

THE VERY LATEST

NOVELTIES SHOWN FOR THE MOTORIST.

Latest Products of the Designer for the Comfort and Adornment of the Automobile User.

One of the newest automobile coats for women is of soft moleskin, with collar and cuffs of fox, and the lining is of broadcloth satin. It is full length and the collar may be turned up over the ears in cold weather.

One of the very fashionable hats is a purple velvet pointed crown and Dutch brim, trimmed with white worsted flowers. It is worn with a white silk mesh veil.

One of the warmest things this year in fur coats is lined with lamb's wool lining. It is full sixty inches long and comes in muskrat, raccoon and other popular furs.

Leather toilet cases made of grained automobile leather are the newest fad. They are in a number of shapes, some flat, some square and others like little dress suit cases. They are all fitted elaborately, an especially attractive one being fitted in ebony that may be silver lined if desired.

There is one handy case for a man's pocket that has a folding brush, comb, and tooth brush. They fold so flatly that they do not bulge the pocket.

A new idea in a dress suit case is one made of automobile leather, which has a tray like a small trunk. When it is lifted out there are three sides fitted with the toilette outfit, with room for night clothes and slippers besides, and there is an envelope flap on the inside of the cover for skirts and waists.

There is a very handy little flask that fits into the drinking cup that comes in a pigskin case. It is not large enough for a long trip, but is good for a short run.

An innovation in the way of knitted hoods is one having long scarf ends that may be wrapped around the neck for extra warmth.

The heavy wale overcoats for men come with a lamb's wool lining that snaps into place with catches, and may be removed when the day is too warm and it becomes burdensome, leaving just the satin lining.

The white or silver grey Angora scarfs with colored borders seem to be very popular and are long enough to wrap twice around the neck. Miniature toilette cases of "Victoria" as they are called, are new and very dainty. They are about the size of the ordinary jewel box and are lined with delicate colored silks. The fittings are of silver or gold. All the articles are of small size and are very attractive.

One of the seal coats for automobile use has a very effective hood. It is pointed high above the head and when fastened at the neck the rim of fox fur about the face is very becoming.

One of the new, soft and hat sets for fall use is made of tapestry edged with seal skin. The hat has a soft rolling brim of the fur caught back with a green velvet wing and brilliant green cabochon. The muff is rather smaller than for street use, is finished with the gold gibbon ornaments and is lined with green, as is the scarf, which is gathered in at the ends with gold tassels.

Among the reversible coats is one that is especially dainty in white, with a heliotrope reverse. Silk loops with big silk crochet buttons in contrasting colors, the white on the heliotrope and the heliotrope on the white, finish this pretty garment.

Many women keep in the car for the first cool days a pair of the black velvet boots lined with quilted silk and edged with fur that slip right on

over the other shoes. They are very comfortable.

MR. CANALI NOT CHOSEN.

Appointment of Apostolic Delegate to Washington Deferred.

Rome, Nov. 17.—Mgr. Canali, under secretary of state at the vatican, will not be appointed apostolic delegate at Washington to succeed Mgr. Falconio, as has been reported. It was positively asserted at the vatican that Mgr. Canali would not be transferred from his present position, nor did the papal secretary of state, Cardinal Merry del Val, wish him to abandon the office he now holds.

It is likely that the appointment of the new apostolic delegate will be delayed until after the consistory, when Cardinal Falconio will discuss the matter with the papal secretary. Among the candidates mentioned for the office, Mgr. Agias, apostolic delegate at Manila, is most favored.

The pope has decided to create Archbishop Farley cardinal under the title of the Church of Sancta Maria Sopra Minerva, the title held by the late Cardinal McCloskey, the first American cardinal. Archbishop O'Connell will be assigned to the titular church of St. Callistus, attached to the Benedictine monastery of that name.

Notes on Sport.

Wanderers, of Montreal, will seek the services of Broadbent and Benedict, Ottawa hockey amateurs.

The Ottawa ice trotting dates are January 4th to January 10th. Hull opens January 18th and closes January 24th.

There will in all probability, be no professional hockey in Berlin this season, and every effort will be made to bring the amateur game back to the enthusiasm of the old days.

Home runs were plentiful in the American Baseball League last season. Thirty-five four-baggers were made at Detroit, thirty at Washington, and Boston, and twenty homeward-bound boys slid across at St. Louis.

True sportsmanship was shown by Princeton students, who refused to collect wages with Dartmouth men as a result of the Tigers' lucky victory over Dartmouth made possible by a goal from the field which bounded over the cross bar.

Fielding honors among pitchers of the American Baseball League went to Chief Bender, of the Philadelphia club, according to the official averages of the 1911 season, announced by President Johnson. The Philadelphia pitcher played in thirty-one games without an error.

