

THE SPORT REVIEW

WHAT THE CHAMPION PUGILISTS ARE DOING.

Johnson to Meet Laling—Wolgaest is Anxious to Get into the Ring With Knock-out Brown.

Ad. Wolgaest is now ready for Freddy Welsh, Paeky McFarland, and Knock-out Brown, but he is particularly anxious to get into the ring with the fast-named, according to reports from Frisco. Ever since the East Side Dutchman outpointed the champion in the bouts at Philadelphia and New York the Cadillac boy has been longing for a chance to even things up.

New York boxing fans are still discussing the Wolgaest-Moran fight of Tuesday. A great many of them had believed that Moran, with his superior skill could stand off the champion for the twenty rounds of the contest, and the Briton's overwhelming and comparatively speedy defeat was somewhat of a surprise.

The Eastern baseball league race is not yet half over. Rochester has played seventy-nine games and has eighty-four yet to play. Toronto, Baltimore, and Providence have played seventy-two games and have eighty-two games yet to play. Jersey City has played sixty-five and has eighty-nine to play. Montreal and Newark have played sixty-four games and have ninety yet to play, while Buffalo has played only sixty-three games and has ninety-one yet to play.

"Jack" Johnson, the negro pugilist, has signed an agreement to meet Bill Lang at Sydney, N.S.W., on Easter Monday, 1912. Racing men have circulated a petition in New York favoring the Canning hills at Albany and have secured the signatures of thousands of persons. The petition will be forwarded to Governor Dix. Within the past week 10,000 letters have been mailed to the governor asking him to favor this legislation. These methods were employed to offset the letters and postal-cards mailed at the instance of a professional reform organization.

At Cleveland Uhlau, the world's champion trotter, stepped a mile in 2:03 in a workout, the last half being made in a minute flat. Uhlau last season trotted in 1:58 without the aid of a wind shield or a runner-in front. His world's time is 1:57. Uhlau is the only two-minute trotter. The fal will endeavor on the opening day of St. Thomas races, next Tuesday, to lower the Canadian half-mile track record of 2:05 set by himself at Stratford.

Cobb, of Detroit, hit safety in forty consecutive games before Walsh, of Chicago, stopped him last Tuesday. Construction work will be commenced within ten days on the new arena rink to be located on the old Mutual street rink site, Toronto. Belmont's Waterville set a new Canadian record for 12 miles at Fort Erie in 1:25. He ran the mile in 1:37, and was not extended. The challenge of William Fogwell of New South Wales has been accepted by the Sportsman's cup trustees, and he will row Ernest Barry for the English title.

UNIVERSITY AND SCHOOLS.

(Continued from Page 1.) Personality and virility in the student; and that its readiness to permit of adaptations is not altogether a weakness. These elements of strength that are inherent in the system need not be sacrificed in making adjustments that will eliminate, in part at least, the wastefulness and lack of purpose that in places detract from the worth of the educational process as it is now carried on.

Considering, for instance, the dilution of studies which occurs at the matriculation stage, the university of college can materially help the schools by having regard to a systematic study course that will involve continuity and definiteness of aim. In prescribing the various examination requirements there seems to be a tendency to overlook the effect of the whole upon the student's mental training and to emphasize subjects and departments. This is not in conformity with good educational practice.

To get away from this method of doing things is not quite so easy as it seems to be, because in the ordinary course itself there is a manifest weakness due to lack of co-ordination among the various departments of study. While, then, the unifying principle has not always been prominent among the more advanced classes, it has naturally become the custom of individual instructors to recommend details of work and of examination that may have an injurious effect on the educational worth of the secondary school course.

The university has two services that it must render to the civilization of the period to justify its existence and privileges. One of these is commonly referred to as the conservation and distribution of the knowledge of the past. The importance of this cannot be over-rated because the wisdom thus garnered in the crystallized human experience of the ages is the essence of all progress, which enables each generation to build on the work of its predecessors. The other function, that of inspirer, guide and inciter to effort, is equally important.

On the one hand, the institution is concerned to make knowledge available and capacity effective; on the other its duty is to induce activity and conserve energy. It is questionable if this latter aspect of university work is put so prominently forward as the other, yet this duty of guidance and stimulation is undoubtedly a function that is of the nation and the race. The bearing of this upon the problem under discussion is, that the influence of the university should be felt for good through all grades of schools, and that the lower institutions should be strengthened through their relation with the higher ones. Clearly, the benefits would be mutual, for maturity of mind is dependent on training and culture as well as upon years.

