NEW HEBRIDES MISSIONARY.

Spoke in St. Andrew's Hall on Monday Evening.

A very interesting, racy and instructive address was given by Dr. Paton, son of the world-renowned Dr. John G. Paton, on mission work in the New Hebrides, a group of islands in the south Pacific, in St. Andrew's hall, on Monday evening. Nature has beautifully endowed these islands. They are clad with verdure, fruit grows in abundance, but the people have polluted them with their evil doings, chief among the evils being cannibalism.

Canada has a special interest in these islands for several of the early missionaries who gave their lives for these people, went out from Nova Scotia and Prince Edward Island. To one of the islands went John Geddes in 1848. He died in 1872. On the tablet erected to his memory are the words: "When he came there were no Christians—When he died there were no heathens."

The middle islands of the group are now all Christian, but the north and south islands and about one-half of the rest—the remainder still practicing their cannibal habits.

Mr. Paton has done a great work on the island of Malakula. Some days he would work for thirteen hours without food in a climate where the temperature is never below 59 degrees above zero, and often for days at 94 degrees above. He spoke very highly of the women's work on these islands—teaching the natives to sew and to cook. The home life of the Christian is the best subject lesson for the natives. In these islands there are about 20,000 natives, of whom about one-half are Christians.

Dr. Paton said that the religion of Jesus Christ was the only agent which could change these cannibals into gentle, loving human beings, and that work was being accomplished. The prayers of the Christian people in the home lands were sustaining the missionary in his work, and the people still pray earnestly, and hope faithfully, the world may indeed be won for Christ in this generation.

Dr. Paton had a number of very interesting experiences, among which was a knife made of a little bamboo, but now quite black from being used for some time and which was at cabinet for some blacked by smoke and grease when cooking human beings.

Rev. John Fairlie occupied the chair and Rev. B. Macmillan assisted in the opening services.

LOCAL LABOR MEN SHOCKED

At the Confession Made by McNamara Brothers.

Local labor men were greatly shocked at the news of the confession of the McNamara brothers, who pleaded guilty to having dynamited the Los Angeles Times building.

The Whig was in conversation with a union man today, and he stated that the men should receive the full penalty of the law for their crime. This appears to be the general expression of opinion.

Another labor man told the Whig that from the very start of the case he believed the men were guilty of the crime. However, the majority were stunned at the news, and could hardly believe it.

Tired Feet?

You can't blame the man, or you can't blame the woman whose feet ache, who has tired muscles and nerves, who is fatigued after a few hours walk. The cause is a weak or broken down instep, also known as "flat-foot."

The rheumatism, aches, pains, distorted looking shoe, and the cramped toes, are all results of a weak instep or broken down arch. Sometimes the perfect lines of the foot are destroyed and sometimes they are not, but the victim suffers all the symptoms.

HOSPITAL GOVERNORS. EVERYTHING AT HOSPITAL IS IN FINE ORDER. A Tribute From a Patient—The Amount of Work Done in November was Larger Than Ever.

The board of governors of the general hospital met on Monday afternoon. The following were present: F. G. Lockett, (chairman), Lieut.-Col. Massey, Prof. D. H. Marshall, Rev. D. Loring, John Gilbert, E. Spangenberg, H. H. Bibby, A. F. Chown, J. A. Minnes. The committee of management brought in an extensive report. Several important items were referred back to the committee with power to act. The medical superintendent brought in what was considered a very satisfactory report, showing that the amount of work done in the hospital exceeded any previous November. The financial statement, while showing an increase in receipts, showed also a corresponding increase in expenditure, as the cost of nearly every article of foodstuffs and other necessities is so largely increased this year. A number of communications were received and discussed among others a very satisfactory letter from H. A. Shaw, who was recently a patient in the institution, expressing his satisfaction at the treatment and attention he had received from every one in the institution from the medical superintendent down and wishing the general hospital "continued prosperity in its God-given work of caring for suffering humanity."

The visiting governors brought in a written report and expressing the pleasure they found in going over the institution and seeing the excellent condition of every part of it and the satisfaction expressed on the faces of both patients and attendants. Those appointed to visit the hospital next month are Prof. Marshall and William Anderson. Little Dog Lost. Losing track of his owner, a little dog found its way into the Whig office this morning, and sought shelter in the reporter's room. The little dog was then handed over to the police to await an owner.