The pennant winning Giants of the National Baseball League left yesterday for Havana to engage in a series of contests with Cuban teams. The club expects to be home by Christmas. The Giants play in Jacksonville, Miami, and Key West on their way south.

Capt. Binkley, of the Argonauts, does not anticipate any walk-over on Saturday. The Hamilton Alerts will take some beating he estimates and though the scullers should win, it looks forward to a hard argument. He believes that the O.R.F.U. champions are as strong, if not stronger, than the Tigers.

No Risk at All.

Cuts, bruises, burns, scalds, boils and such mishaps carry no risk of blood poisoning whatever, and cause very little discomfort if you promptly apply that sure cure, "Mecca" Ointment. None should be without it. Big 3 oz. jar, 25c., at all drugists.

One ounce of prevention is also worth a pound of regret.

THE DRAPED HOOD—A NEW TRIMMING FOR FUR COATS.

Splendidly warm is this superb wrap of seal skin with its huge cape of the fur over the shoulders. The cape is shaped to simulate a pointed hood lined with a contrasting fur and the white of the ermine lining contrasts effectively with the dark seal skin. Cuffs of the ermine and a big muff of the same white pelt add richness to the coat. This wrap has the broad effect across the top and the tapering lines toward the feet, now the height of fashion.

CHANGE IN ARCHIVES.

Branch May be Placed Under Secretary of State.

Ottawa, Nov. 17.—It is probable that the government will soon reorganize some of the departments. It is understood that the speech from the throne will foreshadow the introduction of bills respecting the department of external affairs and the archives department of the department of agriculture. The archives will probably be placed under the secretary of state.

A Word for the Broadbill.

The Outing Magazine. Many are the gunners who scoff at the broadbill, bluebill, blackhead or whatever the local name for the scamp duck happens to be. These hunters are doing the glossy headed, white bellied little bumbiness of the winter water an injustice. There are no gamier little fellows than the broadbill. They are nearly as sporty as the royal canvasback, as swift almost as the teal, as beautiful when coming to decoys as any duck. Heavens, how they come! Glossy black head straight to the bodies as symmetrical as winged bottles, short, crisp wings flashing like lightning, faring first one white side, then the other, to the sunlight. They ask no odds of any fowl—and need none.

FOREIGN CROP CONDITIONS.

Reports From Growing Countries Generally Favorable.

Foreign crop conditions, as tabulated by Liverpool Corn Trade News: United Kingdom—There are some complaints being expressed regarding too much rain for the sown wheat. Early sown wheat shows a good growth. The weather is still rainy.

France—The crop outlook is favorable, with a larger average sown this year. Offerings of native wheat are increasing.

Germany—The crop conditions are favorable, with the weather seasonable. Offerings of native wheat are, however, light.

Russia—There is only a small number of vessels loading grain on the Sea of Azoff. The weather is favorable, but exporters are not inclined to put through fresh business.

Roumania—The new sown wheat is in need of rain. Arrivals at the ports are small. Crop conditions in corn are improving.

Italy—The crop outlook is favorable. Supplies of native wheat are held firmly.

Spain—There is a good area seeded to wheat, with conditions favorable. Growers are agitating for an increase in the import duty.

Argentina—There are some private reports being received of an extremely growing character.

Australia—Wheat is being rather more freely offered.

India—The crop outlook is very favorable.

STRIKE AT TORREON, MEXICO.

Even the Servant Girls Have Joined the Movement.

Torreon, Mex., Nov. 17.—A general strike has been declared here, resulting in a serious situation. The bakers have joined the movement and a bread famine is threatened. Five thousand workmen are idle, including a thousand smelter employees. The smelting works have been closed and the shippers notified by the managers to suspend the shipping of material for ten days.

Except for the arc lamps the city was in darkness last night, striking linemen interfering with the operation of the electric system.

The Electrician has been compelled to close its office owing to threats that otherwise the employees would be dragged from their posts. Even the servant girls have joined the movement, and are quitting their places. The market place has been closed, and the street cars are no longer being operated.

A thousand federal soldiers are on their way here from Monterrey. So far there has been no destruction of property.

QUEBEC DRY DOCK COMPANY.

Charter Granted to a Number of Quebec Men.

Quebec, Nov. 16.—A charter of incorporation has been granted to the British North American Dry Dock and Shipbuilding Company, Limited, with a capital of \$1,000,000. All the signatories in the charter are Quebec men. They are as follows: Philippe Bazin, J. E. Burdall, Y. Chausseret, William Dorell, Nap. Drouin, J. B. Letellier, William Price, J. T. Ross and William Shaw.

It is understood that this company will immediately make application for the subsidies for the construction at Quebec of the largest dry dock in the world, and upon formal acceptance of the scheme by the government the work will begin at once. It is further reported that the dimensions of the proposed dock will be: Length, 1,150 feet; width of entrance, 110 feet. There will be forty feet of water on the sill.