As has been intimated, the curriculum should be a scientific whole with parts related and proportioned to secure the end desired; it should, therefore, be far from any mere fortuitous grouping of subjects, and any changes should be made with this unity of design in view. If it is assumed that the purpose of education is to adjust the individual to the conditions of civilization as he will encounter them, and that the function of education is to provide a suitable definition, it is possible to select the more important elements that determine a choice of subjects suitable for a school and college course. These must have regard to (1) the mental characteristics of the individual who is being educated, including his capacity, experiences and changing attitudes; (2) the purpose of the education, including the outlook upon life, the ideals to be reached and the relationships to be sustained; (3) the agencies available for educational purposes, including knowledge, institutions and instruction.

If the view is held, as is generally the case, that the human race has progressed by very gradual development from a condition of mere animal existence to the highly specialized and complex life of the present day; and if education is a process of purposive adjustment by which individuals, as yet immature, are trained and taught to live effectively, within that civilization then it seems only reasonable that those agencies which have been most prominent in bringing about the changes of the past will be those most effective for preparing for the future. This is only true, however, if the extension of human capacity in a rational scientific way by regarding it as a phase of the great biological scheme of development. It has the further merit of using the instrument to form the individual, not making the student secondary to the subject.

On this basis studies for educational ends may be grouped in a general way into language for communication and thought expression; quantity studies, dealing with space, number and computation; nature studies, that have to do with matter, life and the laws of the universe; constructive studies, that relate to the adjustment of materials to man's convenience and necessities; and human studies, embracing those subjects that relate to man's progress and advantage, as history, aesthetics, morality and religion. The proper grouping of these in any one period of the student's life constitutes a curriculum, which gradually passes from simple to complex as the unfolding powers of mind become capable of dealing with the more abstract and generalized forms of knowledge.

Clearly some of these will be of greater value than others during the periods of secondary school and college education, if the individual is to be properly fitted for meeting the conditions imposed by the social order of the day. The first place must undoubtedly be assigned to language as the vehicle of all thought expression and acquisition, and among language studies, facile ability to use the mother tongue is the first great necessity. It is unfortunately necessary to emphasize the point that the English here meant is not that of the ex-

DETECTED BY A FRIEND

DOES MALE ATTIRE AND WORKS IN FOUNDRY.

Young Married Woman Spends Two Years of Her Life Posing as Man. London, July 8.—A curious story comes from Chertsey. It is alleged that for two years a young married woman has donned man's attire and has masqueraded as one of the male sex. For several months she lodged in Chertsey, in the vicinity of which her husband and other relatives reside, and among various unusual occupations for a woman she was employed in the foundry of Herring & Son, Chertsey, for five months.

The woman, who is stated to be the mother of two children and the wife of an Addlestone carter named Smithers, has, with cropped hair and attired in man's clothing (and indulging abundantly in cigarette smoking), apparently hidden her identity from all with whom she has come in contact. Before last October she was in Working. Then she went to Chertsey, earning a precarious living by selling boot laces.

She was given employment in the foundry of Herring & Son's establishment. She was usually helping the iron molders and occasionally did some light, youthful mending. Though she was of youthful appearance in her cloth cap and her man's garb, there was nothing to distinguish her from other young fellows, and it was not until beginning of March that she let the firm's employment. Subsequently, she hawked fish.

The identity is said to have been established through meeting a Chertsey man who "gave her away" at her wedding, and who had known her for years. When challenged by him, the person stoutly maintained that she was a man, and adopted the same attitude before the police. Subsequently, however, it is said she made certain admissions and promises which procured her release.

It is said that sometimes she was in the same public house at Addlestone as her husband without his discovering that his wife was present.

Tamworth Hotel Sold. Tamworth, July 6. Mrs. Edward Douglas of Buffalo is visiting at L. P. Wells'. Mrs. Dixon and family left on Wednesday last for her home in Darlington. Miss Miller left on Monday last for her home at Wiarston. Luke Bell, formerly of Sheffield, visited Tamworth on Tuesday last and left for his home in the North-West same day. Peter Carson is quite poorly. Mr. Fitzgerald has sold his real property to Mr. Bradshaw, of Tvesee, for \$8,800. Nicholas Phalen and sister, of Rochester, N.Y., visited Tamworth and Erinsville for the past week. Seafus Black was taken with a sunstroke while working in the field one day last week. Mrs. R. Huckvale and baby, Shields & Saul will have their brick kiln ready to burn in a few days. John O'Brien and Michael Neville spent July 4th in Watertown, N.Y.

