

MAY GO STILL HIGHER

PRICE OF CHEESE ON THE LOCAL BOARD.

Expect Trade With Old Country Will Be Heavy in Fall—Seven Years Ago Cheese Sold on Local Board for Little Over Eight Cents.

These are great days for cheese-makers. They are reaping the best prices in years, and the prospects are that the price will go still higher.

On the board, on Thursday, the record of the season was broken, when cheese sold at 13 5-16 cts. per pound.

Market reports go to show that the prices have been high on all the boards in the eastern district, the past couple of weeks.

Lake Ontario Park.

The attraction of the band in the city did not have any material effect on the large attendance at Lake Ontario Park last evening.

Members of the family who gathered around their parents for the celebration were Mrs. H. Stockton, daughter of Mr. and Mrs. G. E. Coates and son, New York, Mr. D. L. Brown, son and daughter, Sudbury, Ont., and Mr. and Mrs. G. E. Pearson, Jr., and family, of Deseronto.

TWICE REPORTED BURNED.

Citizens Were Doubtful About the Hotel Frontenac.

When the news of the fire at the Frontenac hotel, reached the city, on Thursday afternoon, a great many citizens did not believe that it could be true, and for this reason, that just a little over a week ago, a report of a similar nature went the rounds of the city.

The report was not given much credence, until the announcement was made in the newspapers. It was some what remarkable that the fire should occur right after the false report had gone the rounds.

The first report about the fire originated in this way. There was a fire in the neighborhood of the Hotel Frontenac, and a Kingston boat was passing that way at the time.

Mr. Haycock intends remaining in Calgary until about Wednesday, and assures the farmers that there will be no short time this year.

ATTRACTING MUCH ATTENTION.

Is the Work of Putting Down New Pavements.

The work of putting down the new pavements is attracting a great deal of interest, and almost an hour of the day, quite a large group of interested spectators can be seen watching the work from the sidewalk.

It is amusing to hear some of the conversation on the side lines. Each one has an idea how a certain piece of work should be done, and nine times out of ten the person is of the opinion that he knows more about it than the fellow who is on the job.

Ald. Carson has the idea that the roadway is not being put down right, but the men think it is O.K. after the meeting of the city council, on Wednesday afternoon, several of the city fathers made an inspection of the work, but as yet, none of them have made an announcement as to the merits of the work.

WEALTH OF THE WEST

IS \$200,000,000 IF BUMPER CROP IS HARVESTED.

Unequalled for Seven Years—Sufficient Twine Used to Go Round the World 154 Times.

Impressed that with ten days' sunshine in the three prairie provinces, \$200,000,000 worth of wealth in grain and cattle will be assured to the west and Canada generally, J. L. Haycock, dominion inspector of animal twine, arrived in the city, yesterday.

"All the cattle I saw are quite fit for export. There is a stretch of 178 miles of country in the Qu'Appelle valley that looks as promising as anything I have ever seen. It is equally good on both sides of the track. There is the same story at Saskatoon, and again at Alberta."

Being the twine inspector, Mr. Haycock naturally sees the great prosperity reflected in the twine industry, and he declared that if the bumper crop materializes, that in the North-West territories, probably 20,000 tons of twine will be used.

His duties are to examine the twine when it is shipped, and see that it is of proper length and marked with the number of feet to the pound.

Mr. Haycock intends remaining in Calgary until about Wednesday, and assures the farmers that there will be no short time this year.

TO INSPECT FILTRATION PLANT.

Board of Health Invited to Ogdensburg, N.Y.

What will be done to make the water supply of the city pure? This is the big question which has to be dealt with and it will be one of the questions to come before the board of health, when the members get together for their first meeting, after the summer vacation.

Chairman McLeod, of the board of health, is of the opinion that a trunk sewer will have to be built to relieve the situation, and he also has in mind a filtration plant. Some time ago, there was some talk of some of the members of the board of health going to Ogdensburg, N.Y., to see the filtration plant there.

OFF TO THE WEST.

The Last of Farm Laborers' Excursions on Fridays.

The last of the farm laborers' excursions to the west took place on Friday morning, and in all, about thirty men, some young and some middle-aged, left on the trip, having responded to the call to the golden west.

Thirty made the trip over the Kingston and Pembroke railway, and the Grand Trunk had a similar number. About fifteen of the number hailed from the United States, coming over on the steamer from Cape Vincent on Thursday, the majority being from Watertown and district. The other excursions to the west, earlier in the season, also had a great number of citizens from Uncle Sam's territory.

About thirty left, about ten o'clock, on the excursion which the Grand Trunk railway made to the west, for farm-laborers. A much larger number went on Thursday, on the other side. The men going via the Kingston and Pembroke left at 7.45 o'clock.