DALEY WILL IS UPHOLD.

Windsor and Detroit Women, Sisters of Deceased, Disputed Validity.

Detroit, Nov. 17.—After a hearing in the probate court at Mount Clemens, Mich., which lasted for nearly three weeks, it took a jury just twenty minutes yesterday to decide that the will of William J. Daley, bequeathing his \$75,000 estate to his widow, was made without the exercise of undue influence and was, therefore, legal. Two sisters of deceased Mrs. Fanny Radcliffe, of Windsor, Ont., and Mrs. Caroline McAfee, of Detroit, contested their brother's will on the ground that there was another will in existence, and that the document offered for probate had been obtained by the use of undue influence and was, therefore, illegal. The contestants claimed they had cared for their brother when he was young and that they were entitled to a portion of his estate at his death.

LEOPOLD'S WIDOW WINS.

Keeps Money the Late King Put in Trust for Her.

Brussels, Nov. 17.—A legal decision was handed down yesterday against the Princess Louise, daughter of the late King Leopold, in her suit against the Niederfuellback Foundation, and the Belgian State and National Bank for a restitution of certain property, securities and debts which were comprised in the foundation.

It is alleged that the late king made these properties over to the foundation for the benefit of the Baroness Vaughan, his wife, and the mother of several of his children.

FATAL TO HORSES.

Sand and Salt on Tracks Lead to Blood Poisoning.

Montreal, Nov. 17.—The Montreal Vehicular and Traffic Association have arranged with the board of control for an appointment, when it will urge upon the board the necessity for a by-law which will prohibit the excessive use of sand and salt by the Montreal street railway to clear their tracks. The association points out that the sand and salt cakes into the space below the horse's fetlock and freezes, blood poison sets in, and the horse dies. From thirty to forty horses are lost every month during the winter from this cause the association claims.

The Head is at Fault.

Weekly Sun.

The depletion of the rural population and the allurements of business defer for the present all hope of a teaching profession such as Dr. Fyne and his advisers planned, and practical wisdom dictates a return to the old system by which use was had in the schools of the young men and women who secured the diploma of the model school. Fine theories must give way to practical necessity.

The trouble with the Department of education is its bureaucracy, blind to actual social and economic conditions, legislating initiative out of existence and making a system so rigid that it cannot be made to fit the varied conditions of the province. No one outside of the bureau is assumed to be able to move without direction. The school inspectors are put under inspection, and required to take lectures from time to time in Toronto. There is one defect in the perfect symmetry of the system, to wit, that there is not an inspector of the superintendent of education, Mr. Seath.

For the training of high school teachers a faculty of education has been added to the university, where the young B. A.'s attend a professional course. In addition to training in the science of teaching, the university graduate is retained and re-examined on the subjects which are taught in the high schools. The assumption, unflatteringly both to the university and graduates, is made that four years in the university have failed to awaken intellectual power to understand the high school work. Mere rote learning is the system's best achievement on its own confession. That seems grossly absurd.

Distress From Indigestion

Tried in Vain to Get a Cure—All Medicines Failed.

Old Trouble Disappeared When the Liver and Bowels Were Set Right by

DR. CHASE'S KIDNEY-LIVER PILLS

You cannot make a greater mistake than to think that indigestion is confined to the stomach. It is a disease of the liver and bowels, and it is only by getting these organs healthy and active that you can ever hope to cure chronic indigestion.

Here are two cases reported by Mr. Skinner, which tell of continued failure to cure indigestion by dosing the stomach. Both were cured thoroughly by using Dr. Chase's Kidney-Liver Pills.

A. C. Skinner, Atlantic street, Harwoodhill, Sydney, C.B., writes: "My wife was troubled with indigestion, and tried all sorts of medicines in vain. Hearing about Dr. Chase's Kidney-Liver Pills, I got her to try them, and to our great delight she was cured. We should not think of being without them in the house for use when the liver and bowels became sluggish."

"I told a friend about them and gave me a box. He had suffered from indigestion for years and tried most everything he could get. Dr. Chase's Kidney-Liver Pills were also successful in his case, and he says they beat any medicine he ever came across."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c. a box, at all druggists, or Edmanston, Bates & Co., Limited, Toronto.

ARE YOU

IN THE THICK OF THINGS OR THE THIN OF THINGS?

It takes the steady nerve, the elastic step, the energetic body to meet modern conditions, and the quick mind grasps the fact that body and nerves must be properly nourished.

Weak, hesitating, doubting natures are those who lack vitality. Their kingdom is the crust or outer edge—the thin of things.

SCOTT'S EMULSION

is the vitalizer for all ages. It feeds nerves, body and brain with pure, wholesome food-tonsic. It does not stimulate—it nourishes.