A Beautiful Complexion. As a substitute for a beautiful complexion, some women resort to paint and powder. But the more sensible use Wade's Iron Tonic Pills, which produce a natural, healthy complexion, make new blood and a robust constitution. Price 25c., at J. B. MeLeod's drug stores.

Was There Ever One? "Pap!" "Yes, my son." "What is in accommodation train?" "Why, my boy, it's one a woman can keep from getting under a man's feet when she sees him coming her way."—Yonkers Statesman.

Woman Cattle Dealer. London, July 8.—For the first time in history a woman cattle dealer was seen, yesterday, in Leicester cattle market.

CAMPBELL, THOMPSON & COMPANY OFFER \$300,000 7 p.c. Cumulative Preference Shares AT PAR WITH A BONUS OF 25 PER CENT. IN COMMON STOCK OF The Campbell Flour Mills Co. Limited (Incorporated under the laws of the Province of Ontario). Head Office---West Toronto CAPITALIZATION Authorized. Issued. 7 per cent. Cumulative Preference Stock \$650,000 \$650,000 Common Stock 650,000 650,000 BOARD OF DIRECTORS HON. ARCHIBALD CAMPBELL, Toronto. President The Campbell Milling Co., Ltd. JAMES A. RICHARDSON. Vice-President James Richardson & Sons, Grain Merchants, Kingston, Ont. D. A. CAMPBELL. Secretary-Treasurer The Campbell Milling Co., Ltd., Toronto. A. W. CAMPBELL, Director The Campbell Milling Co., Ltd., Toronto. N. H. CAMPBELL, Director The Campbell Milling Co., Ltd., Toronto. JAMES PLAYFAIR, President Inland Lines, Ltd., Midland, Ont. E. B. THOMPSON, Campbell, Thompson & Co., Toronto. TRANSFER AGENTS AND REGISTRAR—Toronto General Trusts Corporation. BANKERS—The Bank of British North America. SOLICITORS—For Company—Cousworth & Richardson. For Issue—Bicknell, Bain, Strathly & MacKellan. MILLS—West Toronto, Peterborough, Ont. Under construction—Midland, Ont. THE COMPANY HAS NO BONDED OR MORTGAGE INDEBTEDNESS. Application will be made in due course to have both Preference and Common Shares listed on the Toronto Stock Exchange. Campbell, Thompson & Co. will receive subscriptions for \$300,000, or 3,000 shares of \$100 par value each of the 7 per cent. Cumulative Preference Stock at par, carrying a bonus of 25 per cent. Common Stock. Payments may be made as follows: 25 per cent. on allotment. 25 per cent. on November 15th. 25 per cent. on September 15th. Subscribers have the privilege of prepaying in full the balance upon their shares. Interest at the rate of six per cent. will be allowed on all payments up to January 15th, 1912. After that date, the regular dividends of seven per cent. will accrue. Dividends will be payable quarterly. PROPERTIES. THE TORONTO MILL is well situated on a valuable site of about three acres, and has a capacity of 1,000 barrels of flour and 100 tons of feed per day. It is running day and night, but has been unable to supply the ever-increasing demand for its products. THE PETERBOROUGH MILL was purchased (May 15th, 1911) from the Central Milling Company. It is well situated on the main line of the C.P.R., and has a capacity of 400 barrels of flour and 30 tons of feed per day. It is a most valuable addition to the Campbell Milling Co's plant, and it is necessary to run day and night in order to relieve the congestion of business of the Toronto mill. THE MIDLAND MILL—A site for a new mill has been secured beside the Aberdeen elevator at Midland, Ont., comprising nine acres of land, including a water frontage of 200 feet, on which it is intended to erect the new mill, which will have a capacity of 1,500 barrels a day, with buildings arranged to increase the output to 3,000 barrels per day, without structural alterations or additions. The Aberdeen elevator has a capacity of 1,200 bushels, and is one of the most complete and up-to-date on the lakes. The Tiffin elevator, with a capacity of two and a half million bushels, is within easy reach. The G.T.R. and C.P.R. have centralized in building huge elevators at Midland and Victoria Harbor. The directors, after full consideration of the many possible locations, have decided there is no better situation in Canada for milling for both export and eastern trade than at Midland, where all the advantages of low freight rates, cheap electric power (hydro-electric), and a low fixed assessment for ten years have been secured. ASSETS. The Company has acquired the business of the Campbell Milling Company, which includes the mills and elevators at West Toronto and Peterborough. The mills, real estate, equipment, good-will, etc., have been conservatively valued at \$825,024; not taking into consideration the valuable site and concessions at Midland, and from the shares now offered to the public, the Company will have about \$300,000 in the treasury to carry on the business and build the new mill at Midland, making total assets of \$825,024, there being no bonds or mortgages on the real estate or plants. The Canadian Appraisal Company have appraised the plants. On the investment of the two mills now running the Campbell Flour Mills Company, Limited, are earning eighteen per cent., after allowing for all expenses, depreciation, etc., and with the same experienced management and advantages enumerated in the prospectus, it is reasonable to suppose that when the new capital is invested it will bring equally good returns. EARNINGS. We hereby certify that the earnings of the Campbell Milling Co., West Toronto, after allowing for cost of management, depreciation, etc., have been as follows: 12 months ending July 31st, 1910. \$41,974.93 9 months ending April 28th, 1911. \$46,204.65 (Signed) STEFF BRON, Chartered Accountants. The interest required to pay 7 per cent. on Preference Stock is \$45,500. From the above earnings it will be noticed that this amount is earned by the Toronto mill in nine months, and with the added capacity of the Peterborough plant now in operation, and the Midland Mill which will soon be in operation, this will more than double the present capacity, so the earnings will be very materially increased. ESTIMATED EARNINGS. The mill at Midland will be completed early in 1912, and when the three mills are running, figuring very conservatively by past earnings, the net profits are estimated as follows: Net earnings \$100,000 7 per cent. preferred dividend \$54,500 Showing over 7 per cent. on the common 45,500 \$ 9,000 THE GROWTH OF BUSINESS. The necessity for expansion is shown forcibly by the following figures, which represent the annual gross sales of the Toronto mill: 1907 \$545,163.16 1909 \$1,108,966.00 1908 \$36,630.17 1910 \$1,130,477.20 EIGHTEEN YEARS OF SATISFACTION. The new company, receive the benefit of the good-will and business, which has given eighteen years of satisfaction to the purchasers of their brands of flour, such as "CREAM OF THE WEST," "QUEEN CITY," and "MON-ARCH." It is the only large flour mill situated in the City of Toronto, and in eighteen years they have built up a tremendous local trade, besides being well-established throughout the Dominion, West Indies, South Africa, Newfoundland and the United Kingdom. MANAGEMENT. The Management of the Company is in strong, practical hands. The President, the Honorable Archibald Campbell, has been in the milling business a lifetime, and associated with him are his three sons, who have been managing the business for six years. The experience of James Playfair, of Midland, and James Richardson, adds strength to the Board of Directors. The Directors have been looking ahead and have extended all their lines and formed connections, feeling confident that with their present organization and all the advantages enumerated above, they will be able to dispose of the entire products of the new mill, in addition to their present output, at profitable rates. MARKET. Flour is an every-day necessity, and flour ground from our Canadian North-West wheat is finding a ready market the world over, and with increasing home markets, it is necessary for our established mills to greatly increase their output to take care of the ever-increasing production of wheat. Subscription books are now open at our offices, and will close on or before Monday, July 17th, at 3 o'clock p.m. The right is reserved to allot only such subscriptions and such amounts as may be approved, and to close subscriptions books WITHOUT NOTICE. Prospectus and forms of application may be obtained from and applications forwarded to Campbell, Thompson & Co., 43 King Street West, Toronto.

