An Instantaneous Wrinkle Remover.

From Eastern Styles. The average woman is always surprised to learn, after experimenting with all sorts of patent so-called "wrinkle removers," that the most effective remedy in the world is a simple face wash which she can make herself at home in a jiffy.

Organist and choir leader, Mr. C. Wilder. Students and all will receive a hearty welcome to the church.

BILL WAS SETTLED

AFTER \$634 HAD BEEN DEDUCTED FROM IT. Donnelly Wrecking Co. Will be Paid \$1,014.65 for Extras—City Would Have Fought Bill if Evidence Had Been at Hand.

The conference which the sub-committee, appointed by the water works committee, to interview the Donnelly Wrecking and Salvage company, regarding the settlement of the bill for the work on the intake pipe laid last spring, will result in a saving to the city of over \$600; in other words the bill for extras which John Donnelly submitted and requested payment for has been lowered from the sum of \$2,249.40 to \$1,014.65, and upon motion of Ald. Harrison the report of the sub-committee recommending the adoption of the memorandum of settlement submitted to the Donnelly Wrecking and Salvage company and agreed to by them, was adopted.

Such was the gist of the business done by the water works committee at its meeting Friday afternoon. The story and the incidents leading up to them reads like a romance.

Since the last meeting at which the chairman, Ald. John Carson, the superintendent, and one of the members of the committee was appointed as a sub-committee to interview Mr. Donnelly and try and effect a settlement. Three meetings were necessary in order to get matters straightened out satisfactorily. At the last meeting those present were City Solicitor, Melville, Superintendent Hewitt, John Donnelly, his foreman, and his lawyer, J. L. Whiting. The bill was finally cut down to the amount indicated after a great deal of argument.

The evidence of the city employees who were on the scene of the work on the intake pipe when the length of pipe was lowered which was found to have been laid imperfectly, and from which the leak sprung, was taken at the meeting of the opposing forces, but it was very vague and inconclusive. The evidence of the city employees had been certain enough the city would have fought the account. As it was the committee thought it better to close the account the way it had been rendered than to contest it.

Those present at the meeting were: Ald. Carson (chairman), Alds. Shaw, Litton, Harrison and Hanley.

ADVISE COUNCIL TO UNITE.

(Continued from Page 1.) A report of the kind desired. He suggested City Auditor Muir, who was conversant with the city's financial doings, as he was in touch with all the departments day by day.

Ald. Fair held that a civic servant should not be asked to make a report. An independent man should be engaged.

Ald. Harrison also suggested an independent probing. Ald. Hoag recalled the fact that in 1904 a special committee appointed by the city council had sent City Treasurer Ireland and Ex-City Clerk Shannon to various Canadian cities, and that these two officials had inaugurated the best system that could be found at that time.

It was finally decided to appoint a sub-committee consisting of the mayor and Alds. Fair and Shaw to investigate the system of book-keeping in the city treasury department, and bring back suggestions to the committee. It was clearly stated that the work of no official was being criticized, but that the aim of the enquiry was to find out if a more economical method of book-keeping could be employed.

The committee then dealt with the question of department amalgamation. Ald. Carson said that he and Ald. Shaw had been talking over the matter and that the latter had suggested that if the council decided to amalgamate the water and light departments it could not do better than to appoint C. C. Folger as superintendent of both. He agreed that Mr. Folger was quite capable of handling both.

Ald. Shaw then moved that the two departments be amalgamated under one committee and one superintendent. This was agreed to by all the members, and the city council will be requested to carry the recommendation into effect.

IN MARINE CIRCLES

ANOTHER ATTEMPT TO RAISE BARGE DAVY.

Messrs. Hinckley and Sampson Agree to Raise Wreck—Before Close Navigation—Number of Boats Have Been Laid up—Marine Notes Around Harbor.

A despatch from Oswego has the following: "Capt. A. R. Hinckley, of this city, has just taken a difficult wrecking contract in the St. Lawrence river. He, in partnership with Capt. Sampson, has agreed to raise the sunken barge Davy, which lies in the narrow near Central Park. This barge was loaded with wheat when she went down last spring, but the hatches came off and most of the cargo has spilled out. The stern of the wreck lies on a ledge of rock but the bow is in sixty-five feet of water. Messrs. Hinckley and Sampson agree to raise the wreck before the close of navigation and if they are successful will receive \$7,000 for their work."

