

"I Suffered Years With My Back."

Backache resulting from weak kidneys, a bad cold or other cause, usually renders the sufferer unfit for work and often results in permanent disability.

"I suffered for years with my back or kidney trouble, and have tried a number of remedies from different physicians. More than a year ago, one of our local druggists induced me to try

Dr. Miles' Anti-Pain Pills
and after using them some three months I found a decided improvement in my kidneys, and I am glad to say that I hope soon to be fully restored to health." —J. P. ALLEN, Ex-Judge City Court, Glasgow, Ky.

As long as pain is present in any part of the body rest is impossible and the system becoming weakened is exposed to any form of disease to which the sufferer may be inclined.

Dr. Miles' Anti-Pain Pills
by steady the irritated nerve centers, make refreshing sleep possible, thereby enabling the body to recover lost strength. As a remedy for pain of any description Dr. Miles' Anti-Pain Pills are unsurpassed.

Sold by all druggists under a guarantee assuring the return of the price of the first box if no benefit results.
MILES MEDICAL CO., Toronto, Can.

Tips For the Farmer

BY UNCLE JOSH.

Scientists of prominence are searching the grain belts of the Pacific slope, and intermountain country, to secure a proper crop for "Queen Bluestem," the royal wheat of the inland empire, and the northwest. The success of the quest will mean millions of dollars annually to farmers in the western country. The grain is higher in protein than other wheats; it makes more flour because of increased gluten values; consequently it sells at from two to four cents more than the next best varieties.

Turkey Red wheat has been combined with the Bluestem at the experimental station farm, in connection with the Washington State college, at Pullman, and produced this year fifty bushels to the acre. The milling qualities are high, the only drawback being that the wheat is dark.

Notes on Dairying.

Drought and foot-and-mouth disease combined have caused a milk famine in Paris. The city's daily requirement is 1,100,000 litres of milk and the supply recently dropped, according to the Westminster Gazette, to 900,000. The shortage is permanent and the city is now reaching out a distance of over two hundred miles for its milk supply.

The management of the calf during its first year had a great deal to do with its later usefulness. By avoiding sudden changes of diet, and providing clean, dry quarters, and having plenty of water before it at all times healthy growth is encouraged. By a judicious feeding of grain and roughage heifers may be raised which will turn out to be good dairy cows.

A writer in Hoard's Dairyman says the largest cheese ever made was completed at Appleton, Wis., a short time ago. The weight given for this cheese is 12,361 lbs.

If that was the weight, the Ayrshire cheese was a long way short of being the largest ever made. J. A. Ruddick made at Perth for the Chicago World's Fair a cheese weighing 22,000 lbs.

In connection with the dairy show recently held in London, Eng., the Westminster Gazette gives this modern answer to the question of: "Where are you going, my pretty maid?"

"I am going, sir, to sterilize my hands, after which I shall superintend the operations of a patent mechanical milker, the product of which I shall put into a sterilized receiver, which will be cooled down by a sterilizer . . . and so on."

Live Stock Notes.

The Oklahoma Station has found two teaspoons of turpentine for each 100-pound pig, mixed with the feed, and fed twice daily for two days, a very satisfactory treatment for worms in pigs. The pigs ought to be divided into bunches of eight or ten, and the feed and turpentine well mixed, so that each pig will get about the same amount of it. A physic of some sort ought to be given in connection with this treatment.

The recent drop in hog prices, coupled with the shortage in feed, has sent the price of weaners to the vanishing point. In some cases these are being offered at 75c., and the experience of a few years ago, when a lot of the little fellows were killed to save feed, is not unlikely to be repeated before winter. There will also be a heavy decline in breeding. As a consequence of all this, coupled with the shortage in cattle in all North America, prices of hogs are likely to rule high again next summer—that is unless general industrial conditions are disturbed in the interval.

Angus cattle, which on more than one occasion have won first place at Chicago International, are beginning to come into favor in Argentina as well. Argentine buyers have paid from \$1,250 to \$3,000 for Angus cattle in Britain, and representatives of this breed at the big Argentine show have won the grand championship of the show and the group championship. Further, at the sale of steers at the show, the Angus herd has scored well. The champion steer sold at \$850, while the other two steers which went to make up the champion group at \$1,465 and other lots of Aberdeen-Angus steers at \$425 and \$350.

