

DOWN NOW TO LIES

OPPOSERS OF RECIPROCITY INSULT THE WORKINGMAN.

Agreement Takes Off What You Eat, But Keeps Protection on What You Make.

Driven from point to point, beaten in argument, beaten in facts, the opponents of reciprocity have at last come down to bold, flat misrepresentation and falsehood.

They insult the intelligence of the workingman. They talk as if he could not think for himself, and would not read the agreement for himself.

Reciprocity means cheap food for the workingman, and ample protection for the workingman's industry.

The agreement shows that grain, vegetables, fruits, and potatoes, 30 per cent. on automobiles, 32 1/2 per cent. on plumbing fixtures, 25 per cent. on plate glass.

Reciprocity will not reduce employment or lower wages, but it will enable wages to buy more food.

Englishmen coming out to Canada have been surprised to find that food in this land of plenty, is as dear, or dearer than in England.

Why is food dear here? Because of the taxes, because of the profits made by packers and other middlemen.

Reciprocity will take off these taxes and tolls, and make food as cheap as it ought to be in a new country, a land of plenty.

We are told that farmers may complain of the agreement as one-sided. Why should there be free trade in grains, vegetables, fruits, and dairy products, and protection in manufactures? Why the difference?

Because farming in Canada can take care of itself. It has reached such a point of expansion that it wants, not protection at home, but bigger markets abroad.

The farmers themselves have asked for this. They want the American market. The government gives them what they ask for.

Reciprocity in manufactures is not given because manufacturers have not asked for it. They do not believe that they are ready for free competition with the United States, and the government believes that they understand their own business.

Reciprocity in manufactures will not be given now, and will not be given at all, unless and until the manufacturers and workingmen ask for it.

Manufacturing industry will not be hurt, but helped. The removal of taxation on food. The manufacturers are allowed to import vast quantities of raw material for their industries free of duty.

Why should not their workmen be allowed to import food free of duty?

A PLAIN STATEMENT.

Why Uncle Sam Wants our Food-stuffs.

According to a United States census bulletin just issued, the population of the United States increased twenty-one per cent. in the ten years from 1900 to 1910, but the total acreage devoted to agriculture was extended during the same period only 4.2 per cent.

The number of farms rose from 5,737,372 in 1900 to 6,340,257 a net gain of 10 1/2 per cent., but in the meanwhile the average size decreased from 146 acres to 138 acres, the actual area in farms being 838,592,000 acres in 1900 and 873,729,000 in 1910.

Improved land increased more rapidly than the total farm acreage or number of farms, the advance being from 414,499,000 acres in 1900 to 477,448,000 acres in 1910, a gain of 62,944,000 acres, or 15.2 per cent. in ten years.

Yet this percentage of increase was only about two-thirds the growth of population, showing that at the best the number of acres under cultivation and used for the production of crops had not kept pace with the increase in the number of people.

\$1.65, Watertown and Return, \$1.65 Good going Saturday 5 a.m. and 2 p.m. and Sunday 7:20 a.m. and 2 p.m., returning up to Monday evening.

AN ELECTION SONG.

(Air: 'Come A' Ye Jolly Shepherds.') Come all ye who are voters And quit yourselves like men, And I will tell you something That worries dinna ken.

It is if there is anything That, Canada will save, 'Tis to rally round and vote for Great Laurier the brave.

He has stood before the people And has stood before them well, He has worked right up for liberty, That, anyone can tell.

In all the years that he has been, The premier of this land, Progress has marked its every step That none can us withstand, And if we would carry forward The work so well begun, Let us rally round and vote for Till Laurier has won.

He has just come back from England Where he made a gallant fight And stood straight up for Canada, For justice, truth and right, And if we would hold up the flag As well as he has done, We'll rally round and vote for Till Laurier has won.

And when the great fight is over And Laurier has won, We'll send forth a shout of victory From north to setting sun, Contented that we did our best To help the liberals in Our rallying round and voting for Made Laurier to win.

And all that we would ask of you If you would the country save, Is to rally round and vote for Great Laurier the brave. —W. KINLOCH.

Who Oppose the Pact.

Farmers' Sun, Toronto. The men who form the backbone of the anti-reciprocity pact are the packers with their fifty per cent. dividends, the malsters, who have been buying Canadian barley at an average of 19c below Buffalo prices, and financiers and promoters who have become millionaires by the floating of mergers, which the present system renders possible.

When inclined to censure your neighbor whistle the thought out of your head. Our admiration of the man is sometimes caused by the art and skill of the tailor.

CURED OF DRINK BY SIMPLE REMEDY.

A Devoted Wife Helps Her Husband to a Cure Through Samaria Prescription.

Mrs. S., of Trenton, was in despair. A loving father, and a careful provider when sober—her husband had gradually fallen into drinking habits, which were ruining his home, health and happiness.

