THE PHOENIX

Porcupine Will Rise From Its Ashes

THE Demon "Fire" has again visited Porcupine, leaving in its wake desolation and loss of life. We regret exceedingly to record these facts, but we desire to pay tribute to those hardy heroes who bravely fought the cruel flames until they dropped in their tracks and died as did the greatest martyrs of ancient times. The pages of the history of Northern Ontario, when written, will be emblazoned with the number of brave lives that were "snuffed out" in the line of duty. The armies of the world have supplied many heroes, but not one of these can boast of braver men than the miners and prospectors of the Porcupine District.

The fire has done its worst, but still the richness of the various mines remains untouched. In fact, this conflagration in its ravages has actually benefited the mines. It has completely cleared the surface of all obstacles, so that, in future, prospecting for new veins will be rendered an easy task. The fire of a week ago at the Dome Extension laid bare a number of rich showings unknown to this company. The same will be repeated throughout the entire Porcupine District. We venture the statement that before another week is over the richest surface discoveries yet made in Porcupine will be heralded broadcast.

Nothing but the hand of man can remove the immense riches which lie buried beneath the surface in Porcupine. Buildings may go and so also machinery, and the greatest loss of all—HUMAN LIFE—but the mines still remain, and their intrinsic values unimpaired. A reaction in the stock prices may occur, we say, but if such actually happens, we advise our clients to increase their holdings on any weakening in Porcupine issues. Beyond a doubt, all these stocks will come back and go through the highest figures yet recorded for them. We firmly believe in the future greatness of the Porcupine District as a PERMANENT GOLDFIELD, and those who invest judiciously in its mines are certain to reap handsome returns.

We are especially favorable to the purchase of—

A RIDEAU DISTRICT THE CHURCH SERVICES

CANADIAN COURIER, TORONTO, SPEAKS WELL OF IT.

A Cottager's and a Fisherman's Paradise—Beautiful and Historical Spots.

People in Ontario have overlooked the Rideau Lakes region. Here is one of the finest stretches of land and water scenery in Ontario, close to the larger centres of population, and yet less famous or popular than Muskoka, Lake of Bays, and Temagami. The explanation is simple. No tourist region in Canada ever gets much advertising outside that which originates in the railway offices. Show me a region which is served by no railway, and I will show you a region whose fame is merely local.

The Rideau Lakes Navigation company has had steamers running from Kingston to Ottawa for years, and the company issues a nice illustrated booklet. But this small company could not afford to advertise in the national publications of the United States and Canada as do the Canadian Pacific, Grand Trunk, Canadian Northern, and Intercolonial railways. The Grand Trunk touches the Rideau at Kingston and Ottawa, while the Canadian Pacific crosses it at Smith's Falls, but otherwise the Rideau has no railway service. No railway runs parallel with it, nor makes a pretence of developing its tourist traffic. Hence the Rideau is almost (but not quite) as local as the Newmarket canal.

Some day a railway will run from Kingston to Smith's Falls, and will touch at the best spots along the Cataract river and the Rideau lakes. Then there will be a rush to what is now a cottager's and fisherman's paradise, for adjacent towns, Ottawa, Smith's Falls, and Perth people with an odd visitor from Montreal and Toronto, are enjoying in comparative solitude one of the most beautiful and most historic spots in Ontario. If these people wish they will keep that railway away as long as possible. When it arrives it will bring the American fisherman who joyfully cleans out every water in which he fishes. It will also bring the lady with two maids, a nurse, and a supply of fashionable gowns such as might add to the splendour of Newport or Atlantic City.

IN MARINE CIRCLES

Arrivals and Departures of Vessels at This Port.

The steamer Mississquoi was up from Gananoque to-day.

The steamer Chieftain arrived up from Quebec last evening.

The steam barge Jesca was down from Smith's Falls yesterday.

The steamer Jacques is in the Kingston dry dock—having some rivets tightened in her hull.

The steam barge Westport passed through on her way from Smith's Falls to Napanee with general merchandise.

The steamer Caspian which has been out of commission for the past week, was put back on the coast again Saturday. The steamer Aletha made the trip as far as Kingston, and the Caspian will take the trip from here up at five o'clock.

At Folger's wharf—Steamer Alexandria arrived in port last evening about nine o'clock with a heavy cargo. She cleared for up the lake at midnight. The steamer America took a large excursion down the river Saturday afternoon for a tour of the islands.