Have the Seed Corn Dry. It is very essential, says Farm Stock and Home, that seed corn be picked early and put in the drying room, so that it can have ample time to thoroughly dry out before cold weather. If corn is thoroughly dry, its germinating quality will not be destroyed by freezing, but the difficulty is to be sure that the corn is dry, and if a place can be provided, in which to store the corn where it will not freeze, one is much safer to store the corn there. It is always well to have more seed corn than is needed, so that a more careful selection may be made in the spring after the ears have been tested. There is usually a good market for any surplus seed corn.

The main requirement in curing seed corn is to get it dry. When husked, each ear of corn contains considerable moisture, and until thoroughly dry it is liable to serious injury from several causes. If stored in a large pile or in a sack it is liable to heat. If stored in a close room, where there is poor circulation of air, it is liable to mold. If stored where it is subjected to the ordinary changes in temperature, common during the fall, it will freeze or become chilled. All of these unfavorable conditions must be guarded against if one would have good seed. Drying and keeping dry are the first essentials of successful seed corn curing and storing.

Finishing the Plowing.

This will be a considerable part of the work on the farm in this month, and it is of a kind that claims and

FEATHERS IN LAYERS THE FAD NOW.

Varied and wonderful are the ways of using ostrich plumes which milliners have discovered. Hand-me feathers are split up into thin fronds for one thing, and made to look like long, feathery quills. A number of these split ostrich feathers have been used on this new hat which is the rounded back and indented rim now in favor. The feathers shade from a very pale gray to a deep stone shade at the back of the hat.

The crown is completely covered with layers of the plumage, but the brim is faced with very dark stone gray velvet.

should have the best of attention, as this is the foundation upon which the work of cropping is to be based. Be sure to first remove as far as practical all obstruction to good work, as this will be of the greatest advantage. As has before been spoken of, get the best plow for the work to be done.

All farms are not alike in kinds of soil and the plow that would be best on one farm, might not do as well on another, but it is safe to say that a plow or plows best adapted to each farm and soil.

Take time to do the work in the best manner. Where there is coarse manure on hand it might be better to plow under, as this will help to fertilize humus for the soil.

There may be an advantage in plowing heavy soils late, so as to leave in the best condition for the action of the frosts of winter. It should be the aim to do all of the work possible in the fall, as this will be of much advantage another spring.

Pigs and Poultry. Keep the young pigs growing thrifly this month and the older ones both growing and fattening for the market, by good feed and care.

Feed plenty of milk and meal to the fattening ones and make all comfortable by keeping dry and well bedded. Get the ones for winter quarters in good condition, where there will be sufficient room, warmth and light. In this way, pig-raising and feeding can be profitably pursued all through the winter. Look out for plenty of bedding as the pigs will make a good use of this for their own comfort and in the making of a large amount of valuable fertilizer. Fit the work for the market at an early age and put others in their places.

The poultry that is to be disposed of should be put in good condition as fast as possible. Be sure and keep enough of the best for the flock. As the early pullets should be laying soon, feed and care for them so as to stimulate a satisfactory egg-production, including plenty of meat or skim milk.

Clean out the hen house and get it suitable condition for cold weather. To be the most satisfactory for this purpose there should be warmth, dryness, light, air and cleanliness, and where these conditions prevail, with good feed and care poultry keeping should be made profitable in winter when demand and prices are satisfactory.

Produce and Prices. KINGSTON, Nov. 4.—The market clerk reports prices prevailing as follows:

Carrots, 10c. and 15c.; turnips, 10c. peck; potatoes, 90c. bush.; beans,

There's lots of money in gold mines. How much did you put in?

Many a sensible man seems dull because he looks foolishness.

10c. peck; onions, 25c. bush.; celery, 7c. head; tomatoes, 25c. to 50c. bush.; onions, 5c. bush.; radishes, 5c. bunch; lettuce, 5c. bunch; apples, 25c. peck; J. A. McFarlane, Brock street, reports grain, 5d. per bushel and feed, selling as follows:

Oats, 15c.; local wheat, \$1.65; buckwheat, 75c.; seed rye, 81c.; peas, \$1.19

15c.; yellow feed corn, 80c.; barley, 80c.; \$2.75 to \$2.90; farmers' \$2.75 to

\$2.90; Hungarian patent, \$2.90; oatmeal and rolled oats, \$3.50 per bushel; cornmeal, \$1.80 to \$2; bran, \$2.50 ton; shorts, \$1 to \$2.50; dried straw, 5c. loose; 88c. hay, loose, \$9 to \$11; pressed hay, \$13 ton.