Drink had inflamed his stomach and nerves and created that unnatural craving that kills conscience, love, honor and breaks all family ties.

But read her letter: "I feel it my duty to say a few words about your medicine. As you are aware, I sent and got a bottle, thinking it would try them in secret. My husband had only taken them a week when he told me he was going to Fort Arthur for the summer, as I had to tell him all about the Tablets. He said he would take them just the same, so I sent and got the second bottle for fear one would not be enough. He writes me saying that he has taken the contents of both bottles, and he feels splendid, does not care for drink. In fact, he has not taken any liquor from the first of my giving it to him. I feel I cannot say too much in favor of your wonderful remedy."

Mrs. S., Trenton, Ont. Samaria Prescription stops the craving for drink. It restores the shaking nerves, improves the appetite and general health, and makes drink distasteful and even nauseous. It is used regularly by physicians and hospitals, and is tasteless and odorless, dissolving instantly in tea, coffee or food.

Now, if you know any home on which the cure of drink has fallen, tell them of Samaria Prescription. If you have a husband, father, brother, or friend on whom the habit is getting its hold, help him yourself. Write today.

A FREE TRIAL PACKAGE of Samaria Prescription, with booklet, giving full particulars, testimonials, price, etc., will be sent absolutely free and postpaid in plain sealed package to anyone asking for it and mentioning this paper. Correspondence sacredly confidential. Write to-day.

THE SAMARIA REMEDY CO., Dept. 7, 49 Colborne street, also for sale at Jas. B. McLeod's drug store, Kingston.

GILT EDGE THING FOR THE DAIRYMEN

Good Chance To Gain And No Chance To Loose--Reciprocity And The Canadian Milk Producer.

Sunbury, Sept. 16.—(To the Editor) I wish to submit some figures and statements to prove beyond a doubt that Canadian milk producers are bound to gain by the removal of the 6 cents per pound duty which is charged against our cheese and butter entering the United States.

In the first place I must remind you that we have only one market at present (Great Britain), and the United States has free access to that market just the same as we have and when the prices of cheese and butter have been low in the United States it has injured our market, but when it was high in the United States we were shut out and the American farmer just across the border has made immense profits from his milk in comparison with Canadian farmer.

Dr. Edwards will tell you that the Americans don't need our cheese as they don't use all their own cheese, and he quotes from statistics that the United States exports about \$1,000,000 worth of cheese yearly. I have heard him make that statement twice on the platform during the campaign, but he didn't tell us that the United States imported six times as much as they sold.

Now Dr. Edwards is an expert juggler of facts and figures and he has deceived the milk producers all over this country. Dr. Edwards and other opponents of reciprocity have quoted prices of cheese to the people which would deceive any one who was not well posted in that line.

In the first place our cheese is worth from one to three cents more than the best United States cheese in any market, except their own Mountain View cheese factory, in Prince Edward county, last year, sold 1,000 cheese to a New York dealer at one-eighth of a cent more than Pictou board. This dealer had to pay 6 cents per pound duty to get these cheese to his store, where he cut them up on his counter at 25c per lb. The salesman and treasurer of this factory has always been a conservative, but he is now a strong supporter of reciprocity.

There is much difference in the quality of Canadian and United States cheese that a comparison of prices here and in this country is not fair, and right here I want to remind you not to bank too much on the present high price of cheese as its growth is too mushroom-like to be healthy. We never had anything like it before and don't be surprised if it don't last long.

Patrons of cheese factories know that the only thing that counts is the price they get per hundred for their milk. I will submit to you the net price paid to the patrons of a cheese factory in the United States and also price paid by my own factory. The two factories are not more than 25 miles apart.

WILSON'S FACTORY. 1906—1.12, 1907—1.21, 1908—1.02, 1909—1.37, 1910—1.30. To Sept. 1, 1911—99. These figures are given under oath I have secretary-treasurer's affidavit before me as I write.

In 1909 the patrons of my factory would have gotten \$6,883.34 more if they were paid the same as the United States factory paid, and in 1910 they would have received \$5,821.45 more than they did. You will be told again by opponents of reciprocity that we are getting more now than they are, but we are not. It is true there was a slump in milk products over there this year, but now they are getting more for their milk than we are.

In July my factory paid 89c and Wilson's Bay \$1.06. Now I will not go so far as to say we will get these prices under reciprocity, but I will say that it will be averaged up with our own. No man can say what the future will do but how can we get a better idea than to take the past ten years. Ten years ago the United States exported \$5,000,000 worth of cheese, now she exports less than \$1,000,000. Ten years ago the United States imported \$1,700,000 worth, now she buys over \$6,000,000 worth. They have sold less every year since ten years ago and bought more every year since ten years ago. What better proof does any one want than this that there is a good market there for a good portion of our milk products with six cents per hundred removed from us, and kept on against the rest of the world?

