Tips For the Farmer

BY UNCLE JOSE.

Many poultrymen who are anxious for eggs in winter stop their hens laying by keeping them confined to the hen-house and only allowing them a few handfuls of wheat daily.

When the work has been done, turn your attention to the fowls. As the moulting season is over, perhaps the simplest way is to treat the fowls, both old and young, with lard into which tobacco has been steeped.

Care of Pigs. A good many people who raise pigs every year know that they should use care and do certain things to preserve the health of their little pigs, but some of them overlook it until it is too late.

Neglecting the Eggs. Many eggs are like Caesar's wife, "above suspicion"; others are like the famous curate's egg, "good only in parts."

A Daily Ration. For a well balanced ration, Wallace's Farmer gives the following: 25 pounds of corn silage, two pounds of bran, five pounds of corn chop and two and one-half pounds of cotton seed.

Take It Away. That's what our patrons say when served with Belfast Gingers Ale or English Ginger Beer that do not bear our label.
