

SUMMONED TO COURT

FOR STRIKING FARMER FOR DRIVING OVER CHILDREN.

William Baker of Gananoque, the Defendant—The Case is the Outcome of the Tory Celebration Last Month.

Gananoque, Oct. 17.—A summons has been served on William Baker by Sheriff McAmmon, to appear in court at Brockville to answer to a charge of assault against Lawrence Boyle, a young farmer of Leeds township. The summons is the outcome of the celebration of victory by the conservatives after the elections on September 22nd, when Boyle, in an intoxicated condition, with a horse frantic with fear, drove through a gathering of children, knocking several of them down, near the bonfire. Someone struck Boyle with a stick and he was struck from his buggy and rather roughly handled. The case is slated for Friday.

The coal schooner, Horace Tisher, arrived from Oswego yesterday, with a cargo for Taylor & Green.

The steamboat, Navajo, is unloading a cargo of steel at the D. J. Jones' Co. new wharf.

The coal schooner, Winnie Wing, is transferring part of her cargo into the steamer, Briton, as she was too heavily laden to get up Gananoque river to the electric light company's works.

Allan Geroy, while fishing in the North Channel, yesterday, hooked a fine muskonge, which he landed safely. The fish tipped the scales at thirty pounds.

Lates reports from Rev. J. T. Pitcher, patient at Dr. Meyers' sanitorium, Toronto, give no hope whatever. The patient has lain in a stupor for several days past and the end is looked for at any moment.

Word received here yesterday from Dr. J. C. Connell, of Kingston, gives strong hopes that they will be able to save the life of William Allan, undergoing treatment in Kingston General Hospital.

Clarke Allen has been elected recording-secretary of Gananoque lodge, No.

Every Woman

is interested and should know about MARVEL Whirling Spray

The new Vacuum Sprays, Best

Most Convenient. It cleans

and disinfects immediately.

It gives full satisfaction to ladies.

Applied promptly to every cut, burn, bursa, scald, scratch, boil or sore spot of any kind. "Mecca" Ointment kills the poison, restores a healthy condition and quickly heals, 25¢ at any drug store.

Robert Griffith, alias Clark, porter in the Bank of British North America, London, Ont., skipped the country on Monday, when he found his first wife, who was after him, leaving his second mate to her fate.

QUEEN'S ARTS RUSH.

The Freshmen Decorated and

Paraded Through the Streets.

The Arts rush took place at Queen's on Tuesday at noon. The freshmen got out on the common at about 10:30 a.m. and waited for their opponents, who soon arrived, and the work of decorating the victims commenced. After tying their feet and hands the victors proceeded to decorate the freshmen's faces with the Queen's colors. Then they proceeded down through the large wagons with their victims on three large wagons.

The procession moved along Division street and down Princess street just as all the people were coming from work. A number of young city chaps happened to be among the ones decorated. There are more Kingston boys in the first year arts course than in any other faculty. The local boys were very noticeable in the rush. They were taken down the street at this particular hour to be exhibited to their friends.

FIG PILLS

contain the active principle of FIGS combined with other valuable medicaments which constitute them the best remedy for the above ailments.

At all dealers, 25 cents per box, or The Fig Pill Co., St. Thomas, Ont.

J. B. MCLEOD, Druggist.

NOTE.—Our Hats are sold by Mrs. Walker, Yarker; S. Jackson, Wagerville; Thos. Lee, Lavant.

Mr. and Mrs. Francis Amo, who have spent the summer on Howe Island, have returned to town. Mr. Amo having taken a situation here for the winter. F. H. Hurd, Kingston, spending the past few days with his parents, Mr. and Mrs. E. H. Hurd, has returned home.

CANADA'S FIELD CROPS.

A Comparison of Those of Last Year With This.

Ottawa, Oct. 13.—A bulletin of the census and statistics office just issued deals with the field crops of the present year compared with the figures of the year 1900.

The census of field crops enumerated in the month of June have been compiled for all the provinces excepting Quebec and British Columbia and the statistics of principal crops are given in this report together with estimates of production computed from the reports of a large staff of correspondents at the end of September.

The area figures for Saskatchewan are lacking for two districts and those of Nova Scotia for one district, and the totals of the dominion will be ready for the November 1st issue.

For 1900, 1910 and 1911 the comparative quality of crops at the end of September was fairly uniform for wheat, oats, barley and rye; but peas, beans, buckwheat, mixed grains and flax were lower this year by eight to twelve per cent. Fodder crops, including roots and corn, are unchanged for the three years. The condition of potatoes, which is 76.78, is the same as last year, but 43.69 less than two years ago.

The comparative condition of fodder and root crops for the dominion at the end of September from 1900 to 1911 is as follows:

wheat, 79.55 per cent, and of potatos, 76.78 per cent, and is generally lower in Ontario than elsewhere.

The maritime provinces and the Northwest provinces give 90 per cent. and over to potatoes and nearly as good for other field crops.

The census enumeration of field crops taken in June shows for the northwest provinces together with Ontario and the maritime provinces an area of 9,990,021 acres of wheat, 7,661,862 acres oats, 1,291,287 acres barley, 133,053 acres rye, and 1,609,615 acres flax, to which will be added the areas for two districts in Saskatchewan. For the harvest year of 1900 the corresponding figures of the census are 4,068,828 acres wheat, 3,981,370 acres oats, 765,273 acres barley, 156,352 acres rye, and 21,202 acres flax.

The increase in the production of the principal grains in the decade, computed for the present year, on the estimates of correspondents, is shown to be in round numbers, 148,035,000 bushels wheat, 187,049,000 bushels oats, 21,711,000 bushels barley, 664,000 bushels rye, and 12,360,000 bushels flax. These figures are exclusive of returns for two districts in Saskatchewan.

STANLEY MERRIL, Delaware, Ont., writes: "For years I was troubled with my hands cracking, often becoming so sore that I could hardly do any work. I got some of Dr. Chase's Ointment and happily find that one or two applications of same to the affected parts make them well. I have had no trouble since using the ointment for sore hands."

Dr. Charles Gilbert, Haystack, Placentia Bay, Nfld., writes: "I was a sufferer from Salt Rheum, for ten years, and had about despaired of ever being cured, so many treatments had failed. Reading of the wonderful cures effected by Dr. Chase's Ointment to the diseased parts relief is obtained almost immediately, and gradually the sores heal up and disappear. Here are two letters which will interest you:
