

YEAR 78—NO. 100.

KINGSTON, ONTARIO, SATURDAY, APRIL 29, 1911

SECOND PART

NASAL CATARRH PRODUCES DEAFNESS RELIEF IN PE-RU-NA

Mr. H. J. Arless, 401 City Hall Ave., Montreal, Quebec, is an old gentleman of wide acquaintance, having served thirty-eight years in the General Post-office of Montreal, a record which speaks for itself. Concerning his use of Peruna, see letter given below.

MR. H. J. ARLESS.

"I have been afflicted with nasal catarrh to such a degree that it affected my hearing."

"This was contrasted some twenty years ago by being exposed to draughts and sudden changes of temperature. I have been under the treatment of specialists and have used many drugs recommended as specifics for catarrh in the head and throat—all to no purpose."

"About three years ago I was induced by a confere in office to try Peruna. After some hesitation, as I had doubts as to results after so many failures, I gave Peruna a trial, and am happy to state that after using eight or ten bottles of Peruna I am much improved in hearing, and in breathing through the nostrils."

So strong, so rich, so flavorful—a little of Shirriff's

Shirriff's True Vanilla

Goes further—and the difference in its exquisite aroma and tempting fragrance is wondrous. You will find real economy in Shirriff's. Ask the groceryman.

Caution—A smaller quantity required than of any other extract.

Other delicious Shirriff flavorings are: Lemon, Almond, Rose, Pineapple, Strawberry, Ratafia, and nutty more.

The Mexican Vanilla Bean Gatherer

\$3.50 Recipe Free for weak Men

Send Name and Address Today—You Can Have It Free and Be Strong and Vigorous.

I have a rare possession, a prescription for nervous debility, lack of vigor, weakened manhood, falling memory and lame back, brought on by excessive, unnatural drains on the life of youth, that has cured so many men and women right in their own homes—without any additional help or medicine—like I think every man who wishes to regain his manly power and virility, quickly and quietly, should have a copy. I have determined to send a copy of the prescription free of charge, in a plain, ordinary envelope, to any man who will write me for it. This prescription comes from a physician who has made a special study of men and I am convinced it is the most-acting combination for the cure of deficient manhood and rapid failure.

It is All Bosh. New York, April 25.—President Taft in a reciprocity speech, says America first talk is all bosh.

Tips For Farmers

BY UNCLE JOSH.

It nearly always pays to harrow winter wheat in the spring. Whether it will pay or not this year will depend upon the condition of the soil and the amount of rainfall. When a hard crust has formed over the land the harrow breaks up this crust nicely. What is harrowed primarily for the purpose of retaining the dust mulch and thus saving moisture. Some people claim that harrowing destroys weeds but whether it will destroy weeds and not the grain is doubtful. It is true that some of the small weeds will be killed by the action of the harrow, but we do not advocate harrowing for this purpose alone. In this work care should be exercised in adjusting the teeth so they will not dig out any of the young plants. Harrowing should begin in the spring, as soon as it is necessary.

Most farmers have had the best success by harrowing the grain with and not across the drill rows. In this way fewer plants are torn out, and the dust mulch will be equally well maintained.

Pointers for Pure Milk.

The dairy department of one of the American Agricultural colleges calls attention to many things that are important to be observed in securing pure milk:

It is now generally known that bacteria take an active part in making milk unfit for food. Souring, bad odors, and bitterness are usually due to some form of micro-organism.

Therefore, every possible procedure must be adapted to exclude foreign material, which may carry with it millions of bacteria. The hard thing to impress upon the people in general is the minuteness of these organisms. It must be remembered that millions of these little fellows exist in a drop of milk or water.

Of course, live steam is highly important in cleaning milk bottles. The ordinary rag is a scathing mass of bacteria.

Keep the dust out of the cow barn as much as possible. All shelves should be dusted every day; also the tops of stanchions and benches.

The cow should first be brushed with a common stable brush; then, as the milker sits down to milk, he should wipe the flank and the udder with a clean, damp rag.

The clothes of the milker should be used only for the purpose of milking, and no other, and, of course, should be clean.

The pail should be partially covered. Lime is a good agent to sprinkle about the barn.

The milk should be cooled as quickly as possible.

Mustard for Poultry.