Harlow Houghton, of Brantford, catcher of the Frontenac baseball team, was sleeping on the second floor of the dormitory. He was not awakened when the fire started and his feet were slightly burned. He was carried down a ladder to safety.

Eugene Coler, of Summit, N.J., was seriously ill with typhoid fever in the hotel when the fire broke out. He was removed on a mattress to a nearby cottage. A peculiar feature of this is that the physicians say that the shock to his nervous system, instead of having a deterrent effect on his recovery, had the opposite effect and his condition was considerably improved this morning. He was later taken to Montreal.

In the main office of the hotel was a valuable painting of the cathedral at Milan, valued at \$18,000. This picture and its frame was saved. Another painting was in the hotel, but the frame was set into the wall, making it impossible to get it out. William Howe, deputy collector at Clayton, seized a knife and cut the picture from the frame. The picture is valued at \$2,000.

George Rogovoy, the famous Russian cellist, who is leader of the Frontenac orchestra, was one of the heaviest individual losers. Among his personal property destroyed was a valuable cello, \$600 worth of music, and \$1,000 worth of medals presented to him in Europe. The medals, although of great value from a monetary standpoint, were more highly prized by Mr. Rogovoy on account of their associations, and he feels his loss very keenly. All that he saved was the cello on which he was playing at the time of the fire and his evening suit.

At the benefit concert held, Tuesday night, the musicians got about \$1,000, which was lost in the fire. Joseph Calhoun, a guide, is supposed to have burned to death. The last seen of him he was engaged in saving personal effects from the hotel. During the excitement he was forgotten and for has not been seen since. Even if he should have burned to death the heat was so intense that bones and all would have been consumed.

Robert J. Reddy, manager of the hotel, estimates the total loss to the building and contents to be about \$750,000. The insurance is about \$250,000.

Buckley Guaranteed Hats. Are sold in Kingston only at Campbell Bros., the leaders in men's hats.

ONE MAN MISSING

VANDALS BUSY WHILE FIRE RAGED.

One Man Fell From the Roof of the Club and Fractured His Skull—Narrow Escape of Guests and Employers.

Watertown, N.Y., Times. One of the worst features of the Hotel Frontenac's fire was the wholesale stealing of property which had been removed from the burning building.

It is estimated that fully \$10,000 worth of personal effects were carried away by thieves. They even stole the axes which the Clayton firemen had brought over with which to fight the fire, and used them in breaking open trunks and stealing the contents.

Some were detected on the back part of the island, carrying trunks away bodily. They did not confine their attention to the trunks alone, but even broke into the rooms of the annex and stole property from the rooms.

Many of the guests did not have time to pack their goods in their trunks, but wrapped them in sheets, and these were quickly stolen.

No arrests have been made of any of the thieves, as there has been so much excitement here and the authorities have been too busy. It was the worst case of vandalism ever known at the river and has occasioned much comment.

J. Averbach of New York, who had a room in the annex, had \$40 in money and \$3,000 in jewelry in his room, which was broken into and stolen.

Charles Martin, manager of the Frontenac Yacht Club house, which was about 400 feet from the hotel, was seriously injured. He was on the roof of the club house keeping the sparks from getting into the building. The roof became slippery and he fell to the ground, fracturing his skull, breaking one arm and spraining his ankle. He was unconscious for a time and is seriously injured. He was taken to Clayton.

Rev. Missin of Clayton was working on the bridge connecting the main building and the annex, chopping it in two to prevent the flames from spreading. He chopped the structure in two and when it fell he was carried with it. He was pinned down under some heavy timbers, but was rescued. His injuries are not serious.

Harlow Houghton, of Brantford, catcher of the Frontenac baseball team, was sleeping on the second floor of the dormitory. He was not awakened when the fire started and his feet were slightly burned. He was carried down a ladder to safety.

R. Allen, of Brunswick, Me., jumped from a second story window, and was not injured.

Eugene Coler, of Summit, N.J., was seriously ill with typhoid fever in the hotel when the fire broke out. He was removed on a mattress to a nearby cottage. A peculiar feature of this is that the physicians say that the shock to his nervous system, instead of having a deterrent effect on his recovery, had the opposite effect and his condition was considerably improved this morning. THE MARINE TIDINGS

TO KILL THE DANDRUFF GERM

Is the Only Possible Way of Having an Effective Cure. If you see a woman or a man with luxuriant glossy hair you may be sure neither has dandruff to amount to anything. In nearly every case where women and men have thin brittle hair, they owe it to dandruff. There are hundreds of preparations that "claim" to cure dandruff, but not one but Newbro's Herpicide tells you that dandruff is the result of a germ burrowing into the scalp and that permanent cure and its consequent falling and baldness, can only be had by killing the germ; and there is no other preparation that will destroy that germ but Newbro's Herpicide. "Destroy the cause and you remove the effect."
