Blair Settlement, July 11 .- The farles our new premium offer to A great many from this locality will attend the picnic at Westport on the 12th.: Mrs. William Blair gave birthday party at her home on Wedneeday, the 5th, in honor of

A LINEN SUIT FOR COUNTRY CECH WEAD.

Some of the embroidered linens with square drawnwork motifs done directly on the fabric, are charming. These drawnwork motifs are extremely fashlonable this year, and the woman who knows how to do this pretty-and not difficult-work may make for herself a handsome costume at very little expense. This suit is of pale pink linen, the embroidery and drawnwork being done with white threads. The edges of the coat are scalloped, giving a dainty finish. The sking is narrow according to the prevailing lines and the loose coat fastens across toward one side with a single crochet button-

It's easy to grow plants in a Sunshine-heated home

Pure, Warm Sunshine Air

DEOPLE living in homes heated with I ordinary furnaces often claim they cannot grow plants with any degree of success. This is due to the fact that ordinary furnaces are not provided with an Automatic Gas Damper. There is nothing to prevent coal-gas, which is deadly to plant life, being forced up through the registers.

Now, when the gas in the combustion chamber of the Sunshine reaches a certain pressure it sways open the Automatic Gas Damper and passes up the chimney, consequently there is no chance It to escape through the registers. Instead, the air that passes through the registers is pure, warm, Sunshine air, laden with the proper degree of moisture from the water-pan. It's the kind of air that makes plants thrive and is good to breath into

If you want to guard your home (and who doesn't?) against evilfurnace (gugranteed) in your cellar.