It is stated that at least the problem is solved. After a twelve-months' test it has been proved by the Allen Poultry company, of England, that mustard increases the egg yield, increases the fertility of the eggs, and produces stronger chickens, weighing more in a given period than those from stock birds that had no mustard.

This result has been endorsed by members of the medical profession who point out that mustard increases the flow of gastric juice and aids digestion. The experiments have proved that you can make over fifty cents more profit from each hen kept if you give just one teaspoonful of mustard

to the salt food of each six hens daily during the winter months.

A water fountain for chickens can be made by simply using a three gill wine bottle, and a sweater. Fasten a loop of strong wire to a post just large enough to let the bottle pass through. The bottle is then filled three-quarters full of water, and tared upside down with the mouth resting in the sweater, the wire keeps the bottle in position. The sweater always contains water as long as there is a drop in the bottle. This is a very useful device to use for young chickens during the brooding season.

From Many Farms.

Wealthy Englishmen are interesting themselves in the fruit growing districts of Niagara, St. Catharines and Simcoe.

A bill is before the legislature of Indiana which asks that provision be made for the registration of sales of tuberculosis.

Indiana farmers produce seventy-two million dozens of eggs annually. Their present value there is fourteen cents at country points.

S. M. Curt's, of Buffalo, N.Y., has recently secured a patent for a device which heats incubators and brooders by electricity.

The meat trade in England suffers from unusual quietness in the face of low supplies and small receipts, trade is dull, and demand unsteady.

A farmer named Marshall Gorell, living near Danville, Ind., recently shot and killed a grey eagle which was trying to carry away one of his pigs.

Investigations made by the United States Department of Agriculture show that undrawn poultry will come out of cold storage in much better condition than drawn poultry will.

J. M. Bruce, the well-known horseman of Lashburn, Sask., announces his intention of selling under the hammer a number of pure Canadian imported and Canadian bred Clydesdales.

Over 500 farmers met at Grand Forks, North Dakota, have decided to send a monster delegation from the state of North Dakota to interview President Taft in opposition to the proposed overtures for reciprocity with Canada.

The U.P.R. has this year distributed amongst its station agents over 100,000 packages of flower seeds. Intelligent use of these seeds are encouraged by awarding prizes to the best gardens and finest kept premises around the railway stations.

The officials of the city of Montreal recently seized 4,846 cans of frozen eggs, and condemned them as unfit for food. Recently Judge Weir handed down decision in regard to this matter, ordering the city of Montreal to release these eggs and pay the costs of litigation amounting in all to \$4,600.

Prof. W. T. Macoun has been experimenting with varieties of tomatoes since 1901, and he has produced from Sparg's Earline, an improved tomato which is not only earlier, but a bigger producer. He is also bringing out some new varieties of apples which are regarded as promising additions to Canada's staple kinds.

The majority of eggs are laid between the hours of nine o'clock in the morning and three o'clock in the afternoon.

Electricity for Farmers.

It is stated, on the authority of Sir James Whitney, that W. P. Sotman, chief engineer of the Hydro-Electric commission, and W. Bert Roadhouse, secretary of the department of agriculture will go to Europe on the 25th inst. for the purpose of finding out how electricity can be made available for farm use in Ontario.

There are many ways in which electricity may be employed to help agriculture besides heating and lighting and operating farm machinery. Why should such an investigation be made without the presence of an agriculturalist with the commission? The selection of a competent man who is scientifically and practically familiar with

DONALD BRIAN AND DAPHNE GLENNE, IN "THE DOLLAR PRINCESS," AT THE GRAND ON THURSDAY, MAY 4TH.

agriculture should have been the first move of the government in this matter. It seems that our authorities are still laboring under the delusion that anyone knows enough about farming to do what for the department of agriculture—Toronto Globe.

Trouble at Calving Time.

There is no period in the life of a cow when she requires and should receive more attention than at the time of freshening, owing to the fact that she is so susceptible to complication of diseases such as milk fever, retention of the afterbirth, stoppage or paralysis of the bowels, mammitis, or inflammation of the udder, and many other diseases.

Among those mentioned, perhaps the retention of the afterbirth is the most common, and while it does not necessarily terminate fatally, it is exceedingly successful in running a birth is often retained owing to the fact that a cow has given cold water at the time of freshening, or permitted to freshen in a cold, damp stable, or out in the rain when the weather is unfavorable.

When the afterbirth is retained it should not be removed by main force, owing to the fact that parts will remain. These parts are converted into matter which set up an intense inflammation, causing a caustic condition of the genital organs. The animal absorbs the pus which forms from the retained parts, and the absorbing tissue of the animal. This pus is excreted from the system to some extent from the kidneys, bowels and udder, thus rendering the milk from a cow that has retained her afterbirth unfit for human food.

Cows thus afflicted should be given a dry, clean, well-ventilated box-stall. A blanket should be placed upon them in cold weather. They should be given ground oats, bran, good clover or alfalfa hay, plenty of water

Pimples Cannot Live

When the Blood is Purified With Stuart's Calcium Wafers.

Trial Package Sent Free.

Pimples, blotches, eruptions, etc., simply disappear like magic when you stop the supply of impurities which cause them.

Stuart's Calcium Wafers go into the blood through the same channel as food. They stimulate and nourish it. They destroy foreign and unnatural impurities found there and remove all impurities very quickly.

In many cases pimples and eruptions disappear from the skin in five days. These little wafers are so strong that immediately after they go into the blood their beneficial effects make themselves known. The blood is cleansed rapidly and thoroughly, the impure is separated from the pure blood and the waste matter and poisons are carried from the system.

The person who suffers the humiliation of pimples, blotches and eruptions should know and feel that the blood is in bad condition, and delay is quite dangerous, and is liable to affect many organs quite seriously.

Purify your blood and you give nature the means to successfully fight all manner of diseases. Calcium Sulphide is one of the ingredients from which Stuart's Calcium Wafers are made, and it is the strongest and most powerful blood purifier known to science.

This wonderful purifier is reduced to the entire medical profession and is generally used in all doctor's prescriptions for the blood and skin.

Stuart's Calcium Wafers peculiarly preserve the strength of Calcium Sulphide better than other methods—thus giving the most rapid cures owing to the purity of the ingredients and their freedom from decay, evaporation and chemical weakness caused by many latter day modes of preparation. Stuart's Calcium Wafers are sold by every druggist. Price, 30c. or send us your name and address and we will send you a trial package by mail free. Address F. A. Stuart, 175 Stuart Bldg., Marshall, Mich.

with the chill taken from it, and such medicine as will have a tendency to ripen and expel the afterbirth. The genital organs should be washed out with an antiseptic solution, and in this way a cow which has retained her afterbirth, so long as she is in a strong, healthy, profitable condition, whereas if she is neglected she will be ruined as a profitable producer.—Dr. David Roberts in Farmer and Stockman.

Produce and Prices.

Kingston, April 23.—Market clerk reports the prices prevailing as follows: Carrots, 50c. to 60c. per bag; turnips, 50c. to 60c. per bag; cabbage, 5c. each; onions, \$1.50 per bag; potatoes, 75c. to 85c. per bag; celery, 5c. to 7c. per head.

John McKay, Brock street, reports as follows: Hides, trimmed, 8c. per lb.; horsehides, \$3 to \$3.25; calfskins, veals, 12c. per lb.; deacons, 75c. to 90c.; wool, sheepskins, from 90c. to \$1; tallow, in cakes, 6c. per lb.; beeswax, 25c. per lb.; tinsol, 45c. per lb.; wool, washed, 20c. per lb.; unwashed, 13c. per lb. Raw furs: Red fox, No. 1, large, 85c. No. 1, medium, 84c.; marmoset, No. 1, large, \$2 to \$3; No. 1, medium, \$1 to \$2; mink, No. 1, large, \$6 to \$7; No. 1, medium, \$3 to \$4; spring rats, No. 1, large, 35c.; No. 2, medium, 25c.; kits and skulls, at value; springy rubbed skins at value.

J. A. MacFarlane, Brock street, reports flour, feed and grain selling as follows: Oats, 35c. to 40c.; local wheat \$1; buckwheat, 60c.; barley, 60c. to 65c.; rye, 70c.; peas, 90c. to \$1; yellow corn, 65c.; flour, bakers, \$2.75 to \$2.90; farmers, \$2.80 to \$2.90; Hungarian patent, \$2.90; oatmeal and rolled oats, \$4.50 per bbl.; cornmeal, \$1.80 to \$2; bran, \$23 per ton; shorts, \$25; baldd straw, \$7; loose, \$8; hay, loose, \$8 to \$9; pressed, \$9 to \$10.

