HALF MILLION IN TWO TRUNKS. Colorado State Will Collect Big Inheritance Tax.

Denver, Col., June 26.-The chance discovery that two old trunks in a hotel store room hold cash, jeweller, and securities aggregating \$500,000 in value, will enable Colorado to collect an inheritance tax from the estate of Horace Granfield, of Mount Vernon, N.Y., who met death in an automobile wreck near here on May 7th last.

Granfield's relations came here and took the body home for burial. Then the widow began a hunt for property in this state. A friend happen ed to mention to the public administrator that Granfield was rich and had left two trunks in a hotel. The ministrator found the tranks opened them, to reveal the money and valuable securities.

FIELD OF OPERATION. Canada to-day has over 25,000 miles of railroad

in operation and over 6,000 under construction or being surveyed. According to statistics furnished by the Department of Railways, one locomotive is required for every six miles of track. Last year per year, but have had to refuse many satisfactory there were 4,079 locomotives in use in Canada. The completion of the present 6,000 miles under n Canada; covering 333,000 sq. ft. construction will call for 1,000 new locomotives. In addition, 400 locomotives will be required each year to replace existing equipment. The railroad tional buildings and, as required, still further

PLANT AND EQUIPMENT.

We have examined the books and accounts of The Capadian Locomotive Company, Limited, for a period of four years ending December 31st, 1910,

During the period covered by our examination, the profits of the Company, including interest on investments (which has aggregated about \$27,500.00 per

annum), after providing for depreciation, have in no year amounted to less than \$300,000.00, excepting in the year 1910, when the profits amounted to

only \$167,032.03. The profits for the three years, 1907, 1908, and 1909, on the basis mentioned, have averaged \$333,282.08 per annum, and the falling off in

the business of the year 1910 is explained by the management as being largely due to the curtailment of operations resulting from the delivery of

therefore a thorough knowledge of the business. At pany have the most up-to-date and modern plant

In addition the Company have 180,000 sq. ft of reclaimable land on which they can erec; addidevelopment which is taking place in Canada is enlarge their plant at the minimum of cost. The Company are fortunate in having cheap power, unexcelled shipping facilities, and in being exempt from taxation, except School taxes, up to the year 1916. They have probably the best trained and most loval staff of skilled workmen on the continent. ESTIMATED EARNINGS.

PRICE, WATERHOUSE & CO.,

Chartered Accountants.

The Canadian Locomotive Company, Limited, It is estimated that as a result of the contemhave been building locomotives since 1855 and have | plated increase to the plant, the earnings within the next few years should be at least \$600,000 per the present time they are turning out 75 locomotives annum; or in the neighborhood of 18% on the Common Stock after providing for Bond Interest, Sinking Fund, and Preferred Stock Dividend. In making provision for an increase in the

capacity of their plant, the Company are not entering into a new and untried field. They have a thorough knowledge of the business, and the increased output can be managed with the same office and selling staffs. . Other economies will be effected through manufacturing in larger numbers than has been the case in the past. The reputation of the Company is so good that the demand for their locomotives far exceeds the supply.

Applications will be made in due course to list the Preserence and Common Shares on the Toronto and Montreal and London Stock Exchanges.