Another argument used by Dr. Edwards to delude his constituents is that we would lose our British market; such a thing is nonsense. The great bulk of our cheese will still go to Britain, but as the United States buys now about one-third as much as we sell to Britain a good quantity is sure to go to the United States. Dr. Edwards offers to the dairymen of Canada, we stand every chance to gain and no chance to lose.

good quantity is sure to go to the United States. Dr. Edwards offers to the dairymen of Canada, we stand every chance to gain and no chance to lose. Again it has been said that cheap United States cheese would be shipped into Canada and then to England and destroy our reputation. Any one in the cheese trade knows that this is not possible as the long cool spring and fall is one of Canada's best assets in cheese making. If our cheese were all like our hot weather cheese our reputation would not be what it is.

To my mind this is the best thing that has ever been offered to the dairymen of Canada, we stand every chance to gain and take no chance to lose. Again it has been said that cheap United States cheese would be shipped into Canada and then to England and destroy our reputation. Any one in the cheese trade knows that this is not possible as the long cool spring and fall is one of Canada's best assets in cheese making. If our cheese were all like our hot weather cheese our reputation would not be what it is.

Thanking you, Mr. Editor, for your valuable space.—JOSEPH McFARLANE. I would invite all conservatives who have been turned against reciprocity during the campaign to read this letter carefully. This letter would have been written earlier had I had figures and affidavit.

WHAT ABOUT BISCUITS.

And How Mr. Paterson is Not Concerned.

Some of the conservative newspapers are making a great point about biscuits as affected by the reciprocity agreement.

It so happens that before he entered the cabinet Hon. William Paterson, one of the men who negotiated the agreement, was in the biscuit business, and the charge is made against him that he looked after his own interests. It matters not that Mr. Paterson had been out of the business personally for more than fourteen years; he is good enough to serve as a target for the Tories.

And what is their attack? That, when the agreement is ratified—and it is noticeable that very few of the anti-reciprocity people say "if" the agreement is ratified, they thereby admit that Laurier and reciprocity will win—eggs will be cheaper, lard will be cheaper and salt will be cheaper, and that, therefore, biscuits will be cheaper.

And while biscuits are not the staff of life, the materials of which they are made do form a very material part of the said staff of life, and biscuits are to be cheaper bread must also be cheaper and the consumer must benefit.

Again, who makes the most biscuits in Canada? Not the employees in the biscuit factories, but the housewives over their own cook stoves, getting them ready for the boys and girls when they come back from school, and as an aid to the appetite of "Daddy" when he gets home at night after a hard day's work in mill or factory or in the field.

Cheaper biscuits will mean cheaper bread, and if the tory organs are right reciprocity will mean both cheaper biscuits and cheaper bread.

Making Sewage Pay.

Oswego, N.Y., Palladium. The sewage of Berlin, Germany, amounts to 200,000 cubic meters daily and that city has turned it to advantage and profit. A sewage waste has been converted into a most beautiful and profitable agricultural area. Intensive farming has been carried on upon a small scale on this tract and small fortunes have already been made by tenants who have taken up sections of this well irrigated land. Twelve thousand cows secure pasture and provide the city's milk supply. There is a lake in which carp, noted for their fine flavor are raised.

The sewage is subjected to a treatment which renders it odorless and innocuous. The meats, fruits and vegetables raised on the land are sufficient to supply the needs of all the city's hospitals and similar public institutions and thus what elsewhere is considered commonly offensive has been turned into a profit by Berlin.

Their Real Principles.

Winnipeg Free Press. Noting the variegated character of the opposition campaign—pro-navy in Ontario, anti-navy in Quebec, ultra-protectionist in the east, low tariff in the west—one is reminded of John Randolph's celebrated remark about his opponents: "Principles—the honorable gentlemen have seven principles—five leaves and two fishes."

Fears Fugitive Passed Boundary.

Snowflake, Man., Sept. 16.—Work on farms and in the neighboring towns has been suspended while the men continue the search for Henry Bill Wilson of Hanna, N.B., who is alleged to have kept Miss Eleanor Gladys Price, a school teacher, prisoner for thirty hours in the forest. Wilson, it is feared, has escaped over the international boundary line.

Cape Vincent Sunday Connections. America 7:30 a.m. and 2 p.m., returning leaves Cape Vincent 11 a.m. and 6:45 p.m., 20c. return. Extra strong English boots, for boys and girls, from \$1.25. Dutton's, 209 Princess street.