Health, Pleasure, Comfort. There is no other trip in the world better for health, pleasure, and comfort than the trip by the BLACK DIAMOND SS LINE. From Montreal down the St. Lawrence River to Charlottetown, P.E.I.; Sydney, N.S.; and St. John's, Nfld. Sailings from Montreal every Saturday. Steamers Rosalind and Bonavista. The most delightful holiday trips imaginable. Bookings can be made at all Ticket Agencies. Write to-day for Illustrated Booklet, with full information, sent free. A. T. WELDON, G.F. & P.A., 112 St. James Street, Montreal.

The Imperial Life Assurance Co. of Canada. IN Summer you buy the Winter's Coal because it is cheaper and you can get it. Insure your life for the same reasons—while you are in health, and because NOW it will cost you less than later. How much Insurance you ought to carry, and what it will cost, I will take up with you PERSONALLY if you write me direct. State your age, resources, prospects, and I'll gladly advise you. One argument concerning Insurance, which isn't old, hazy and threadbare, is this: Every pay-roll man needs Insurance to do the pay-roll's service to his family after the pay-roll loses his name by death. But, no salary-earning man needs or should take more Insurance than he can comfortably carry. I want you to get just the right kind of policy; and I want to prove to you why you ought to get it AT ONCE. If you ask my advice, I'll feel you value it. Consult me and see. J. B. COOKE, District Manager, 332 King Street, Kingston, Ontario.