The awful weather, is still the subject of conversation among the marine men. Yesterday's storm made it very hard for the vessels, as it is very hard to navigate in a snow storm. It has been just one thing after another, with the mariners. The wind storm played havoc for a couple of weeks, and now snow storms threaten to bring about a further delay. A large amount of grain is still at Fort William, ready to be brought down to Kingston and Montreal, but the weather has been so bad that a great deal of time has been lost.

A few of the boats have been laid up for the season, but it will not be very long now before all the small boats will be laid up. A few of the mariners have returned home for the season, but the majority are still out, and will stay on the job until the end of the season. This is the time of the sailing on the lake, as it is very weather is very uncertain, and as a result very delays are experienced.

Reports received here from Fort William state that all the elevators here are jammed with wheat, and the elevator owners now have the problem before them of what to do with the wheat. In previous years it is stated that wheat has been going out of Fort William at the rate of a million bushels per day. For the last week or so, it has been moving less than that rate, so that the approach of the close of navigation all the elevators are filled, with no relief in sight.

Season Nearing Close.

Several grain carriers are now on their way to Kingston, but the rush of grain is practically over, as it is

Can't Trifle With Nature

Sleeplessness, shaky nerves, stomach trouble, weak heart, headaches, etc., are effects often caused by tea and coffee drinking.

There can be no relief until the cause—if it be tea or coffee—is removed.

Then Nature will repair the damage; and the return to health can be hastened by using well-boiled

POSTUM

the pure liquid food drink containing the nourishing elements of wheat, including the phosphate of potash (grown in the grain) which Nature requires in rebuilding body and brain.

"There's a Reason"

And it is explained in the little book, "The Road to Wellville," in packages. Canadian Postum Cereal Co., Ltd., Windsor, Ontario, Canada

Overland Merchandise Co.

Dept D 5 TORONTO

so late that the vessels will not return to Fort William, and come down to Kingston again with another load. The steamer Kimmount, one of the last boats to unload, cleared for Fort William, but will load grain for Georgian Bay, and thus has made her last trip of the season to this port.

Movements of Vessels.

The sloop Bay Boy, made a trip over from Wolfe Island, with pressed hay, for the R.C.H.A.

The steamer Dundas, grain-laden, from Fort William, lightered her cargo, at Richardson's elevator, and cleared for Montreal.

Some of the vessels comprising the local fleet, have arrived at Oswego at last, after waiting around for several days, as a result of bad weather.

M. T. Co's elevator—Steamer Kimmount, from Fort William, discharged a full cargo of wheat, and cleared for Fort William, to load grain for the Georgian Bay; Steamer Nevada, from Fort William, lightered wheat, and will proceed to Montreal; the tug Emerson arrived from Montreal with three light barges, cleared for Montreal with three grain barges.

QUEEN'S COLLEGE NOTES.

Desire to Have the Best College Campus.

The Queen's Journal says: W. C. Clark, M. A., and J. W. McIntosh will likely represent Queen's in the first inter-collegiate debate, that with Ottawa College, in Ottawa, on December fifth.

Dates Science dinner, Dec. 13th; Final year at home, Dec. 1st, and Arts '12's social evening, Dec. 1st.

Principal Gordon says Queen's authorities hope to have the best campus of any in Canada and it is their desire that the students will make the best use of it.

Rev. G. M. Millar, M. A., '90, has been chosen to fill the chair of practical theology and English Bible, under Dr. Dyde in the Presbyterian College at Strathcona.

Registration up to date shows a slight increase over that of the same date last year. The steady growth of the last few years is still being maintained.

POLLUTED RURAL WELLS.