If you have ever felt that you would like to make money, If you have ever felt the need of money, If you have thought that if you could only find an investment in which you could make money without any risk,

If when you have seen your friend or acquaintance ride by in his auto and have envied him not having one yourself,

If at times when you have met old friends who had no better start in life than yourself, but who are now much better off than you are, you have wished that you were doing as well,

If you have money in the bank that is only bringing you 3 per cent., and you consider an investment that you will, without a doubt, make three times the amount you invest within twelve months, and an investment in which the worst that can happen to you is that you will get a guarantee against loss and 6 per cent. interest (twice what your bank gives),

If you have a little money lying idle, not enough, we'll say, to buy central city property, yet you would like to buy improved property that would show you a quick profit on your money,

THEN, FRIEND, READ THE FOLLOWING CAREFULLY; YOU WILL FIND IT WELL WORTH YOUR WHILE. THE PROPOSITION IS NEW, BUT SO WAS A FLYING MACHINE A SHORT TIME AGO. THE OFFER WE ARE MAKING IS UNUSUAL, BUT SO WAS THE USE OF WIRELESS MESSAGES NOT SO LONG AGO. BUT, FRIEND, YOU KNOW RIGHT WELL THAT IT IS USUALLY THE UNUSUAL, THE UNHEARD OF, THE UNBELIEVABLE THAT THE MOST MONEY IS MADE OUT OF IN THESE DAYS.

If you have ever given a thought to real estate, if you have ever bought a single piece of property, if you know anything about real estate at all, you know what an exceptional offer the one I am now making you is, and if you have never invested, then here is the chance of a lifetime. I have without doubt the finest money-making, the best laid out and the most beautifully situated piece of property in Western Canada; it is

RICHMOND PARK, MOOSE JAW. Richmond Park fronts on Main Street, which is to Moose Jaw what Portage Avenue is to Winnipeg, and lies in the direct line of growth; and property on this street will increase in value to the same extent in proportion as the property has that borders on Portage Avenue. The property is 2 1/2 miles from the C.P.R. Depot, 2 1/4 miles from the centre of the city, 2 miles from the site of the C.N.R. Depot, and a mile and a half from the site of the G.T.P. Depot. Every street is graded, and sidewalks are to be laid down at once. Richmond Park is on a hill overlooking the city, and will be the finest residential district in Moose Jaw. The proposed street car extension will run by the property next year.

WHAT IS HAPPENING IN MOOSE JAW? Six new railroads are coming into Moose Jaw; two of them will be in within the next thirty days. The population has been increasing at the rate of 42 per cent. per year; the census for 1906 showed a population of only 6,000. The estimated population for 1911 is over 20,000. The new post office being built by the Dominion Government is the largest in the West, outside of Winnipeg, costing \$300,000. The building permits for June were nearly \$700,000—Moose Jaw being sixth on the list in all Canada. Moose Jaw is the principal divisional point for the C.P.R., and is the only town west of Winnipeg having direct connections with Minneapolis and St. Paul.

PRICES AND SIZES OF LOTS. The prices are \$90 and \$100 for lots 25 x 125; \$200, \$225 and \$250 for lots of 50 feet by 125. Each lot runs to a lane, is perfectly high and dry and fit for building. Payments are one-tenth cash and one-tenth each month. Fifteen per cent. discount for cash; 10 per cent. discount on any amount you pay over and above your first instalment.

SPECIAL AND EXTRAORDINARY TERMS. Torrens title, no interest, taxes paid to 1913, no payments to make if ever you are sick or out of work, even though this may be for six months; then when you have been working 30 days, start your usual payments again by making one payment. Think what this means when the winter comes on! Your money refunded plus 6 per cent., if you so wish. This guarantees you against any possible loss. A clear title at once given to your widow or next of kin should you die before you have completed your payments, even though you have only made one payment on your purchase. Now, sum these facts up. You cannot lose, you are risking nothing, and yet you will without any doubt make a huge profit, for this is one of the choicest pieces of property in the whole city. These lots will sell for from \$750 to \$1,000 within a very few months. Three lots given free to the first person erecting a \$2,000 house, and two lots to the second builder.

It may be that you, perhaps, will doubt some of the facts I have stated. Our offer is so good, so unusual, so seemingly impossible that I want to impress upon you, and stand ready to prove to your entire satisfaction by the most authentic information, the truth of all my statements. If you have any doubts, or if you imagine that conditions are not as I have set forth, or if you think you can pick a flaw in the proposition I am offering, won't you let me know what these doubts are; just what objections you have, just what points you don't believe, just what statements you imagine are not exactly true, just what points you want further information on? I cannot read your mind, but I can read your letters, and if you will tell us what you have in your mind that makes you hesitate about taking hold of such an extraordinary money-making opportunity as this, I know beyond a doubt I can satisfy you on every point, and remove every obstacle in a few moments, for I am absolutely sure that every dollar you invest will return you four or five within a very short while.

Fill out the literature coupon and sent to us at once. Prompt action is advisable, as the lots are being purchased very quickly. Do it now.

LITERATURE COUPON Please send me maps, plans, literature and fullest information about Richmond Park, Moose Jaw. Names _____ address _____ E.W.