Meat—Beef (local), carcass, 74c. to 81c.; prime western beef, \$10 per cwt.; by carcass, cuts, 10c. to 15c.; live hogs, 5c. lb.; dressed hogs, 9c. lb.; pork, 8c. to 10c.; by quarter: mutton, 12c. to 13c.; spring lamb, 14c. to 16c. per lb.; veal, 5c. to 10c. per lb.; ducks, \$1 to \$1.25; pair; turkeys, 18c. to 20c. lb.; fowl, 90c. to \$1; a pair; spring chickens, 75c. to 90c. pair; butter, creamery, 30c. to 32c. lb.; rolls, 24c. to 25c. lb.; eggs, 30c. to 35c.

Dominion Fish company reports prices as follows:

Whitefish, 15c. lb.; pike, 10c. lb.;

herring, 10c. lb.; herring, 10c. lb.; herring, Yarmouth blotters, 40c. doz.; Atlantic salmon, 30c. lb.; salt codfish, 5c. lb.; halibut, 20c. lb.; fresh haddock, 6c. lb.; bullheads, 12c. lb.; mackerel, 5c. lb.; sea bass, 12c. lb.

George Miller & Co. quote the following prices for raw fish:

Red fox, as to size, \$4 to \$6.50;

skunk, as to size and length of stripe, 50c. to \$1.50; racoon, large, \$2.50; medium, \$1.50; small, 50c.; mink, as to color and size, \$2 to \$6; muskrat, 25c. to 40c.; weasels, 20c. to 60c.

John McKay, Brock street, reports as follows:

Hides, trimmed, 10c. lb.; horsehides, 8c. to 32c.; calf-kins, veals, 14c. lb.; deacons, 8c.; sheepskins, 60c. tallow; in cakes, 6c. lb.; beaver, 25c. lb.; ginseng, 85c. lb.; wool, washed, 20c. lb.; unwashed, 13c. lb.; Raw furs: Red fox, No. 1, large, \$8; No. 1, medium, \$4; raccoon, No. 1, large, \$2 to \$4; No. 1, medium, \$1 to \$2; No. 1, large, \$6 to \$7; No. 1, medium, \$3 to \$4.

Cable report of October London fur sales: Wolf, 30c. per cent. advanced on last June; muskrat, 20 per cent. advanced on last June; ermine, 15 per cent. advanced on last June; bear, black, 10 per cent. advanced on last June; skunk, black and short stripe, 10 per cent. advanced on last June.

The poultry that is to be disposed of should be put in good condition as fast as possible. Be sure and keep enough of the best for the flock. As the early pullets should be laying soon, feed and care for them so as to stimulate a satisfactory egg-production, including plenty of meat or skim milk.

Clean out the hen house and get it suitable condition for cold weather. To be the most satisfactory for this purpose there should be warmth, dryness, light, air and cleanliness, and where these conditions prevail, with good feed and care poultry keeping should be made profitable in winter when demand and prices are satisfactory.

But some bread is more wholesome than others, depending upon the skill of the baker and the grade of flour used.

So if that boy or girl of yours is worth raising, make your bread of PURITY FLOUR.

The bread will be greater in food value, more nutritious, because it will be made of flour consisting entirely of the high-grade portions of the No. 1 Western hard wheat berries. It will contain the high-grade food elements, the high-grade gluten, phosphates and starch of the world's most vigorous wheat.

See that your children have lots of PURITY FLOUR-BREAD. It's a well-known fact among physicians that a vast number of children don't eat enough bread. A child should be encouraged to eat an abundance of bread, so as to supply fuel for energy and building material for growing bones, flesh and muscle.

Reminder: On account of the extra strength and extra quality of PURITY FLOUR more water must be added

than ordinary flour requires for making bread. For best pastry-results more shortening is needed.

Add PURITY FLOUR to your grocery list right now.