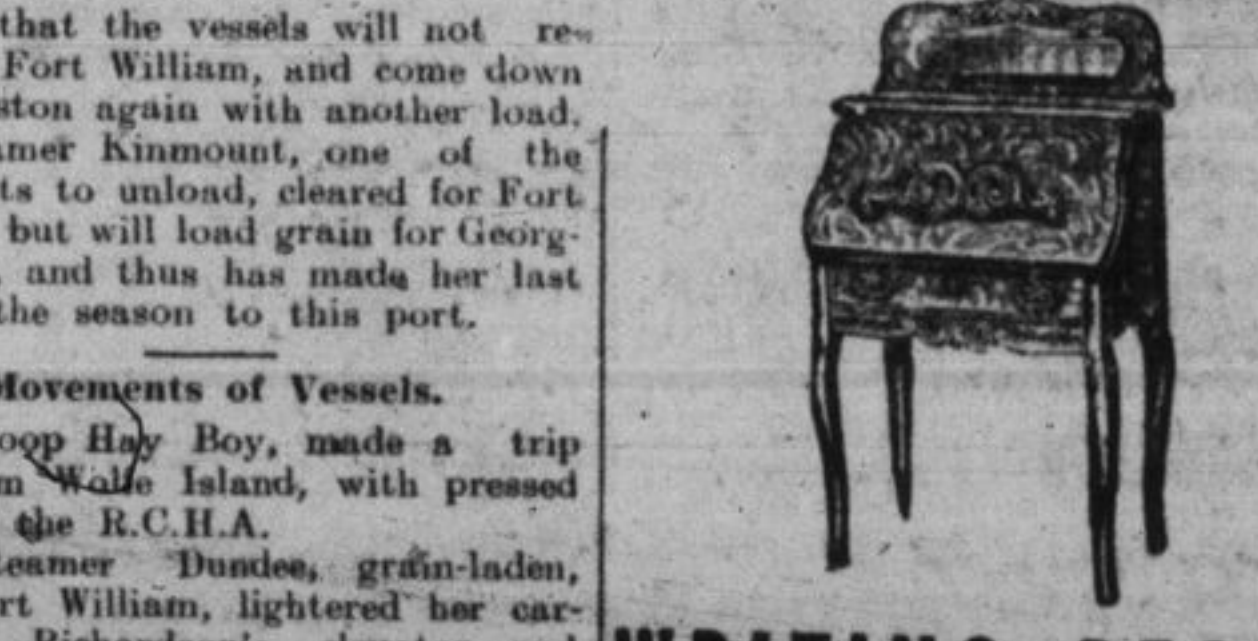

What Dr. W. T. Connell Says He Found.

At the Woman's Institute convention in Toronto, Dr. W. T. Connell, of Queen's University, divulged some startling facts as to the character of the water supply in the rural communities of Eastern Ontario, in the course of a lecture on "Water Supply." Out of 1,000 samples of well water which he examined, two-thirds were polluted; that is to say, the doctor added, they showed the presence of bacterial organisms from the intestinal canals of man or beast. In one village, the doctor said, he found only three wells that gave pure water, in other words, over eighty per cent of the wells in that village are polluted.

"It is time that Ontario is waking up to these conditions," said the doctor. "It is a fact to-day that there is more typhoid fever in the rural communities than in the cities, and four-fifths of the typhoid is traceable to water."

Yes, Quite Active.

Queen's Journal remarks: W. J. J. Tom's McAuley is an energetic citizen, isn't he? J. F. T.—Yes, he's quite active for a stationery man. Elmer Minaker, Point Traverses, is coming to Kingston to go through an operation for appendicitis. Page's Asthma cigarettes, at McLeod's Drug Stores.

CONFIDENT OF VICTORY.

Many Italians Left for Home to Take up Arms.

During the past ten days, it is supposed through on the Grand Trunk on their way to Sunny Italy, via New York. They say they will enlist for the Italy-Turkish war. It is stated that quite a large number of the Italians hailed from Chicago, and some even came from points farther west.

Many of the men had been engaged on various construction on different railways, in the western states, but as the first call to arms, they were ready to drop their pick and shovel, and take up the rifle. Quite a number of the party who have left, are trained soldiers. They are all confident that Italy will win out in the struggle, and are of the belief that the battle will be over by the time they reach home.

It is easier to learn bad habits than it is to unlearn them.
