A FURNACE THAT WILL GIVE YOU AS MUCH HEAT FROM SIX TONS OF COAL, AS YOU EVER GOT FROM SEVEN, IS ONE YOU CANNOT AFFORD TO OVERLOOK.

STEEL RIBBED FIRE POT

ating surface three times. This

conducted away from the coal as

out waste.

The "Hecla" will do this: It is built, to save coal at every point, but the big coal-saving feature is the Steel Ribbed Fire Pot. By adding Steel Ribs to the Fire Pot the surface which radiates heat is increased three times.

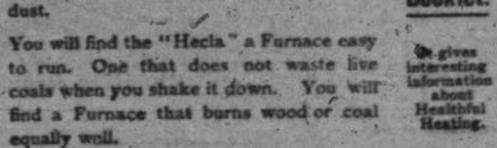

Every Furnace has flanges or projections of some sort on the fire pot to get more radiating surface, because the heating capacity of the fire pot increases as you increase the radiating surface. But the "Hecla" is the only Furnace that has attained the greatest possible radiating surface and the reason is that where other Furnaces have clumsy cast-iron Flanges, the flanges on the "Hecla" are made of steel plate and fused to the fire pot casting by our patent process.

Hecla Furnace

A test extending over three years, demonstrated that this ribbed fire pot made a saving in coal-13% rapidly as it is created and with- Isn't that worth looking into?

Ask someone who owns a " Hecla,"

You will find the "Hecla" the best warm air Furnace you ever saw. You will find that it gives an even distribution of heatheat that is moist and free from gas or
