HELD IN BROCKVILLE

THE FIRST ORANGE LODGE IN THE PROVINCE

The Men Who Founded the Order—They Were Great Friends and Warm Hearted Orangemen.

Two men, Arthur McClean and Ogle R. Gowen, both living in Brockville and both very great friends and enthusiastic Orangemen.

Shortly after came the troublous time of Papinist and the rebellion of 1837 drew near. The brethren in Upper Canada deemed it a most opportune time to band themselves as loyal Orangemen under the British flag.

Accordingly they gathered at the old Court House, Brockville, on the 1st of January, 1830, where, with unique ceremony, "in due and ancient form," the first Grand Orange Lodge of Canada was organized.

The following were the first officers and members: Bro. Arthur McClean, W.M.; John Gilmour, D.M.; Henry Bennett, treasurer; Thos. Tory Tompkins, secretary; Phillippe Mussen, 1st committee man; William Woods, 2nd committee man; John Price, 3rd committee man; George Upton, 4th committee man; Gibson Gilmour, 5th committee man.

The warrant for L.O.L. No. 2 having been granted, it was conveyed on July 4th, 1831, by the following officers and members: Bro. Arthur McClean, W.M.; H. Bennett, treasurer; Thos. Tory Tompkins, secretary; John Price, Wm. Boon, Henry Thornhill, Gibson Gilmour, and properly instituted by these brethren.

The first celebration of No. 1, was held by the brethren on July 12th, 1831, and the minutes say that "no business transacted, but met numerously and celebrated the day."

The brethren from the commencement were most scrupulously careful and particular in their dress and personal appearance upon parade at each annual celebration of the Battle of the Boyne.

BIG WATERSPOUT IN CHESAPEAKE BAY.

Remarkable Phenomena Tore Lighter From Moorings at Baltimore.

Baltimore, July 17.—A water spout that broke all records in size, shape and movement for this phenomena in Maryland waters formed off the great steel works at Sparrow's Point during a storm, Saturday, and caused consternation among the hundreds of small craft on the Patuxent river as it swept with fearful velocity out into the Chesapeake Bay.

As seen from the marine department of the steel works, the engineers say it appeared to be one hundred feet in diameter and three hundred feet high, connecting the waters with the heavy, lowering storm cloud. No damage is reported, although several small boats had narrow escapes.
