawa, was practically promised that the grant would be increased, and in view of the expenditure contemplated in improvements in the interests of navigation, it is but natural that the government would pay a share of the cost. If the present bridge has to remain another ten years, it is pointed out that the government grant would almost pay for the purchase and the new span, so that the actual cost to the city would be small.

Sometimes the cream of society would make questionable custard.

ANDREW MACLEAN, Ontario Street.

**Curing Catarrh**

Accept Our Advice and Try This Remedy at Our Risk.

Catarrh is a disease of the mucous membrane. The mucous membrane is, one may say, the interior lining of the body. Catarrh therefore may exist in any part of the system.

When the catarrhal poison attacks the mucous membrane, inflammation and congestion are produced and nature fails to throw off the accumulated poisons. The organ which has been afflicted ceases to perform its proper function as nature intended it should. The result is, complication upon complication, which may lead to other even more serious afflictions.

We honestly believe that Maclean's Remedy for Catarrh is made from the prescription of an eminent physician who made a long study of catarrh, and his great success with this remedy was an enviable one.

We want you if you are a sufferer from catarrh in any form, to give Rexall Mucosa-Tone a thorough trial. Use it with regularity and persistence for a reasonable time, then if you are not satisfied, come back and tell us, and without question or formality we will hand back to you every cent you paid us. This is certainly the fairest offer that any one could make and should attest our sincerity of purpose. It comes in two sizes, prices 50 cents and \$1.00. Remember you can obtain it only at—The Rexall Store, G. W. Mahood.