The latest reports from the scene of action near Alexandria Bay, where the barge Davy is sunk say that the barges were placed over her Friday afternoon and were making good progress. If nothing unforeseen happens, it will only be a question of a short time until she is brought to the surface.

M.T. Co.'s elevator—This was a very busy place Friday and good time was made in unloading and clearing the vessels which came in. The barges were relieved and sent down the river, another was sent to Charlotte and seven barges and three steamers were unloaded and sent on their way, the tug Glide cleared light for Prescott with an oil barge in tow.

At Swift's wharf—Steamer Rideau Queen cleared this morning for Ottawa; steamer Rideau King is expected from Ottawa this evening; steamer Belleville is due to pass up to-night; steamer Dundurn is due to pass up to-day; steamer Kingston took the river trip to-day; steamer Lamonde up from Clayton to-day; steamer Britannic stopped on her way down yesterday afternoon and discharged considerable freight. She had a heavy passenger list also.

There seems to be a scarcity of deck hands along the river now. Many of the larger passenger steamers are short-handed. It is said that a large number of men who formerly "decked" along the river have forsaken the passenger boats for the private yachts, a greater number of which appear to be in these waters than ever before. On the latter vessels, the men claim the hours are shorter and the pay is, in many cases, better than that received on the larger boats.

Found a Drifting Row Boat.

Harold Waters and Vincent Oldis, of the C.P.R. telegraph office, together with a friend from Toronto, were camping at Cedar Island, the other evening, when a skiff drifted ashore near their camp. They went down to examine it and found the oars and oarlocks all right and the rudder in perfect condition. A piece of blue glass was stuffed in a hole in the bottom to keep the water out. The boat was painted a dark blue, and evidently belonged to Knapp, of the boat livery, as his name was on it. The boys are at a loss to know how the boat came to be drifting in this manner.

"Do this in remembrance of me," 7 p.m., topic, "The Inner Life." Miss Mae Hinkley, soloist of St. James' Square Presbyterian church, Toronto, will sing "Abide With Me." Come and welcome.

Among the heavy losers by the Porcupine fire is Charles A. See, J. P., druggist, of South Porcupine. Mr. See is a son of Alexander See, famous acrope, and has been in the north country for the past three or four years. Mr. See's loss will amount to \$12,000 or \$15,000. He will begin rebuilding on the same site as soon as material and men can be obtained.

GRUMLEY BROS.

THE RIGHT OF WAY MINING COMPANY

Capital, 2,000,000 Shares. In the Treasury, 314,500 Shares. Par Value, \$1.00.

We advise the purchase of this Mining Co's. Shares at the Market, for the Following Reasons:—

- Their total shipments since Jan. 1st this year, which have been made bi-monthly, amount to 798,995 pounds, or nearly 355 tons of Ore. The mine promises to continue these shipments for some time to come, having large bodies of Ore blocked out.
- Their quick assets of \$14,500 of shares in the Treasury, and a good cash balance.
- The Company's option on a Northern Ontario Gold Producing Property. (Write for particulars.)
- The apathy of stocks during the holiday months makes Right of Way a good purchase at present prices.
- DIVIDENDS.—Right of Way Mining Co. paid 8 per cent. per annum up to Jan. 30th this year, and on the discovery of the Gold Fields in Northern Ontario they considered it better for the welfare of the shareholders to purchase a good Gold Property instead of declaring their usual 2 per cent. quarterly dividend. There should be something substantial in the way of dividends accruing to shareholders before the year is over, and every likelihood of a payment being made in the form of a dividend during the interval. We accept orders in Porcupine and Cobalt Stocks, future delivery, on receipt of 25 per cent. margin, either in cash or certificates of active stocks.

Too much credit cannot be given Mr. Sullivan for his generous contribution and the encouragement he has given the Separate school students.

The summary of the results of the Separate schools for the past four years is as follows:—
 St. Mary's, eighty candidates successful out of eighty-five.
 St. Vincent's, forty-eight candidates successful out of sixty.
 Convent, fifteen candidates successful out of twenty-nine.

During the past year not even the unfair overcrowding of Principal Rielly's classroom with two classes totalling fifty-four students nor the interference with his duties of many worries could prevent the repetition of his usual success. If this is not a complete vindication of Principal Rielly's splendid work then I know not what is. He was the right man in the right place and the few members of the board, who opposed him have already found it out as the parents long
