A Lecture on Canada.

The Hampshire Observer has a lengthy account of a lecture, which was given on Canada, by Miss Agnes Deans Cameron, under the auspices of the Women's Liberal Association. The lecture was a most entertaining one, and at the close very hearty thanks were tendered the lecturer. "Between the Gates of Canada" was the subject, and it was listened to by a large audience.

Ontario's Prison Figures.

According to the annual report for 1910 for the prisons and reformatories of Ontario, issued by the Provincial Secretary, a decrease of 65 in the number of prisoners sent to Kingston is shown, while there was an increase of 61 in the number sentenced to the previous year. The commitments for murder last year were 41, as compared with 21 in 1909; manslaughter 10, as compared with 11 the previous year.

The total number of persons committed to jails or lock-ups of the province last year was 13,987, an increase of 122 over 1909. Of this total number, 3,381 were temperate, but less than 13 per cent. could read and write.

Dr. Bruce Smith lauds the parole system which has been recently introduced.

Refused a Title.

The recent batch of titles that has been granted to Canadians emphasizes the fact that during the past few years the title has been offered on two occasions to Mr. R. B. Angus, who is now president of the Bank of Montreal. For some reason, however, which he has never even told his friends, Mr. Angus has always preferred not to accept it, evidently being quite satisfied just to be known as he always has been—plain Mr. Angus. His refusal to accept a title, however, is all the more surprising as a number of the men with whom he is daily associated have been rather eager to accept them.—Courier.

U. S. Emigration to Canada.

Immigration into Canada during 1910 reached a total of 303,091, as compared with 184,381 for 1909, an increase of over 64 per cent. 178,489 arrived via ocean ports and 124,602 came from the United States; 129,422 were men, 68,915 women and 54,754 children. Of the immigrants from the United States 74,990 were men, 25,215 women and 24,397 children.

Of the immigrants from the United States the largest number was furnished by the State of Washington, 37,830, followed by North Dakota 15,881, Minnesota 13,687 and Michigan 8,005. Every state and territory, however, was represented.

In the virtue line we all lay claim to more than we are rightfully allowed. Think of it! A boasted civilization and thousands of prisons and poor-houses!

YOU NEEDN'T DESPAIR

Here's an Offer That Should Interest Sufferers of Skin Irritation.

First of all we want to explain that the remedy we are about to tell you of carries our promise of money back for the mere asking to anyone not thoroughly pleased with its use. That should unquestionably establish the sincere faith we have in it.

Parasites or germs cause eczema, and eczema is probably the most prevalent cause of all skin ailments. To overcome them, the remedy must of necessity destroy or remove the parasite or germ before relief can be obtained.

Possessing remarkable antiseptic, germicidal, cleansing, soothing and healing power, the curative value of Reaxal Eczema Ointment is very pronounced in the treatment of eczema and allied skin diseases, whether of the dry, scaly sort, the weeping type, where there is a flow of ill-smelling excretion, or the interstercular kind, such as pimples, blotches, discolorations, ringworm or acne. It is very useful for treating bites, nettle rash, insect bites and wounds. It is ideal for the skin ailments peculiar to children.

Reaxal Eczema Ointment is grayish-white in color, has a pleasant odor, and is very cleanly for use. If you are a sufferer of skin irritations or eruptions in any form, whatever, we urge you to try a box at our risk. At the mere hint of dissatisfaction you may have your money back. Two boxes, 50c and \$1. Remember, it is only sold at our store—The Reaxal Store, G. W. Mashead.

A BUSH HOLIDAY.

A Day Off In B.C. as Described by a Hospital Worker.

An hospital in the bush sounds very lonely; but only those who have lived along the coast of Vancouver Island can realize how wonderfully grand it is. The hospital of which I have charge is situated in many miles north of Vancouver. I had a day's work for many months, and was just getting a bit slack when I awoke one morning in August to find the sun streaming into my room. It was one of those sparkling clear mornings when everything stands out with that remarkable clearness peculiar to Western Canada.

Think how much I should like to take a "day off," and repair to one of the lakes to fish. I had known my wish at breakfast time, and we arranged that the doctor's wife and myself should go off, taking with us a male patient who had been under the treatment of leg, and a mad scramble followed.

After helping with the morning ward work, and packing up a hasty lunch, I was just fixing up my fishing tackle when the whistle of the first train of logs came down to a front not very far up in the woods.

This meant hurry, for the men cannot lose time waiting for holiday-makers. So off we trotted just in time to scramble into the engine cabin, and away eight miles through the bush till we reached the lake which was to be our destination.

Having got down again from the engine, we made our way to the lake edge, there to find an old boat; into this we scrambled, and pulled out a little way, then threw out our lines. We had plenty of bait, and landed a male halibut first trout; but the sun shone too brightly for the fish, and they soon became lazy.

While they were enjoying a "siesta," we rowed about two miles across the lake, and landed on the very smallest of islands, which we christened "The Isle of Delight." Here we made a fire and prepared a lunch, giving our patient his in the boat, as he, poor fellow, could not land.

After our repast we again settled down to fish, and a very exciting two hours followed, landing trout as fast as we could for two hours. In fact, we were so engrossed that we had forgotten the train foreman's instructions to be at the water tank at 4:30 p.m. Now it was after 5 p.m. The last train of logs had gone down, and our position was indeed a serious one. After much cogitation we decided ourselves we finally agreed that there was at any rate no use remaining in the boat, that we had better get to shore, and that I should walk the two miles to the nearest camp and ask the manager to kindly send us home on a "loose engine."

Suddenly through the stillness came a strange sound. Oh, joy! it was the whistle of a train! We could scarcely believe our ears, but it surely came nearer and nearer, and at last hove into sight. We waved frantically, and pulled with all our might to shore, but the men who were waiting for us to us hurry. And we obeyed their instructions to the letter, but the task of getting our patient out of the boat in a hurry was an extremely difficult one, and, looking back on it, I hardly know how we managed it.

However, we eventually reached the line, and managed to squeeze ourselves into the small space available, for it was no train and carriage we had stopped, but an engine only, and we were soon speeding on our way home. We learned that an engine was going down to bring back a water tank, otherwise we should have fared badly—how badly I do not like to think. As it was, we got back safely with our fine load of fish.

And a very nice homecoming it was. Patients waiting to us, as we rounded the corner, evidently in the look-out, and even military honors, for the gramophones was playing on the veranda.