Meat—Beef (local), carcass, \$4c. to 9c.; prime western beef, \$10 per cwt.; by carcass, cuts, 10c. to 15c.; five hogs, 65c. lb.; dressed hogs, 9c. per lb.; 10c. to 15c. by quarter; mutton, 10c.; lamb, 12c. to 13c., etc.; veal, 5c. to 8c. lb.; ducks, \$1. to \$1.25 each; turkeys, 15c. to 20c. lb.; fowl \$1 to \$1.50 pair; chickens, \$1 to \$1.25 pr.; butter, creamery, 24c.; rolls, 17c. to 18c.; prints, 17c. to 19c.; eggs, fresh, 17c. to 20c.

Domestic Fish Co. reports prices: 15c. lb.; white fish, 12c. to 15c.; pike, 5c. a lb.; skinned digby herring, 25c. lb.; white fish, 12c. to 15c. lb.; pike 10c. lb.; Chinook salmon, 30c. lb.; speared herring, Yarmouth, blotted, 10c. doz.; perch, 30c. doz.; Atlantic salmon, 30c. lb.; salt codfish, 5c. to 15c. lb.; halibut, 12c. to 20c.; freshaddock, 10c. lb.; bullheads, 15c. lb.; red herrings, 20c. box; mackerel 10c. a lb.; lake herring, 8c. lb. sea bass, 12c. lb.

It is now open season for muskrats in the province of Quebec and Ontario, and will remain open until May 1st.

Prices will range on this article as follows: Square handled rats, large, 35c.; small, 25c.; shot and cut, 15c. to 25c.; bow handled are 5c. a skin less in each grade.

Maple syrup is selling at \$1 per gallon.

George Mills & Co., quote the following prices for raw furs: Spring Muskrats large, 30c. to 40c.; medium, 30c. to 35c. Mink, large, \$4 to \$6; medium, \$3 to \$4.50; small, \$2 to \$4. Raccoon, large, \$2.50; medium, \$1.50; small, 75c. Red Fox as to size, \$3 to \$6. Skunk as to size and length of stripe, 50c. to \$2. Weasel, 20 cents to 30 cents.

Erinsville Visitors.

Erinsville, April 27.—John O'Neil is making preparations for building a new dwelling during the coming summer. Mrs. Howell (formerly Miss Mary Murray), and family, of Montreal, are visiting in this vicinity. Edward McLaughlin, many years ago a resident of this place, came up from Kingston on Saturday evening on a visit to her brothers and sisters in this vicinity.

The bodies were taken out of the vault and deposited in the cemetery last Monday. The funeral of the late Mrs. James Burns, was largely attended on Thursday, 20th inst. George Reid and staff of Tanworth, have been doing some carpenter work for M. J. Hopkin during the past week.

"Love Agents Wanted"

COMPARISON No. 3

Mr. O'B., of Renfrew, Ont., took an Ordinary Life \$100,000.00 Policy at age 56 with a New York Life Insurance Company, at a premium of \$6,368.00

In a letter addressed to and circulated by the Company he expressed his appreciation of the receipt at the end of the year of a dividend of \$6,368.00 752.00

Just a Comparison

The above is for a Whole Life policy as at age 56. The Policyholders' Mutual Life will issue a policy of this kind at a premium of \$5,338.00 or a net annual saving left in the Policyholder's pocket, as compared with the premium charged by this New York Company of 1,030.00. As this was left in the policyholder's pocket at the beginning of the year it was worth, at least five per cent. to him or an additional 50.00 which would have made his gross saving, had he taken his policy with the Policyholders' Mutual Life 1,080.00 His dividend was 752.00 His saving, therefore, had he taken his policy with the Policyholders' Mutual, would have been more than 50 per cent. above the amount of his dividend from this New York Life Company. He states that the dividend was highly satisfactory. His saving would, therefore, have been 50 per cent. more satisfactory had he taken his policy with

FEATHER TRIMMINGS ARE MASHED ON SMALL HATS.

A season ago enormous plumes were arranged to droop gracefully over the edge of big hats. The idea now is to have the plume as compact as possible—a solid bank. If one might thus describe anything so delicate as ostrich—of rich plumage all around the crown of the hat. These hats are necessarily expensive, for several very handsome feathers must be used to produce the right effect. The hat illustrated is a small affair of Panama straw with a rolled brim faced with velvet. The white willow feathers entirely cover the top of the hat.
