As Delegates to Convention of Chosen Friends.

The following Kingstonsians went to Toronto, at noon today, as delegates to a convention of the Chosen Friends:

Council No. 20, Dr. A. W. Richardson, R. C. Bell, James Gowan and Charles Linton; Council No. 217, Daniel Staley and James Daley; Council No. 121, Harry Sharp, Charles Clark and William Beck.

The convention will open on Wednesday, and will continue for three days. It is expected that five hundred delegates will be in attendance.

Fire Engine Got Stuck.

The fire engine belonging to the upper station started for the scene of the blaze on King street this afternoon, but before the other rig had started, the driver received orders to go over Clergy street and down William. He went past Clergy, and instead of going down Brock to Bagot turned out Sydneyham. The road, which was recently torn to pieces, and has not been rebuilt, was very muddy, as the result of the heavy rain, and when the large gray team attached to the four-ton engine got nearly across the bit of bad road they became tired out and could not get the engine through. The engine remained there for half an hour, despite the repeated efforts of the horses to get it out. When the firemen returned from the run an extra team of horses was hitched in front of the regular team and in this way the engine was drawn out.

Sang "God Save the King."

Stratford, June 6.—The London conference rose to a man Monday afternoon when a resolution condemning the No Temperance decree was put. Then the big gathering broke into "God Save the King" and applauded simultaneously. There was no mistake in taking the spirit of the conference as being a unit in favor of the strong resolution, it being insisted that "Roman" be placed before "Catholic," an omission in the original resolution.

DELEGATES ARE HERE

FOR THE CONGREGATIONAL UNION MEETING.

Committee Meetings, on Tuesday Afternoon and Evening—Formal Opening of Union on Wednesday.

The fifth annual meeting of the Congregational Union of Canada was opened in the First Congregational church, Kingston, Tuesday afternoon, at three o'clock. PICTURE FILM BURNED.

Heroes and Heroines Rushed to the Street.

New York, June 6.—One hundred and forty miles of moving pictures melted in the air on Monday, leaving no ashes behind, when flames swept through the two-story building of the Powers company, film manufacturers, in the Bronx. Seventy heroes and heroines, who were rehearsing a moving picture drama when the fire was discovered, fled for their lives to the street, and for an hour stood in their stage clothes on the sidewalk and watched the firemen battle with the blaze.

The flames spread to the adjoining building, occupied by William Finger, one of the firemen on duty. Finger dashed into the burning building to save his wife and three children, but they had already escaped. One hundred chickens and forty ducks in the rear of the premises were roasted alive. The damage was estimated at \$175,000.

In Token of Gratitude.

Winnipeg, June 6.—Archbishop Langvin has issued an enthusiastic call to the diocese of St. Boniface, directing that the anthem "God Save the King" be sung in Latin at all services on the day of the coronation of the leading part his majesty has taken in abolishing the clause from the coronation declaration reflecting on the Roman Catholic creed.

The Top of the Heap.

Montreal Star.—It doesn't surprise Canadians any more to be told that Sir Wilfrid Laurier is the star attraction at the great first used to plume ourselves on the fact. Then, as he continued to outshine his contemporaries in scenes for which nature would seem to have made him expressly, we took his pre-eminence for granted. As it stands, anything less than a command of interest. Sir Edmund Barton ran him a good second at one conference. Mr. Deakin finished a furlong farther back at another. General Botha and Dr. Jameson got friendly greeting in their day. Sir Joseph Ward has moved in to second place for the present occasion, but it is no better than second. The first remains, almost as of right, for Laurier.

Artificial Furs.

"La Nature" describes a new process for producing artificial furs. The raw pieces of pelt are frozen, and the skin carefully shaved off, thawed, and sent to the tanners to be made into leather. The frozen fur which remains is allowed to thaw slightly at the bottom, so that a small part of the hair is freed from ice. This thawed portion is then covered with a solution of rubber, which is allowed to set. The result is that large seamless pieces of fur are obtained much cheaper than those which come with the natural skin. These same artificial furs are said to be more lasting than the real ones, they are immune from the attack of moths.

Artificial Furs.

The Hamilton police found an open suit case, partly filled with blood-stained clothing in the box. They are now trying to clear up the mystery.

HAD VERY BUSY MONTH

RECORD NUMBER CASES AT GENERAL HOSPITAL.

Lack of Accommodation is Being Felt From Time to Time—Dr. Boyce Submits Report on Convention.

The board of governors, of the Kingston general hospital met on Monday afternoon. Before the business of the month was taken up, the chairman welcomed, in a most hearty manner, Francis King, who made his first appearance, as member of the board of governors. Mr. King represents the Kingston Old Boys' of Montreal, who, at their first annual dinner, held in Montreal, a short time ago enthusiastically and generously subscribed a nice sum for the Kingston general hospital, requesting Mr. King to represent them on the board. Besides the \$100 necessary to qualify the secretary, Hugh C. Walker writes that there will be a still larger amount forwarded later. The management feel that they will have in Mr. King a very desirable governor and advisor, and he received a most hearty reception by the members of the board present.

The committee of management, in their usual monthly report recommended that a number of improvements be made to the morgue, also in several other parts of the building. This was adopted.

The report submitted by the medical superintendent showed the month of May to have been a very active one in the hospital, in fact the busiest since the institution has ever had. Usually there is a slight falling off at this season of the year, 457 patients were admitted and 164 discharged. Besides twenty-five outdoor treatments. Up to the present time, the number of patients treated since the beginning of the year is largely in excess of any previous year.

Dr. Boyce, who has been attending the Canadian Hospital Association, held at Niagara Falls, presented a very interesting and instructive report, and after hearing it the members expressed themselves as very pleased with the suggestions, and felt that it certainly was in the interest of the institution to have the superintendent attend these conventions.
